INTRODUCTION

Micrologg: Canadian Research Index puts all of Canada's hard-to-find government and research literature at your fingertips. This monthly indexing, abstracting and document delivery service covers all levels of government in Canada, as well as institutions receiving research grants. Most titles included in **Micrologg** are available in either paper or microfiche format. Combined with a microfiche collection, the **Micrologg Service** is a powerful tool for finding Canadian report publications. The unique **Micrologg Accession Number** is the key to immediate retrieval of any document.

SCOPE

Among other documents, **Micrologg** includes research papers in physical, natural and social sciences, policy papers, important statistics, and annual reports. Every effort is made to ensure the currency of the index. For instance, documents appearing in the Checklist of Canadian Government Publications are delivered by **Micrologg** approximately two months after publication of the list.

LANGUAGE POLICY

Documents issued in English or French are indexed and abstracted in the language of publication, while bilingual documents are indexed and abstracted in both languages.

SOURCES AND COVERAGE

Federal Documents: The **Micrologg** editors review all checklists issued by the Canadian Government Publishing Centre and order every document relevant to the service. Except for serials, maps, pamphlets, and manuals, all monographs covered by the Federal Depository Plan are included in the index. Also, a special effort is made to track down elusive but important titles which do not appear in the lists.

Micrologg offers a special collection of documents published by the Federal Government but not issued through the Federal Depository Plan. These titles, available to subscribers as the Non-Depository Publications collection, are indicated in the Titles section by a bullet (•). **Micrologg** is also the direct distributing agent for many government bodies.

Provincial Documents: Depository arrangements with several provincial libraries have been established to ensure that **Micrologg** subscribers receive all publications from those provinces. Where no depository arrangement exists, all publications lists issued by the province are reviewed for acquisitions.

Municipal Documents: Since these titles are very difficult to obtain, the **Micrologg** editors make special efforts to include publications from municipal sources.

ACCESS

The Index provides access by subject, corporate or individual author, and series title.

The full **Micrologg** file from 1979 to date, consisting of almost 50,000 records, is available online through Can/OLE. This is an ideal way to locate hard-to-find reports which may then be ordered directly online through the Can/DOCS service. Contact: Can/OLE Client Services, CISTI, Ottawa, Ontario, K1A 0S2.

FEATURES

Micrologg comprises the following sections:

1. Titles and abstracts: A full bibliographic citation and a descriptive abstract for each title.

2. Name Index: Access by personal author, corporate author, and conference name.

3. Series Titles: Lists by title and number all reports in series in the service; series are available as an ongoing subscription or retrospective collection.

4. Subject Index: Descriptors based on Library of Congress and Canadiana Subject Headings are assigned to each document. A cross-referencing structure assists searchers.

5. Microfiche collections: Lists contents of each fiche collection for quick reference. These collections can be used as current awareness lists in broad subject areas to notify users of new acquisitions. This section is included in the annual cumulation as a separate fiched product.

MICROLOG AND CANADIAN STATISTICS INDEX

Statistical Material: The **Canadian Statistics Index** (CSI) provides further access to statistical material contained in **Micrologg** monographs and special or annual reports. The CSI identification number has been included with the **Micrologg** citation for the convenience of subscribers to the CSI fiche collection.

Annual Reports: Storage of annual reports in a single sequence has been a problem for clients in the past. The CSI numbers for annual reports are now listed in the bibliographic citation and appear on the microfiche header of each report, to make such sequencing possible.

DOCUMENT DELIVERY

Institutions may subscribe to complete or partial collections of the documents in **Micrologg**. Individual copies on microfiche or paper reprint may be ordered through Micromedia's Document Delivery Service. To order, please contact:

INTRODUCTION

Microlog: Index de recherche du Canada met à votre disposition toutes les publications du gouvernement et les travaux de recherche difficiles à se procurer. Combiné aux collections sur microfiches, le service **Microlog** constitue un outil très efficace pour retrouver les publications des différents gouvernements du Canada, ainsi que celles des organismes qui reçoivent des subventions pour la recherche. **Microlog** est aussi un service de livraison de documents, sur microfiches ou sous forme imprimée.

CONTENU

Microlog contient entre autres des recherches en sciences physiques, naturelles et sociales, des énoncés de politique, des statistiques et des rapports annuels. Par l'intermédiaire du service **Microlog,** on peut obtenir les documents qui figurent sur la Liste des publications du gouvernement du Canada environ deux mois après leur parution sur cette liste.

POLITIQUE LINGUISTIQUE

Les ouvrages publiés en français ou en anglais sont indexés et résumés dans la langue de publication; les ouvrages bilingues sont traités dans les deux langues.

SOURCES

Publications fédérales: Les rédacteurs de **Microlog** examinent les listes émises par le Centre d'édition du gouvernement du Canada et commandent les documents pertinents. En dehors des publications en série, cartes, brochures et manuels, toutes les monographies régies par le Programme de dépôt du gouvernement fédéral figurent dans l'index, ainsi que des ouvrages importants ne figurant pas sur les listes.

Microlog propose aussi une collection spéciale de publications fédérales non déposées, identifiées par un point (•) dans la section Titres et résumés. **Microlog** est aussi l'agent de diffusion de nombreux organismes gouvernementaux.

Publications provinciales: Des ententes de dépôt ont été conclues avec plusieurs bibliothèques provinciales pour que les abonnés de **Microlog** reçoivent toutes les publications de ces provinces. Lorsqu'aucune entente n'existe, les listes de publications émises par les provinces sont examinées afin d'acquérir les documents.

Publications municipales: Ces ouvrages étant difficiles à se procurer, les rédacteurs de **Microlog** redoublent d'ardeur pour les inclure dans l'index.

ACCÈS

L'index imprimé est bilingue et les publications sont répertoriées par sujet, par auteur (collectivité et personne physique) et par titre de collection.

Le fichier complet de **Microlog**, de 1979 à aujourd'hui, contient près de 50,000 notices et est accessible sur Can/OLE. Il s'agit d'un moyen idéal pour mettre la main sur des rapports difficiles à trouver qu'on peut commander par l'intermédiaire du service Can/DOCS. À ce propos, veuillez vous adresser au Service à la clientèle Can/OLE, ICIST, Ottawa (Ontario), K1A 0S2.

ORGANISATION DE L'INDEX

Microlog est divisé en cinq sections:

1. Titres et résumés: tous les titres sont catalogués et accompagnés d'un résumé descriptif.

2. Index des noms: donne un accès par auteur, collectivité-auteur et titre de conférence.

3. Titres de collections: tous les rapports publiés en série sont classés par titre et numéro. Ces collections peuvent être commandées individuellement.

4. Index des matières: les descripteurs permettent de trouver facilement les publications pertinentes; un réseau de renvois facilite la recherche.

5. Collections de microfiches: chaque collection apparaît dans une section séparée pour faciliter la recherche. Ces listes peuvent aussi servir à renseigner les usagers sur les nouveautés. Dans la refonte, cette section est insérée sous forme de microfiches.

MICROLOG ET L'INDEX DES STATISTIQUES DU CANADA

Données statistiques: **L'Index des statistiques du Canada** (CSI) constitue une autre source de référence sur les statistiques contenues dans certaines publications indexées dans **Microlog.** Celles-ci ont un numéro d'ordre spécial qui est inclus dans la référence bibliographique.

Rapports annuels: Afin de rendre le classement des rapports annuels plus facile, le numéro d'ordre CSI correspondant à ces documents figure maintenant dans les références bibliographiques et est inscrit sur les en-têtes de microfiches.

LIVRAISON DE DOCUMENTS

On peut s'abonner à l'ensemble ou à certaines des collections de documents de **Microlog**. On peut également commander des reproductions de documents sur microfiches ou sur papier par l'intermédiaire du service de livraison de documents de Micromedia. Pour commander, communiquer avec:

Micromedia Ltée

Sample CRI Search

"How can a person from a foreign country qualify for refugee status in Canada?"

The researcher can search in CRI as in any library catalogue - by subject, author and title. Because the index is bilingual, searching can be done in English or in French.

Recherche type avec IRC

"Comment une personne d'un pays étranger peut-elle demander le statut de réfugié au Canada?"

La méthode de recherche dans IRC est la même que dans une bibliothèque, puisque les documents sont indexés par auteur, par sujet et par titre. L'index étant bilingue, la consultation peut se faire en français ou en anglais.

The Convention refugee determination process in Canada
by M. Young. Ottawa Library of Parliament. Research Branch, 1987 13 p. Bibliogr (Current issues review 86-26E)
French ed. (La reconnaissance au Canada) on the same fiche.
ISBN 0-660-12567-6
MICROLOG 88-00800 1 fiche

The increase of refugee status claiming immigrants in Canada has led to a review of the immigration policy concerning this group. This report looks at the weaknesses of current legislation which is linked to the Geneva Convention and its Protocol, studying Canada's past adherence to the rights afforded under its protection. Also discusses public and government opinion on support for a humanitarian and generous refugee policy and questions of balancing efficiency with procedural fairness to claimants. Gives a chronology of events since 1969.

STEP 2/DEUXIÈME ÉTAPE

A unified search strategy

The search strategy should include all the monthly issues. Start with the most recent issue and work back. Monthly issues are cumulated annually.

Établir une stratégie de recherche unifiée

La stratégie de recherche doit tenir compte de toutes les publications mensuelles, à commencer par les plus récentes. Chaque année, ces publications font l'objet d'une refonte.

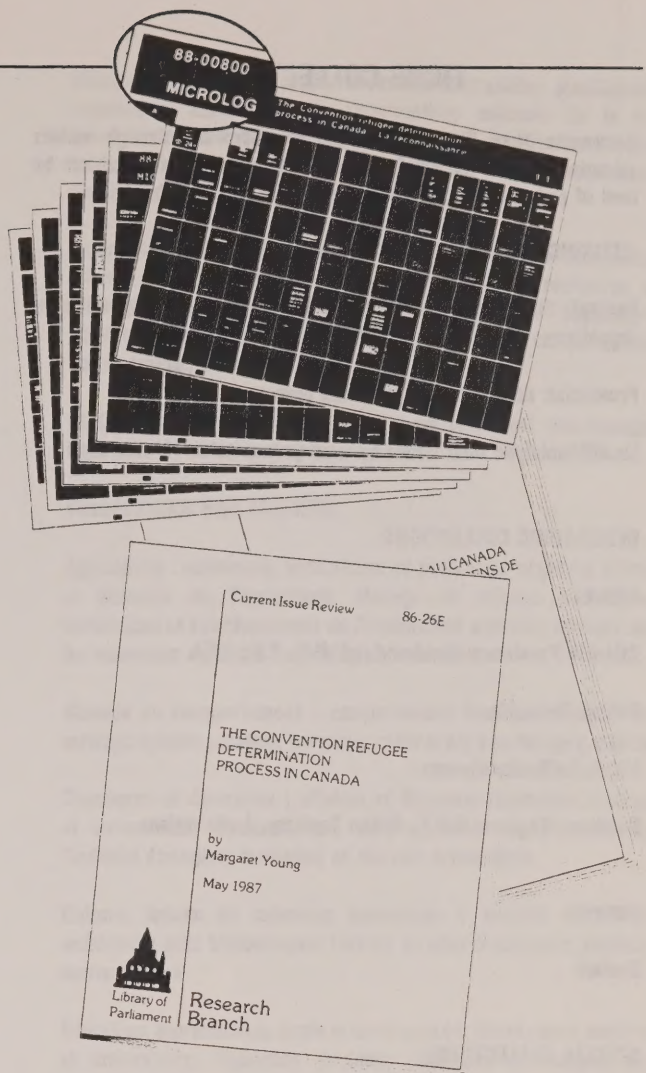

STEP 3/TROISIÈME ÉTAPE

Retrieve the publication

Each bibliographic citation gives a full description of the relevant document. Locate the document by the microfiche number in the library's collection or order from Micromedia. Individual publications are available for purchase on microfiche or paper. The bibliographic description provides publisher source information.

Repérer la publication

Chaque notice bibliographique comprend une description complète du document; celui-ci peut être repéré grâce au numéro de microfiche de la bibliothèque; sinon, il faut le commander à Micromedia. On peut se procurer les monographies sur microfiches ou sur papier. La description bibliographique comporte également des indications sur l'éditeur.

FICHE COLLECTIONS

Documents from CRI are available on microfiche through various subscription plans ranging from the complete collection to subsets by level of government (jurisdiction), geographic area, or subject.

JURISDICTION COLLECTIONS

Federal: titles issued at the federal level, both depository and non-depository

Provincial: titles issued by provincial governments

Local/Municipal: titles issued by local governments

GEOGRAPHIC COLLECTIONS

Alberta

Atlantic Provinces: Newfoundland, N.S., N.B., P.E.I.

British Columbia

Manitoba/Saskatchewan

Northern Regions: N.W.T., Yukon Territory, Arctic regions

Ontario

Quebec

SPECIAL COLLECTIONS

Critical issues: documents from Canadian jurisdictions on issues that receive public attention and are the subject of debate

Fisheries and Oceans Canada: documents published by the Dept. of Fisheries and Oceans

Canada Centre for Mineral and Energy Technology (CANMET): documents published or contracted out by the Centre

Depository Collection: documents published by the federal government issued through the Federal Depository Program

FEARO: documents published by the Canadian Environmental Assessment Research Council (CEARC) and/or the Federal Environmental Assessment Research Office (FEARO)

Non-Depository Collection: documents published by the federal government, not issued through the Federal Depository Program. Available as a complete collection or as a **science** or **social science** sub-collection

ONTERIS (ON COLLECTION): ONTERIS documents for which we have microfilming rights and which meet our inclusion policy

COLLECTIONS DE MICROFICHES

Les publications incluses dans l'IRC sont en vente sur microfiches, en collection complète ou en collections plus petites regroupant des titres par juridiction, par aire géographique ou par matière.

COLLECTIONS GOUVERNEMENTALES

CA **Fédéral :** publications émises par le gouvernement fédéral, régies ou non par le Programme de dépôt

Titres et résumés

100 Mile House Timber Supply Area : rationale for allowable annual cut (AAC) determination, effective January 1, 1996

By Larry Pedersen. Victoria : Ministry of Forests, 1995. 40 p.
MICROLOG 96-01647 (1 fiche)

The 100 Mile House Timber Supply Area (TSA) lies in south central British Columbia and covers about 1.2 million hectares, of which 59% is the current timber harvesting land base. After a brief description of the TSA, this report reviews the principles for determining the allowable annual cut for the TSA and presents an accounting of the factors and the rationale used in making that determination. These factors include the role of the base-case timber supply forecast, the land base contributing to the timber harvest, the existing forest inventory and expected rate of growth, regeneration delay, silvicultural treatments, decay and waste, integrated resource management objectives, alternative rates of harvest, timber processing requirements, and economic/social objectives. The appendix contains relevant sections of the provincial forestry legislation and a summary of public input into the 100 Mile House TSA Timber Supply Review.

MICROLOG 96-01795 (3 fiche)

The objective of this survey is to provide detailed information about energy consumption habits in Canadian households, as well as conditions or factors which affect energy use, with emphasis on energy consuming appliances and equipment, characteristics and state of the dwelling, and profiles of consumers (including consumption habits). The survey includes data on distribution of dwellings by type and year of construction, average characteristics of households, characteristics of the thermal envelope, improvements made to the thermal envelope, heating systems and their principal energy source, use of air conditioning equipment, types and distribution of energy consuming appliances, water heater characteristics, and distribution and average number of light bulbs per dwelling. The appendices include a methodological summary of the survey used to gather the information, a glossary, and comments concerning processing of the data.

MICROLOG 96-02044 (2 fiche)

This report provides information on sediment contaminant concentrations and toxicity, and biota (crabs and fish) tissue contaminant concentrations, for a number of sites in Boundary Bay (Fraser River estuary). The report includes a description of the sampling area, field sampling methods, sample preparation and storage, sediment and tissue analytical procedures, and quality assurance/quality control procedures used. Contaminants studied include metals and metalloids, acid-volatile sulfide and simultaneously extracted metals, polycyclic aromatic hydrocarbons, chlorinated phenols, polychlorinated biphenyls, and pesticides.

1994-95 directory : substance abuse prevention programs serving Métis, Inuit, and off reserve Aboriginal peoples

Ottawa : Health Canada, Health Promotion Directorate, 1994. xviii, 235 p. *French ed. (Répertoire 1994-95 : programmes en...) : 96-02076/4.*
ISBN 0-662-23160-0 CCG-P no. H39-326/1995E
MICROLOG 96-01913 (3 fiche)

This directory is an information & referral tool intended to help meet the demand for information about substance abuse prevention programs. It is a resource for community & healthcare workers as well as service providers working in Aboriginal associations, community groups and the education community. Listings describe programs provided by Aboriginal and non-Aboriginal organizations & government agencies throughout Canada. Activities include information & education as well as intervention activities. Listings provide agency & program name & address with telephone & fax numbers & a contact person. The program is briefly described & information is given regarding program focus, program type, scope, who delivers the program (professionals, peers, volunteers, elders, etc.), substances, languages, hours, geographic area served, fees, & related programs. A place name index is also provided.

1995 integrated electricity plan

B.C. Hydro. Vancouver, BC : B.C. Hydro, 1995. x, 155 p. : *ill.* ISSN 1203-4770
MICROLOG 96-01828 (2 fiche)

This plan presents BC Hydro's perspective on the options available to meet the future electricity needs of its customers. The options considered in the plan include both generation and demand-side resources, as well as transmission lines and station facilities. The plan places particular focus on those actions that have to be taken over the next few years. Two main deliverables are embodied in the plan: a 20-year outlook and a four-year action plan. Other parts of the plan describe the integrated electricity plan approach, the public consultation process, the demand-supply outlook for the province, planning objectives, identification and characterization of resource options, resource portfolio development and evaluation, the lessons learned in development of the plan, and issues that will need to be addressed in future plans.

1995 integrated electricity plan, appendix A : the 1995 integrated electricity plan public consultation report

Vancouver, BC : BC Hydro, 1995. 233 p.
ISSN 1203-5327
MICROLOG 96-01625 (3 fiche)

BC Hydro's public consultation program for its integrated electricity plan focused mainly on a Consultative Committee convened to provide a forum for focused stakeholder consultation on issues related to the plan. This appendix documents the process by which the Committee was established and aspects of its operation. It includes a list of Committee members, terms of reference set out for the Committee mandate, guiding principles for the planning process in relation to the Committee, the procedural guidelines by which the Committee operated, the participant funding policy, the Committee membership selection process, and Committee meeting notes that reflect the general intent of the Committee meeting discussions.

1995 integrated electricity plan, appendix D : electric load forecast, 1994/95-2014/15

Vancouver, BC : BC Hydro, 1994. viii, 74 p. : *ill.*
ISSN 1203-5343
MICROLOG 96-01700 (1 fiche)

This appendix provides a 20-year load forecast, a key driver of BC Hydro's planning activities, the purpose of which is to address when, where, why, and how much electricity will be required. The document outlines the assumptions, information sources, and process used to prepare the forecast and explains the drivers, factors, and uncertainties influencing future electricity demands. A regional analysis of energy and peak demand is included to address emerging utility planning issues such as competition and community involvement in energy planning. The 20-year forecast is presented in summary form as well as in detailed tables by rate category. The document also includes a review of research and development efforts to enhance load forecasting products and services, the status of BC Hydro's marketing and demand-side management programs, and a glossary.

1995 integrated electricity plan, appendix E : resource options

Vancouver, BC : BC Hydro, 1995. 264 p. : *ill.*, *Bibl.* ISSN 1203-5351
MICROLOG 96-01628 (3 fiche)

This appendix provides data and information from the characterization of individual projects and programs considered in the BC Hydro integrated electricity plan. The plan characterized over 100 generation, demand-side, and transmission options in a consistent manner, providing details on individual resources to allow comparisons of the options in the analysis conducted for the plan. The appendix includes a resource characterization framework, or a set of attributes by which resource options can be characterized and compared; tradeoff attribute descriptions; and the resource summaries. Information in each resource summary includes a project description, financial and technical information, and estimates of impacts on the environment, society and communities, and economic development.

1995 integrated electricity plan, appendix F : resource trade-off decision analysis for BC Hydro's 1995 integrated electricity plan

Vancouver, BC : BC Hydro, 1995. iii, 175 p. : *ill.*, *Bibl.* ISBN 0-7726-2707-X
MICROLOG 96-01588 (2 fiche)

This report documents and describes various aspects of one component of BC Hydro's 1995 integrated electricity plan: a multi-attribute tradeoff analysis (MATA). The objectives of the MATA go beyond the calculation of a measure of worth of alternative resource plans and include elements that make for meaningful public participation, such as displaying information on tradeoffs and showing implications of uncertainty. The report describes the portfolio analysis approach used for the MATA, in which resources are evaluated in the context of an overall portfolio; the resource screening methodology, in which resources are removed or added to a reference portfolio and tradeoff curves are used to examine impacts; the portfolio analysis process; and the evaluation and weighting of portfolios. The report also discusses major issues raised by the portfolio analysis, such as demand side management and the treatment of independent power producers. The report concludes with an examination of the robustness of the portfolios to risks beyond BC Hydro's control.

1995 SPRC guide for household budgeting

Prepared by Gloria DeSantis...et al. Hamilton, ON : Social Planning & Research Council of Hamilton-Wentworth, 1995. 477 p. : *ill.*, *Bibl.*
MICROLOG 96-01830 (5 fiche) (Available on fiche only)

Sections in this guide, when considered together, attempt to represent an adequate budget for well-being in the Hamilton-Wentworth region. Previous editions of the guide have been consulted as a source of standards and costs for planning and policy setting by community agencies and organizations, and by the legal system for such purposes as determining levels of support payments in family law cases. This edition is intended to reflect basic living standards and considerations for people living within the region and goes beyond basic necessities by including other considerations and costs related to transportation, personal care, dependent care, recreation, and other matters. Sections of the guide cover food, housing, clothing, utilities and fuel, home furnishings, housekeeping, health care, educational needs, insurance, other household costs, and income tax implications.

Abiotic factors involved in predicting trace metal levels in freshwater bivalves

By André Tessier and Peter G. Campbell. Toronto : Ministry of Environment & Energy, 1995. ii, 51 p. : *ill.*, *Bibl. On cover: Environmental research.*
ISBN 0-7778-2370-5
MICROLOG 96-01541 (1 fiche)

This report describes the development and field-testing of a deterministic model to predict metal accumulation in benthic organisms. The model formulation uses concepts derived from the free-ion activity model of metal-organism interactions and from surface complexation theory to relate metal concentrations in the organism to those in the water or in surficial oxic sediments. The investigators tested the model for cadmium accumulation on the freshwater bivalve Anodonta grandis, used linear regression analysis to relate the free cadmium concentrations to the cadmium concentrations in the soft tissues of the bivalve, and interpreted the partitioning of cadmium between water and surficial toxic sediments in terms of sorption of the metal on two sediment components.

Above ground tree biomass of interior uneven-aged Douglas-fir stands

By P.L. Marshall and Y. Wang. Victoria : Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II, 1995. iv, 23 p. : *Bibl.* (Working paper / Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II ; WP-1.5-003)
MICROLOG 96-01490 (1 fiche)

This paper summarizes a project conducted to develop equations for predicting the biomass of several above-ground components of interior British Columbia Douglas-fir trees using data collected from 60 uneven-aged trees selected from the vicinity of six permanent sample plots (PSPs). The investigators also tested whether stand density has an impact on the form of the biomass prediction equations and characterized the biomass of each of the six PSPs, based on the equations developed and tree measurements taken at the time of plot establishment (1988). The paper describes the data preparation methods used, the development of the biomass component equations, and results of testing the impact of different locations and density classes. Finally, it presents results of the biomass predictions for each of the PSPs. Appendices contain sample tree data, descriptive statistics, and correlation coefficients.

Action on waste : a full cost analysis guide for municipal waste managers

Edmonton : Alberta Environmental Protection, 1995. ii, 77 p. : *ill., Bibl.* ISBN 0-7732-1447-X
MICROLOG 96-01950 (1 fiche)

For municipalities to be able to fully understand and compare the costs of various waste management alternatives, they need to have a common understanding of the true or full costs associated with the various options. This structured user guide has been developed to assist municipal waste managers in implementing full-cost analysis procedures. The first section explains what full-cost analysis is, including the Alberta Environmental Protection official definition of the term. The second section describes when and how to use the guide, discussing the process of project development and when the various levels of full-cost analysis should be introduced. This section introduces a network stepmatrix analysis process for identifying impacts and explains the ranking system used for non-monetary considerations. The third section provides a series of checklists of factors and costs to be considered and/or included in the analysis. The guide ends with a series of worksheets for cost calculations.

Advanced technology use in Canadian manufacturing establishments

By John R. Baldwin and Brent Diverty. Ottawa : Statistics Canada, Analytical Studies Branch, 1995. 27 p. : *Bibl.* (Research paper series / Statistics Canada. Analytical Studies Branch ; no. 85) *French ed. (Utilisation des technologies...) on the same fiche.* ISBN 0-660-15589-3
SCC 11F0019MPE
MICROLOG 96-01877 (1 fiche)

This paper investigates the characteristics of Canadian manufacturing plants that are related to the use of advanced technologies. The data used are taken from the 1989 Survey of Manufacturing Technology and are linked to administrative data taken from the Census of Manufacturers. Technology use is defined first as incidence (whether a technology is used) and second as intensity (the number of technologies used). These variables (incidence and intensity) are then related to a number of characteristics that represent the competencies of the plant reporting technology use - its size, the size of its owning enterprise, the recent growth of the plant, the number of industries in which its owning enterprise operates, its age, and nationality. The results are then compared to several recent U.S. studies.

Affordable and equitable access to the information highway : final report

By John A. Gilbert, Ken Hepburn and Guido Henter. Ottawa : Information Highway Advisory Council, 1995. iii, 85 p. : *Bibl.*
MICROLOG 96-01811 (1 fiche)

The intent of this report is to offer recommendations on public policy actions concerning affordable and equitable access to the information highway. It offers an operationalized concept of universal service and provides an analysis of the central issues of access and affordability of these services. Issues discussed include the theory and the reality of universal service, the implications of a network of networks, special measures to allow full access to persons with disabilities and with low levels of literacy, service to remote and rural areas, the terminal environment, and the changing roles of service providers. The report also contains a section on the current public policy and regulatory positions that have already been enunciated with respect to those issues in Canada, and some recommended policy principles and regulatory approaches suggested by prior studies. The report ends with a similar section on policy and regulatory approaches in other countries.

Aggregate test pit sampling : alternative methods and safety issues

By B.C. Lane and Z.L. Katona. Downsview, ON : Ministry of Transportation, Engineering Materials Office, Soils & Aggregates Section, 1995. 58 p. : *ill., Bibl.* (Report / Ontario. Highway Engineering Division. Engineering Materials Office ; EM-99)
MICROLOG 96-01559 (1 fiche)

The Ontario transportation ministry uses vertical channel-face sampling as the standard method for sampling potential sources of aggregates. In view of concerns that this method did not adhere to occupational health and safety requirements when pit dimensions exceed 1.2 meters in depth, the researchers conducted a field investigation to compare the ministry standard method with three alternative methods of sampling aggregate sources. They excavated 74 test pits in three sources, performed gradation tests on both the coarse and fine

aggregate fractions, and carried out a statistical analysis to determine the degree of equivalence of the alternative methods to the standard method. This report reviews the sampling methods used and the statistical techniques employed, and presents the results of the tests. The report concludes with recommendations regarding aggregate test pit sampling.

Alternative measures of the average duration of unemployment

By Miles Corak and Andrew Heisz. Ottawa : Statistics Canada, Analytical Studies Branch, 1995. 26 p. : *ill., Bibl.* (Research paper series / Statistics Canada. Analytical Studies Branch ; no. 83) *French ed. (Mesures alternatives...) on the same fiche.* ISSN 1200-5223 ISBN 0-660-15585-0
SCC 11F0019MPE
MICROLOG 96-01879 (1 fiche)

This paper examines the robustness of a measure of the average complete duration of unemployment in Canada to a host of assumptions used in its derivation. In contrast to the average incomplete duration of unemployment, which is a lagging cyclical indicator, this statistic is a coincident indicator of the business cycle. The impact of using a steady state as opposed to a non steady state assumption, as well as the impact of various corrections for response bias are explored. It is concluded that a non steady state estimator would be a valuable compliment to the statistics on unemployment duration that are currently released by many statistical agencies, and particularly Statistics Canada.

Antenna amplitude and phase pattern measurements using an aircraft-towed transmitter

By Robert W. Jenkins. Ottawa : Industry Canada, Communication Research Centre, 1995. vii, 48 p. : *ill., Bibl.* (CRC report / Communications Research Centre (Canada) ; no. 95-003)
MICROLOG 96-01672 (1 fiche)

To address the need for calibrated high-frequency antenna arrays for direction finding and other applications, a previously built antenna pattern measurement system known as Xeledop was refurbished and modified to provide relative-phase as well as gain measurements. Xeledop consists of a small transmitting dipole assembly towed behind a light aircraft. The dipole emits a signal at one of six frequencies in the 5-18 megahertz range, and transmitter location is provided by a differential global positioning system. This report presents an overview of the Xeledop system and results of pattern measurements carried out with a 12-element direction finding array. The report interprets the results both in terms of the Xeledop performance and its potential for measurements of this type, and the characteristics and predictability of the antenna patterns of the direction finding array.

Application of the integral method to modelling the oxidation of defected fuel elements

By Miroslav Kolár. Pinawa, MB : Whiteshell Laboratories, 1995. 53 p. : *ill., Bibl.* (AECL research / Atomic Energy of Canada Ltd. ; AECL-11174
ISSN 0067-0367) ISBN 0-662-16080-3 CCG-P no. CC2-11174E
MICROLOG 96-01477 (1 fiche)

The ability to predict the extent and rate of oxidation of defected nuclear fuel elements is instrumental in determining the optimum operating conditions of a dry storage facility. This report investigates a selection of oxidation models that may be applicable to various storage periods of the Controlled Environment Experiment CEX-1, in which a large number of intentionally defected and control undefected irradiated CANDU fuel elements were stored in dry air at 150 degrees C. The report uses the approximate integral method for the solution of the one-dimensional moving-boundary problems that may describe various storage periods of CEX-1. Using this method, the report assesses the validity of the quasi-steady state approximation and also studies diffusion-controlled oxidation. Exact or approximate solutions are presented for linear and spherically symmetric geometries. The appendix includes a computer program listing.

Artificial nest structures for ospreys : a construction manual

By Peter J. Ewins. Toronto : Environment Canada, Canadian Wildlife Service, Ontario Region, Environmental Conservation Branch, 1994. 41 p. : *ill., Bibl. On cover: Great Lakes Cleanup Fund.*
ISBN 0-662-22791-3 CCG-P no. CW66-134/1-1994E
MICROLOG 96-02092 (1 fiche)

Populations of ospreys (Pandion haliaetus) have been increasing rapidly in many parts of North America since organochlorine pesticides were withdrawn from large-scale use in the 1970s. These increases have been facilitated by installation of artificial nest structures, particularly in areas where pre-

ferred natural nest sites are now scarce. This manual assembles a number of different designs for constructing artificial osprey nest platforms best suited to the habitats found in Canada, with a focus on the Great Lakes region. After introductory sections outlining site selection considerations and general construction hints, the manual details single-pole designs, circular platforms, offset solid-base platforms, tripods and quadripods, tree platforms, ring platforms, and wire-grid platforms. The final section describes alternatives for relocating osprey nests which are causing problems on electricity transmission structures.

Assessing the Impacts of Agricultural Biotechnologies : Canadian-Latin American perspectives : proceedings of a workshop

Edited by Brent Herbert-Copley. Ottawa : International Development Research Centre, 1995. viii, 137 p. : *Bibl.* ISBN 0-88936-789-2
MICROLOG 96-01505 (2 fiche) (Available on fiche only)

The workshop on which this volume is based represents one of the first formal activities of the Canada-Latin America Initiative on Biotechnology, the Environment and Sustainable Development. This Initiative is designed to promote the application of biotechnology-based products and applications to respond to critical needs in the agri-food and environmental management sectors of selected Latin American studies. The workshop objectives included the identification of methodological approaches for the assessment of socio-economic and environmental impacts of agricultural biotechnologies. The workshop papers in this volume include reviews of previous studies on biotechnology impacts, studies of methodological tools and approaches to evaluate biotechnology impacts, and studies of the integration of impact assessment data into decision-making.

Assessment of mercury exposure and risks of dental amalgam : final report

By G. Mark Richardson. Ottawa : Health Canada, Environmental Health Directorate, Medical Devices Bureau, 1995. ix, 109 p. : *ill., Bibl. French ed. (Évaluation de l'exposition au mercure...) : 96-01993/2.*
MICROLOG 96-01994 (2 fiche)

This report has been prepared in response to concerns that exposure to mercury from dental amalgam may adversely impact on health. The report aims to quantify mercury exposure from amalgam fillings, as well as exposure from other non-occupational sources; to assess the hazard posed by this exposure, estimating the exposure level which should be tolerable for most of the Canadian population; and to quantify the proportion of the Canadian population that may exceed the tolerable level. Two exposure assessment methods were used, one based on equations published by Olsson and Bergman (1992) and the other a deterministic multimedia approach by Richardson et al (1995). The report also includes a review of mechanisms of mercury uptake, tissue distribution, metabolism, and excretion by humans, and of the toxicology of mercury via ingestion, dermal absorption, and vapor inhalation.

Assessment of the long-term risk of a meteorite impact on a hypothetical Canadian nuclear fuel waste disposal vault deep in plutonic rock

By D.M. Wuschke...et al. Pinawa, MB : AECL, Whiteshell Laboratories, 1995. 55 p. : *ill., Bibl.* (AECL research / Atomic Energy of Canada Ltd. ; AECL-11014 ISSN 0067-0367)
ISBN 0-660-16191-5 CCG-P no. CC2-11014E
MICROLOG 96-01714 (1 fiche)

This report describes an assessment of the long-term radiological risk to an individual of the critical group that would result from a meteorite impact on a hypothetical reference disposal vault for used nuclear fuel, located 500 meters below the Earth surface. The purpose of the assessment was to determine whether this radiological risk could exceed or approach the Atomic Energy Control Board risk criterion. The critical group is assumed to be a small rural community which, sometime after the meteorite impact, moves to the area contaminated by nuclear fuel waste exposed as a result of the impact. The probability of exposure of this group is the cumulative probability that a meteorite impact disrupting the disposal vault has occurred at the site prior to the year under consideration. The risk estimates presented include risks of fatalities from deterministic effects, fatal and nonfatal cancers, and severe hereditary effects.

Attautsikut/together, Qitiqliq Secondary School : Exemplary Schools Project, technical report

By Mary H. Maguire and Lynn McAlpine ; with Barbara Graves, Rebecca Leebe, Tomoko Ishibashi. Toronto : Canadian Education Assn, 1995. 166 p. : *ill., Bibl.* ISBN 0-920315-86-0
MICROLOG 96-01865 (3 fiche) (Available on fiche only)

This case study was completed as part of a national research study of a sample of secondary schools across Canada that had a reputation for success. The study examines five issues: the meaning and recognition of success; the interaction between the school and its context; the influence of structures, processes, and culture of the school in fostering success; the characteristics of student life in the school; and services provided to students at risk of becoming dropouts. This study describes a school in the Northwest Territories with a total enrolment of over 200, most of whom are Inuit. Chapters of the study cover the multiple contexts in which the school finds itself, such as geographic, historical, political, cultural, and socio-linguistic; school and community partnerships; images and styles of leadership; school administration; social interactions and instructional processes; and creation of educational opportunities in a dual-cultural context. The appendix presents the case study methodology. Includes glossary.

MICROLOG 96-02057 (1 fiche) (Available on fiche only)

This paper presents a method for solving a general class of configuration problems which can be formulated as constraint satisfaction problems. The paper considers a configuration problem to mean the task of constructing an object which satisfies both catalog and user constraints. Catalog constraints are prespecified and seldom change, while user constraints are specified at program run time. The approach presented takes advantage of this difference by precompiling catalog constraints for better run time performance. Catalog constraints are precompiled using constraint processing and database query optimization techniques, while user queries are solved using a hybrid backtrack search/consistency algorithm which exploits compiled catalog constraints. The approach is illustrated with two problems, configuration of Macintosh computers and a floor plan configuration system.

Background document for advanced personal load carriage system for the Canadian Forces : final report

Submitted to Defence and Civil Institute of Environmental Medicine ; from Ergonomics Research Group, Queen's University ; prepared by Ron P. Pelot...et al. Kingston, ON : The Group, 1995. iii, 121 p. : *ill., Bibl.*
MICROLOG 96-01806 (2 fiche)

This extensive review of current load carriage systems and literature is part of research for the Advanced Personal Load Carriage System for the Canadian military. The review summarizes scientific and popular literature on load carriage design elements and performance ratings. Factors studied included total load, load distribution, and various load carriage systems for civilian and military applications, such as backpacks. Conditions studied range from forced marches of several days to balance, treadmill, or circuit tests in the laboratory. Formal assessment methods are mostly based on physiological or biomechanical measurements or ratings of perceived exertion. The appendices include questionnaires and responses from surveys of backpack use among military personnel, responses from a survey of civilian backpack users, and a background report on civilian load carriage systems.

Background report : land use, strategic evaluation of scenarios

Ottawa-Carleton (Ont.). Planning & Property Dept. Policy Division. Ottawa : The Division, 1995. 79 p. : *ill., Maps At head of title: Planning our region : Ottawa-Carleton Regional Plan Review.*
MICROLOG 96-01570 (1 fiche)

This report details the evaluation undertaken to identify the best possible options for future growth in the Ottawa-Carleton regional municipality. The evaluators developed nine main development scenarios, each with a different population allocation but all based on a total regional population of 1,014,000 by the year 2021. Two employment options were tested for each scenario: employment in balance with the number of households, and employment growth based on historic trends. Criteria for evaluation included those relating to the natural environment, to caring and healthy communities, and to the economy. The scenarios included the current Official Plan scenario, a rural growth scenario, four suburban scenarios, and three urban scenarios. The report concludes with results of the evaluation, showing overall preferences by families of criteria.

Bark beetle management guidebook

Victoria : BC Environment ; British Columbia Forest Service, 1995. vii, 57 p. : *Maps, Bibl. At head of title: Forest Practices Code of British Columbia.*
ISBN 0-7726-2588-3
MICROLOG 96-01655 (1 fiche)

This guidebook is designed to provide a background to bark beetle management practices consistent with the British Columbia Forest Practices Code, as well as specific practices for managing mountain pine beetle (Dendroctonus ponderosae), spruce beetle (Dendroctonus rufipennis), and Douglas-fir beetle (Dendroctonus pseudotsugae). It describes their general biology and distribution in British Columbia, their life cycles and population dynamics, and symptoms of bark beetle attack. General management strategies presented include prevention (a long-term approach), suppression, holding actions, and salvage. Strategies appropriate to specific bark beetles include aerial surveys, ground detection, baiting, harvesting, and use of insecticides. The guidebook includes brief mention of other bark beetles (Scolytids and other Dendroctonus species) and a glossary.

Behavioural responses of adult sockeye salmon, Oncorhynchus nerka, under simulated estuarine conditions and prolonged saltwater hypoxia

G.E. Piercey...et al. West Vancouver, BC : Dept. of Fisheries & Oceans, Biological Sciences Branch, Salmon Habitat Section, West Vancouver Laboratory, 1995. vi, 256 p. : *Bibl.* (Canadian data report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 963 ISSN 0706-6465)
CCG-P no. Fs 97-13/963E
MICROLOG 96-01794 (3 fiche)

This report presents data generated from laboratory studies which examined the behavioral responses of adult sockeye salmon under vertically stratified (fresh water overlying saline water) estuarine conditions and to 48-hour exposure to saltwa-

ter hypoxia within a water column simulator. The conditions in the simulator were similar to those that may be encountered by adult sockeye during their migration through Alberni Inlet, British Columbia. The investigators quantified breathing frequencies and swimming speeds of individual sockeye upon exposure to normoxic and hypoxic salt water, and temperatures of 20 degrees C (fresh water) and 12 degrees C (salt water). Fish behavior and position within the stratified water column were examined under full light, dusk, dark, and dawn conditions using time-lapse video recording. Hematology parameters were also determined for individual fish, as well as length, weight, sex, and gonadal somatic indices. An 8.5-week challenge was conducted to assess tolerance to fresh water.

Bien-être, résultats de l'intégration de l'échelle d'équilibre affectif de Bradburn à l'enquête sur le vieillissement et l'autonomie de 1991

Par Jennifer L. Smith. Ottawa : Santé Canada, Direction générale des programmes et des services de santé, Direction des services de la santé, Division de la santé mentale, 1995. xii, 154 p. : *ill., Bibl. L'éd. anglaise (Well-being, results of the Bradburn...) : 96-01923/2.* ISBN 0-662-99439-6
GCC-E no H39-310/1995F
MICROLOG 96-01924 (2 fiche)

Cette étude est le résultat d'un travail de collaboration entre la Division de la santé mentale et la Direction des aînés au cours de l'été 1994. Le rapport analyse les résultats obtenus à l'aide de l'échelle de Bradburn afin de cerner les facteurs qui contribuent au bien-être émotif des Canadiens âgés et les facteurs déterminants pour la santé mentale des personnes âgées de demain. Les points abordés sont les suivants : échelle d'équilibre affectif de Bradburn et l'attribution des cotes; méthodologie; résultats de l'analyse de régression; résultats de l'analyse par recoupements - facteurs démographiques, santé et bien-être, expériences de la vie, emploi et retraite, modalités de vie, statut économique et bien-être, et soutien social.

Biological control of leafy spurge in Alberta : progress and prospects

By A.S. McClay...et al. Vegreville, AB : Alberta Environmental Protection, Alberta Environmental Centre, 1995. ix, 63 p. : *ill., Maps, Bibl.*
ISBN 0-7732-1688-X
MICROLOG 96-01914 (1 fiche)

Leafy spurge (Euphorbia esula) is a herbaceous perennial weed, native to Europe, which spreads both by its creeping root system and by seed. It is unpalatable to cattle and can form dense stands on uncultivated land. Leafy spurge is estimated to infest about 6,000 hectares throughout Alberta in a wide range of soil and habitat types. This report describes the nature and extent of the leafy spurge problem in the province and summarizes the biological control efforts which have been undertaken against this weed from 1978 to 1994. It reviews the biology of agents released in Alberta, reviews the success (if any) of releases of biocontrol agents in the province, and evaluates the establishment and impact of two of the most successful agents to date, the beetles Aphthona nigriscutis and Apthona flava. The report ends with a discussion of means of successfully implementing biocontrol of leafy spurge and an assessment of the potential of currently available agents for use at sites where the above two species are not effective.

Biology and impact of zebra mussels in Lake St. Clair and Lake Erie : final report

Prepared by G.L. Mackie...et al. Toronto : Ministry of Environment & Energy, 1995. iii, 116 p. : *ill., Maps, Bibl. On cover: Environmental research.*
ISBN 0-7778-4676-4
MICROLOG 96-01542 (2 fiche)

This document contains a collection of individual papers on various aspects of the biology and ecological impacts of the zebra mussel (Dreissena polymorpha) in Lake Erie and Lake St Clair. The first paper compares the shell features of D. polymorpha to a related native species with which it can be confused. The second paper describes the mussel's life history and population demographics; the third notes the impacts of D. polymorpha on native Unionidae in Lake St Clair; the fourth describes the effect of epizoic D. polymorpha on the filtering activities of the host unionid Proptera alata; and the fi-

nal paper reviews the distribution, growth, and contaminant uptake by D. polymorpha in Ontario surface waters. The contaminants of interest were chlorobenzenes, total polychlorinated biphenyls, polyaromatic hydrocarbons, and heavy metals.

Bottom trawl and exploratory hydroacoustic survey for rockfish in Queen Charlotte Sound, June 20 to July 7, 1994

C.M. Hand...et al. Nanaimo, BC : Dept. of Fisheries & Oceans, Biological Sciences Branch, Pacific Biological Station, 1995. iv, 87 p. : *ill., Maps, Bibl.* (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2300 ISSN 0706-6473)
CCG-P no. Fs 97-4/2300E
MICROLOG 96-01785 (1 fiche)

This report documents a trawl and hydroacoustic survey of rockfish stocks conducted by two vessels in 1994 in Goose Island Gully, Queen Charlotte Sound. The purpose of the survey was to update the time series of biomass estimates of Pacific ocean perch from standard trawl surveys, to investigate the potential for hydroacoustic techniques to measure rockfish abundance, and to collect oceanographic information to explore the relationship between rockfish and their environment. The trawl survey followed the stratified-systematic approach of previous surveys and resulted in new relative biomass calculations for Pacific ocean perch in the Gully. The report includes description of the survey design and sampling procedures, as well as a summary of the catch, biological, and oceanographic data collected.

A Branch-and-cut algorithm for the undirected selective traveling salesman problem

By Michel Gendreau, Gilbert Laporte and Frédéric Semet. Montreal : Université de Montréal, Centre de recherche sur les transports, 1995. ii, 20 p. : *Bibl.* (Publication / Université de Montréal. Centre de recherche sur les transports ; no. 95-80) (Publication / Université de Montréal. Département d'informatique et de recherche opérationnelle ; no. 1007)
MICROLOG 96-02002 (1 fiche)

This paper describes a branch-and-cut algorithm for the undirected selective traveling salesman problem, a problem with applications in such areas as home heating oil delivery and orienteering. The problem is defined on a graph in which profits are associated with vertices and costs are associated with edges, and the aim is to construct a tour of maximal profit whose cost does not exceed a preset constraint. The paper develops several classes of valid inequalities for the symmetric version of the problem, as well as a branch-and-cut algorithm. The paper includes a step-by-step description of the algorithm, followed by some implementation details and computational results.

The British Columbia electricity market review : report and recommendations

To the Lieutenant Governor in Council ; British Columbia Utilities Commission. Victoria : British Columbia Utilities Commission, 1995. xii, 106 p. : *ill.*
MICROLOG 96-01641 (2 fiche)

This report presents results of a public review of the electricity industry in British Columbia, with a special focus on the implications of retail wheeling or retail competition. The review included consultations with individuals, interest groups, elected officials, customers, electric utilities, and experts. The report first summarizes the state of the electricity market in the province, including its basic characteristics, generation and transmission capacity, exports, and regulatory framework. It then outlines forces that promote change in the electricity industry, the objectives and concerns of British Columbians regarding such industry issues as economic efficiency, environmental protection, and public versus private ownership. The final sections evaluate three options for change: limited wholesale competition (incremental changes), enhanced wholesale competition (vertical de-integration), and retail competition.

The British Columbia farmed salmon industry : regional economic impacts

Prepared for BC Salmon Farmers Association, Agriculture and Agri-Food Canada, BC Ministry of Agriculture, Fisheries, and Food ; prepared by the ARA Consulting Group Inc. Vancouver, BC : The Group, 1994. 60 p. : *ill., Bibl.*
MICROLOG 96-01615 (1 fiche)

This study has three broad objectives: to develop an operational and financial profile of the salmon farming industry in British Columbia, to estimate industry income and employment impacts, and to document industry constraints to growth. The study approach included a detailed survey of salmon farming companies, addressing production, revenues, employment, and operating and capital expenditures of each operation. This report begins with a review of the development of the salmon farming industry in British Columbia and the regulations that govern the industry. It then reviews key industry functions from the hatchery phase to the selling of the finished product; profiles the industry in terms of size, expenditures, and structure; estimates provincial and regional economic impacts; and assesses the industry outlook and constraints such as land tenure. The appendix contains economic profiles of the province's salmon farming regions and a copy of the industry questionnaire.

British Columbia greenhouse gas action plan : meeting the challenge of climate change

Victoria : Ministry of Energy, Mines & Petroleum Resources ; Ministry of Environment, Lands & Parks, 1995. vi, 49 p. : *ill.* ISBN 0-7726-2723-1
MICROLOG 96-02096 (2 fiche)

British Columbia is committed to the goal of stabilizing provincial greenhouse gas emissions at 1990 levels by the year 2000. This action plan sets out the measures that the province is taking to pursue that goal. It also describes some of the many positive steps being made by industry, communities, and the public. After an introduction on the nature of the greenhouse effect and its potential impacts, this report outlines the plan approach and planning process. It then presents the 53 plan elements in the following categories: provincial leadership, including adoption of appropriate provincial policies and standards; energy conservation and efficiency; transportation; energy supply; forestry and greenhouse gas sinks; agriculture and greenhouse gas sinks; solid waste management; cross-sectoral actions such as support for pollution prevention planning; science, education, and awareness; local government support; and national actions.

British Columbia Permanent Ward Review, region J pilot project, January-December, 1994 : findings report

By Sharon Cunningham, Richard Sullivan and Alison Holmes. Victoria : Ministry of Social Services, 1995. ii, 51 p. ISBN 0-7726-2721-5
MICROLOG 96-01665 (1 fiche)

In 1993, 2,866 of the 6,109 children in legal care of the British Columbia Ministry of Social Services were under permanent wardship. Of those 2,866 children, 34% were aboriginal. The challenges of providing permanent wards with critical aspects of family life, the lack of a regular and formalized review mechanism, and concerns over treatment of youth, notably aboriginals. Accordingly, the Ministry formed a provincial advisory committee to examine the quality of services delivered to permanent wards. The committee conducted its first review as a pilot project in Region J, the northernmost region of the province, where 60% of the permanent wards were of aboriginal origin. This report describes the review process, the characteristics and case histories of the children interviewed, and the findings. The report also summarizes the committee's work in collaborating with Region J aboriginal communities to plan for aboriginal children in permanent care.

Build Green and conventional materials off-gassing tests : a final report

By Peter Piersol. Ottawa : Canada Mortgage & Housing Corporation, 1995. 21 p. : *ill., Bibl.*
MICROLOG 96-01691 (1 fiche)

Build Green is a certification program that will identify and label building products with a known recycled content. The introduction of these recycled materials has raised the concern that they may emit more indoor pollutants than conventional materials. This study addresses that concern by analyzing Build Green and conventional materials to assess their potential for off-gassing. The study involved emission tests of 37 materials including carpets, carpet undercushions, structural lumber, foundation material, insulation, drywall, fiberboard, counter tops, and cabinetry. The results presented in this report include comparisons of Build Green and conventional materials in terms of emissions of volatile organic compounds and formaldehyde, the material loading ratio, and discussion of the specific sources of the emissions.

Canada's fiduciary obligation to Aboriginal peoples in the context of accession to sovereignty by Quebec, vol. 2 : domestic dimensions

By Renée Dupuis and Kent McNeil. Ottawa : Royal Commission on Aboriginal Peoples, 1995. iv, 95 p. : *Bibl. Paper prepared as part of the Research Program of the Royal Commission on Aboriginal Peoples.* ISBN 0-660-15581-8 CCG-P no. Z1-1991/1-41-6-2E
MICROLOG 96-01905 (2 fiche)

This paper analyzes the Canadian Crown's fiduciary obligations from the perspective of domestic law in the context of accession to sovereignty by Quebec. The first part of the paper focuses on the sources of the Crown's fiduciary obligations to Canada's Aboriginal peoples (in particular, to those in Quebec) under current constitutional arrangements. The second part discusses the nature of those obligations, concentrating on an analysis of the obligations with respect to the right of Aboriginal self-government and Aboriginal land rights. The final part examines the scope of the fiduciary obligations based on a number of assumptions about an accession to sovereignty by Quebec: first, in the context of a provincial referendum on sovereignty; second, if the governments of Canada and Quebec agreed to negotiate sovereignty for Quebec; and finally, under a unilateral declaration of independence by Quebec.

The Canadian experience with weighted monetary aggregates

By David Longworth and Joseph Atta-Mensah. Ottawa : Bank of Canada, 1995. iv, 65 p. : *ill., Bibl.* (Working paper / Bank of Canada ; 95-10
ISSN 1192-5434) ISBN 0-662-23910-5
MICROLOG 96-02022 (1 fiche)

This paper compares the empirical performance of Canadian weighted monetary aggregates (in particular, Fisher ideal aggregates) with the current summation aggregates, for their information content and forecasting performance in terms of prices, real output, and nominal spending for the period 1971-89. The paper also examines the properties of money-demand equations for these aggregates, particularly their temporal stability. The major aggregates considered are M1, M2, M3, M2+, and their Fisher ideal counterparts; also considered are M3+ (which adds near-bank deposits to M3) and two liquidity aggregates, as well as their Fisher ideal counterparts. The paper makes its comparisons on the basis of the in-sample fit of indicator models, the out-of-sample forecasts by indicator models, the specification of money-demand functions, and the temporal stability of money-demand functions.

Canadian fish and seafood exporters sourcing guide, 1995-96

Ottawa : Dept. of Foreign Affairs & International Trade ; Agriculture & Agri-Food Canada, 1995. vi, 113 p. : *ill. French ed. (Répertoire des exportateurs canadiens...) : 96-01985/2.*
MICROLOG 96-01984 (2 fiche)

Canada is the one of the world's largest fish exporters. Canada's competitive strength in fish products reflects its access to one of the world's richest and most diversified resource bases despite temporary shortages of some species and industry's emphasis on high-quality, safe and nutritious products guaranteed by Canada's inspection system. This document is a list of Canadian fish and seafood exporters. Companies are listed by province/territory. Trade associations, a product list, by fish species, and a company index are provided as well.

Cassiar Timber Supply Area : rationale for AAC determination, effective January 1, 1996

By Larry Pedersen. Victoria : Ministry of Forests, 1995. 56 p.
MICROLOG 96-01646 (1 fiche)

The Cassiar Timber Supply Area (TSA), located in the northwest corner of British Columbia, is the province's largest TSA at over 13.4 million hectares. Under 3.7 million hectares of the TSA are forested, and there are only about 400,000 hectares that contribute to the timber harvesting land base. After a brief description of the TSA, this report reviews the principles for determining the allowable annual cut for the TSA and presents an accounting of the factors and the rationale used in making that determination. These factors include the role of the base-case timber supply forecast, the land base that contributes to the timber harvest, the existing forest inventory and its expected rate of growth, regeneration delay, silvicultural systems, integrated resource management objectives, decay and waste, and alternative harvest flows. The appendix includes relevant sections of the provincial forestry legislation and a summary of public input to the Cassiar TSA Timber Supply Review.

CEPA review, the government response : environmental protection legislation designed for the future, a renewed CEPA : a proposal

Canada. Ottawa : Environment Canada, 1995. 82 p. *Response to the recommendations of the Standing Committee on Environment and Sustainable Development outlined in its fifth report It's about our health! Towards pollution prevention, CEPA revisited.* ISBN 0-662-23913-X CCG-P no. En21-141/1995e
MICROLOG 96-01906 (1 fiche)

The Canadian Environmental Protection Act (CEPA) was proclaimed in force in 1988, with the provision that there would be a review of its adequacy within five years. A House of Commons committee undertook such a review in 1994 and tabled its report in 1995. This document is the government response to that report. The introduction sets out the context in which a renewed CEPA is being proposed, and discusses the need for a cooperative approach and the importance of integrating environmental considerations into economic decision-making. The second part summarizes each chapter of the government response, and the third part sets out specific proposals for each chapter along with a brief explanation of the problems these proposals are addressing. There is also reference to current arrangements with other jurisdictions and stakeholders for managing these problems as well as the benefits to the public, government partners, and stakeholders of proceeding as proposed.

A Challenge for health : making connections within the family violence context

By Irene McCullough. Ottawa : Health Canada, Health Programs & Services Branch, Health Services Directorate, Mental Health Division, 1992. 19 p. : *Bibl.* (Discussion papers on health/family violence issues / Canada. Health Canada ; 1) ISBN 0-662-21436-6 CCG-P no. H39-292/1-1994E
MICROLOG 96-02071 (1 fiche)

The family violence field has developed through emphasis in such separate areas as child abuse and wife abuse, requiring specific strategies across discipline and service sectors such as health, law enforcement, and social service. As understanding of the multi-faceted nature of family violence has grown, there is an increasing need to work together across disciplines and within communities. This paper attempts to provide an overview of common themes and the interrelationship of family violence issues, with the intent to provide a context for resource initiatives and to enhance exchange and collaboration opportunities. The first part explores the basis for connections, discussion family violence as a health concern and the common ground for different forms of abuse and for different practice settings. The second part identifies barriers to connections and the third part discusses areas where resources indicate connections can and need to be made.

Characterization of the indoor environment industries

Submitted to Industry Canada, Environmental Industries Directorate...et al. ; submitted by Cullbridge Marketing and Communications. Ottawa : The Company, 1994. iii, 96 p. : *ill.*
MICROLOG 96-01813 (2 fiche)

This document is an industry characterization report of the Canadian indoor environmental sector. Information for the report was gathered by a questionnaire survey of 900 qualified companies (of which one third responded) and by interviews with 34 companies, 16 industry associations, and 14 government organizations. The report begins with an industry overview, including the types of companies in the industry, factors fuelling the growth of the industry, and barriers to growth. The report then reviews specific sectors of the industry: inspection, monitoring and control equipment and systems; ventilation, air filtration, and related equipment and systems; healthier lighting systems; low-pollution building products, materials, and technologies; and services such as building design, monitoring, and consulting. The appendix includes a list of organizations interviewed and a copy of the study questionnaire.

The Charter of Rights and the redistribution of electoral districts -- Rev.

By Philip Kaye. Toronto : Ontario Legislative Library, Legislative Research Service, 1995. 21 p. : *Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 141 ISSN 0835-0299)
MICROLOG 96-01549 (1 fiche)

The Supreme Court of Canada has ruled that the drawing of provincial electoral boundaries is subject to one of the democratic rights in the Canadian Charter of Rights and Freedoms: the right to vote. This paper discusses questions that arise with respect to electoral boundaries and the context of the democratic theory of representation by population. It reviews a Supreme Court of Canada case ruling on the extent of permissible deviation from the one person/one vote principle; presents comments on representation of rural versus urban voters, on population criteria for ridings, and on approaches to electoral redistribution. The paper then reviews other court decisions in cases involving the constitutionality of provincial boundary redistributions and case law concerning other sections of the Charter. The paper concludes with an outline of possible future court challenges regarding electoral redistributions.

The Combustion and heat transfer characteristics of pipelineable water-bitumen emulsions

By H. Whaley, G.N. Banks and J.K. Wong. Ottawa : Energy Research Laboratories, 1991. iii, 17 p. : *ill., Bibl.* (Report / Energy Research Laboratories (Canada) ; ERL 91-46(OPJ)) *For presentation at the ASME International Joint Power Generation Conference & Exposition.*
MICROLOG 96-01798 (1 fiche)

This report reviews a research program undertaken to compare the combustion and heat transfer characteristics of western Canadian bitumen emulsions with those of heavy fuel oil. The objective of the project was to assess the feasibility of using pipelineable bitumen emulsions as fuels for boilers, as an alternative to breaking and dewatering the pipeline emulsions for refining. The investigators carried out the experimental program in a tunnel furnace, using a burner developed for a coal-water fuel combustion and heat transfer characterization program. Results presented include fuel analyses, furnace operating conditions, heat transfer versus distance from burner, radial temperature profiles, and total and radiative heat flux for the two fuels tested.

Comparative environmental assessment of Lions Gate crossing options related to Stanley Park and First Narrows : air quality

B.H. Levelton & Associates Ltd. Victoria : Ministry of Transportation & Highways, Highway Environment Branch, 1995. iv, 88 p. : *ill., Maps, Bibl. Fold. map not filmed.* ISBN 0-7726-2715-0
MICROLOG 96-01667 (2 fiche)

The British Columbia Ministry of Transportation and Highways has determined that the Lions Gate Bridge needs rehabilitation or replacement in the near future. The Ministry has implemented a broad comparative environmental and socio-economic assessment to aid in developing a short list of crossing alternatives for a more detailed assessment. This volume examines air quality issues associated with the various crossing options, beginning with a study of the baseline conditions in the study area (climatology and meteorology, baseline motor vehicle emissions from the Lions Gate Crossing, and current local air quality data). The subsequent comparative assessment of air quality impacts of the proposed crossings (new bridge, rehabilitated bridge, tunnels) divides the study area into three parts: north end of the crossing, Stanley Park, and Lost Lagoon/Coal Harbour plus the waterfront. Possible mitigative measures are also discussed.

MICROLOG 96-01722 (2 fiche)

The British Columbia Ministry of Transportation and Highways has determined that the Lions Gate Bridge needs rehabilitation or replacement. The purpose of this study is to examine Lions Gate Crossing options that include reconstructing the present bridge, building a new bridge, and a variety of tunnel routes and designs. This report reviews the crossing options and describes baseline socio-economic conditions in the area of the Burrard Inlet affected by the crossing options. Those conditions are discussed in categories related to municipal government, interest groups, recreation and aesthetic values, vehicle users, public transit, marine traffic, tourism, and commercial/industrial activities. The report then evaluates the potential impacts on the above categories from construction and operation of the various options. It also identifies mitigative measures and residual impacts after those measures are applied.

Engineering studies have determined that the Lions Gate Bridge requires extensive rehabilitation or replacement. The British Columbia Ministry of Transportation and Highways is conducting an assessment of the environmental impacts of 20 Lions Gate Crossing options, including a new bridge, rehabilitated bridge, and tunnels. This report presents the findings of an assessment of the impacts of those options on wildlife (birds, mammals, amphibians, and reptiles) in a study area focusing on Stanley Park, First Narrows, Coal Harbour, and a limited part of the North Shore. The report includes an inventory of wildlife resources in the study area, including habitats and species, a description of the assessment methodology, the results of the impact assessment, a review of impact avoidance and mitigation measures, and a comparison of the impacts of the various options.

Compendium of Alberta business waste minimization projects

Willow Root Environmental Ltd. Edmonton : Alberta Environmental Protection, Action on Waste, 1995. 68 p. : *ill.* ISBN 0-7732-1464-X
MICROLOG 96-01978 (1 fiche)

The purpose of this compendium is to describe the planning process and current operations of business waste minimization projects in Alberta selected to represent a range of waste minimization alternatives and business types. The projects cover a range of businesses in terms of size, location, business sector, and degree of success. They include recycling and waste reduction projects in the areas of house construction, food processing, paper products, metal product manufacturing, dairying, and restaurant operation. Information given for each project includes the business background, project history, description of project, project costs, and project results in terms of waste reduction or recycling achieved. The compendium includes an index of projects by industry sector.

Compilation and interpretation of data on contaminant concentrations in Fraser River estuary sediments

By B.E. Anderson. New Westminster, BC : Fraser River Estuary Management Program, Water Quality/Waste Management Committee, 1993. ix, 45 p. : *ill.*, *Maps*, *Bibl.* (Technical report series / Fraser River Estuary Management Program (Canada). Water Quality/Waste Management Committee ; 93-03) ISBN 0-7726-2002-4
MICROLOG 96-02041 (1 fiche)

Data for this compilation of chemical contaminant concentrations in Fraser River estuary sediments were gathered from many sources. The main information source reported is the supportive data submitted to Environment Canada for ocean dumping of dredged sediments, with the secondary source being the Fraser River Harbour Commission report series. The compilation briefly describes the data entry, analysis, and mapping methods used, and compares the results against the British Columbia standards for managing contamination at the Pacific Place site and against Environment Canada's interim screening and rejection limits for ocean dumping. Contaminants studied include polycyclic aromatic hydrocarbons, metals, chlorinated phenols, polychlorinated biphenyls, and dioxins/furans.

A Compilation of U-Pb age data from the Slave Province, Northwest Territories

By M.E. Villeneuve and O. Van Breemen. Ottawa : Natural Resources Canada, Geological Survey of Canada, 1994. 53 p. : *Bibl.* (Open file / Geological Survey of Canada ; 2972)
MICROLOG 96-01939 (1 fiche)

This compilation lists previously published uranium-lead geochronological ages of rocks in the Slave Province, Northwest Territories, as well as a number of ages produced during the last three years under the auspices of the Slave Province NATMAP program. The information is arranged first by increasing latitude, then by increasing longitude. Each date is given under an often informal sample name, as well as a sample number that can be used for cross referencing with publications. Other information includes location (longitude, latitude, Universal Transverse Mercator coordinates, National Topographic System sheet number, and verbal description), the age and its errors (in millions of years), the method used to derive the age, a brief interpretation of the age, a description of the sample, and a bibliographic reference to the published data.

Compte rendu de la conférence internationale de l'OCDE sur Les Femmes et la ville : logement, services et environnement urbain

Ottawa : Société canadienne d'hypothèques et de logement, Division des relations internationales, 1994. 19, 18 p. : *Bibl.* *Bilingue (Report on OECD's international conference...).*
MICROLOG 96-01681 (1 fiche)

Ce document rend compte d'une importante conférence intitulée "Les femmes et la ville : logement, services et environnement urbain", qui s'est tenue au siège de l'Organisation de coopération et de développement économiques, à Paris, du 4 au 6 octobre 1994. La conférence était organisée par le Groupe des affaires urbaines, le comité permanent de l'OCDE qui s'intéresse à la politique de la ville et aux questions urbaines. Cette conférence a été qualifiée de rencontre de haut niveau parce que certaines des délégations nationales présentes étaient dirigées par un ministre. Les conclusions de la conférence permettent d'accélérer les changements au sein de l'OCDE et des administrations municipales en ce qui a trait à leur sensibilisation aux différences selon le sexe dans le domaine des affaires urbaines et à leur contribution à cet égard.

Concrete carbonation in Canadian buildings

Robert Halsall & Associates. Ottawa : Canada Mortgage & Housing Corporation, Research Division, 1993. xii, 116 p. : *ill., Bibl. French ed. (La Carbonatation du béton...) : 96-01639/2.*
MICROLOG 96-01809 (2 fiche)

Carbonation of concrete occurs when atmospheric carbon dioxide reacts with various hydrates within the cement paste to produce calcium carbonates, which consequently reduces the natural alkalinity of concrete. When the carbonation front reaches the level of any steel reinforcement present, it causes the steel to lose its immunity to corrosion and results in deterioration of the concrete. This report presents results of a study that assesses the incidence and impact of carbonation-induced decay in reinforced concrete in highrise residential structures in five Canadian cities. The report estimates the extent of concrete carbonation as well as the impact that carbonation will have on existing building stock. It also notes the factors that control the rate of carbonation, the effectiveness of carbonation measurement methods, and the types of environments in buildings that make concrete particularly susceptible to carbonation.

Corktown Community High School, Toronto, Ontario : Exemplary Schools Project, technical report

By Mary Beattie ; with Margaret Robertson and Suzanne Stiegelbauer. Toronto : Canadian Education Assn, 1995. 162 p. : *Bibl.*
ISBN 0-920315-91-7
MICROLOG 96-01852 (2 fiche) (Available on fiche only)

This case study was completed as part of a national research study of a sample of secondary schools across Canada that had a reputation for success. The study examines five issues: the meaning and recognition of success; the interaction between the school and its context; the influence of structures, processes, and culture of the school in fostering success; the characteristics of student life in the school; and services provided to students at risk of becoming dropouts. This case study describes an alternative high school in the Toronto Board of Education, given the pseudonym of Corktown Community High School. Chapters of the study describe the school's distinctiveness, its origins, administration, policies and practices, student support, and collaboration within the school and with the surrounding community. The appendix contains a description of the methodology used in studying the Corktown school.

Countdown 94 : Campaign 2000 child poverty indicator report

Canadian Council on Social Development. Centre for International Statistics on Economic & Social Welfare for Families & Children. Ottawa : The Centre, 1994. iii, 51 p. : *ill., Bibl.*
MICROLOG 96-01726 (1 fiche)

In this report, Campaign 2000 continues its mission to increase public understanding about the state of child and family poverty in Canada. It hopes to stimulate national and community discussions that will guide social security reform. In this report, social and economic indicators are presented to shed light on the state of poor children & families, governments' performance in assisting poor children & families, & Canada's child & family poverty rates in comparison with other industrialized nations. Chapters discuss measuring poverty, the extent of the problem, child poverty & income equality, consequences (poverty & health, food banks, housing, housing repairs, affordability, poverty & education), the falling labour market (unemployment, working-poor & wages, child care), the safety net (social assistance, government taxes & transfers), international comparisons of poverty, & the elimination of child poverty.

Creosote evaluation project

Prepared by EVS Consultants ; for the Creosote Evaluation Project Steering Committee. New Westminster, BC : Fraser River Estuary Management Program, Water Quality/Waste Management Committee, 1994. ix, 50 p. : *ill., Bibl.* (Technical report series / Fraser River Estuary Management Program (Canada). Water Quality/Waste Management Committee ; 93-13)
ISBN 0-7726-2117-9
MICROLOG 96-02047 (1 fiche)

This report begins with a review of the characteristics and the environmental fate of creosote from wooden pilings in the aquatic environment. It then describes and presents the results of a study conducted to determine concentrations of polycyclic aromatic hydrocarbons (PAH) and the toxicity of sediments from sites potentially impacted by the use of creosote pilings. The sites selected for the study were located in the Fraser River estuary at Westham Island and in Belcarra Bay (Burrard Inlet). Results presented include above-background concentration of PAH in sediment by distance from piling and the toxicity of sediments to amphipods. The report ends with recommendations for further research into the effects of creosote pilings on fish

SCC 11F0019MPF
MICROLOG 96-01875 (1 fiche)

il a mouvement lorsque des entreprises gagnent et perdent des parts de marchés dans le cadre de la lutte concurrentielle. La réaffectation des parts de marché d'un groupe à un autre est associée à un gain de productivité puisque les entreprises moins productives perdent des parts et que celles dont la productivité est supérieure en gagnent. Ce document examine la mesure dans laquelle la productivité s'est trouvée améliorée par le mouvement des entreprises depuis les 20 dernières années. Il s'intéresse particulièrement à la mesure dans laquelle ce processus a évolué durant les années 1980 et contribué, de fait, au ralentissement du secteur de la fabrication.

Débouchés commerciaux au Chili : le marché du matériel et des services miniers

Préparé par: Tim Steed ; en collaboration avec Gonzalo Munoz. Santiago, Chile : Ambassade du Canada, 1995. ii, 63 p. : *ill. L'éd. anglaise (Opportunities in Chile...) : 96-01991/1.*
MICROLOG 96-02004 (1 fiche)

La forte croissance économique du Chili découle d'un engagement ferme de ce pays à ouvrir son marché. On s'attend à ce que l'économie chilienne progresse de 5,8 % en 1995 et connaisse ainsi une douzième année consécutive de croissance. L'économie chilienne repose en grande partie sur le secteur minier. Celui-ci représentait 8,7 % du PIB en 1994, par rapport à 7,8 % l'année précédente, et plus de 4 milliards de dollars US en exportations. Ce document fait la lumière sur les débouchés commerciaux au Chili. Les points qui y sont examinés sont les suivants : l'exploitation minière au Chili; le marché du matériel minier; l'importance des importations; la clientèle; les débouchés commerciaux; les méthodes d'accès au marché; l'encadrement réglementaire; et, les adresses utiles.

Debt management progress report, 1994-95

Victoria : Ministry of Finance & Corporate Relations, 1995. 40 p. : *ill.*
MICROLOG 96-02021 (1 fiche)

This report provides complete information on British Columbia's provincial debt. The province established a debt management plan to maintain the financial strength of BC by controlling public debt. The plan aims to maintain BC's credit rating, eliminate direct debt, reduce taxpayer-supported debt, & set a ceiling for debt service costs. In this document the Auditor General's report is followed by the provincial debt report & then an overview of the debt (financing process, historical summary, debt by category, debt management plan, debt indicators). Management discussion & analysis of debt management operations are followed by appendices which include a schedule of debt maturities, & a summary of outstanding debt issues.

Decentralization : an option for the people

Quebec : Gouvernement du Québec, Ministère du Conseil exécutif, 1995. 95 p. *French ed. (Décentralisation: un choix de société) : 95-08062/2.*
ISBN 2-550-24788-4
MICROLOG 96-01756 (2 fiche)

This discussion paper begins with a review of the attitudes toward decentralization as revealed in provincial and national commissions and in public surveys. It also provides an overview of decentralization initiatives in Quebec, including provincial and municipal activities, intermunicipal cooperation, regional council activities, and school board initiatives. Comparisons are made to decentralization in other countries. The paper then discusses decentralization issues relevant to Quebec society, both in their general context, in relation to public finance and to aboriginal communities, and in the framework of a sovereign Quebec. The final two sections of the paper assess the political, financial, and fiscal limits of provincial status for a major decentralization, and proposes a framework for implementation of a new decentralization pact in a sovereign Quebec.

A Declarative specification of path-based reasoning

By Carl Vogel, Fred Popowich and Nick Cercone. Burnaby, BC : Simon Fraser University, Centre for Systems Science ; Laboratory for Computer & Communications Research, 1992. ii, 22 p. : *ill., Bibl.* (Technical report / Simon Fraser University. Centre for Systems Science and Laboratory for Computer & Communications Research (B.C.) ; CSS/LCCR TR92-03)
MICROLOG 96-02056 (1 fiche) (Available on fiche only)

Inheritance networks are used to provide potentially complicated classifications of individuals or classes which are not confounded by exceptions. This paper begins by introducing a declarative specification for a popular upward path-based inheritance reasoner (the H90 reasoner). It then shows how to provide a more transparent translation into a Prolog implementation than that provided by adopting the network notation used for H90; this indicates how simple changes to the specification can result in different path-based reasoners. The paper presents modifications that provide fully skeptical reasoning and downwards reasoning, along with corresponding modifications to the Prolog specification. In the process, the paper provides a better understanding of the fundamental differences between some of the more popular path-based inheritance reasoners.

Defoliator management guidebook

Victoria : BC Environment ; British Columbia Forest Service, 1995. viii, 72 p. : *ill., Maps, Bibl. At head of title: Forest Practices Code of British Columbia.* ISBN 0-7726-2598-0
MICROLOG 96-01654 (1 fiche)

This guidebook is designed to provide a background to defoliator management and specific practices for managing the Douglas-fir tussock moth, western spruce budworm, western hemlock looper, eastern spruce budworm, and western blackheaded budworm in British Columbia. It describes the life stages of these defoliator species and indicates their distribution in the province, outlines management principles for defoliators, and presents procedures for detection (aerial surveys or ground observation) and sampling (predictive sampling and population sampling). The final section covers management strategies and treatment options for the five species, providing information on their population dynamics, sampling and monitoring techniques, and control strategies for both the short and long term. Includes glossary.

Denmark, Sweden, Norway, and Finland, a contact guide for the Canadian music industry

Ottawa : Dept. of Canadian Heritage ; Industry Canada ; Dept. of Foreign Affairs & International Trade, 1995. 84 p. *On cover: Canada-Europe.*
MICROLOG 96-01838 (1 fiche)

The purpose of this guide is to assist independent music labels and managers in the areas of niche marketing in the Scandinavian marketplace. It introduces some basic facts about Denmark, Sweden, Norway, and Finland and their music industries, then provides chapters on publicity and print media, radio stations, distributors, retailers, publishers, record labels, agents and promoters, festivals, and television and video industries. Most of these sections give information on individual companies or enterprises, including name and address, name of contact person, phone/fax numbers, company profile, Canadian connection if any, and (where applicable) information on distribution and/or contracts.

A Description of the social assistance system in Hamilton-Wentworth, 1995

By Kelly McCormick and Susan West. Hamilton, ON : Social Planning & Research Council of Hamilton & District, 1995. i, 106 p. : *ill.*, *Bibl.*
MICROLOG 96-01680 (2 fiche)

The purpose of this report is to make available basic information about the various social assistance programs and to evaluate whether the programs allow the opportunity to attain an acceptable standard of living. The report outlines the basic goals of an effective social assistance system and reviews the social assistance system in Hamilton-Wentworth, focusing on general welfare assistance, family benefits assistance, and the guaranteed annual income supplement for the aged. It then examines the Hamilton-Wentworth social assistance system against the goals of adequacy, accessibility, and equity; identifies barriers that may hinder the achievement of those goals; and describes some support programs. The appendices include background material on social assistance.

Detection of BW agents : Dugway trinational BW field trial, 20-30 October 1993, Dugway, Utah : mobile aerosol sampling unit data analysis

By J. Ho, M. Spence and G.R. Fisher. Medicine Hat, AB : National Defence, Defence Research Establishment Suffield, 1995. ii, 28 p. : *ill.*, *Bibl.* (Suffield report / Defence Research Establishment Suffield ; no. 619)
MICROLOG 96-01677 (1 fiche)

Canada took part in a joint United States-United Kingdom field trial to determine the effectiveness of current technologies in measuring and detecting biological aerosols. In the trials, an aerosol of biological warfare simulant was generated as a point source 800 meters from sampling system, and propylene gas was concurrently disseminated as a tracer. Environmental data were also logged to assist analysis of cloud dynamics. This paper analyzes and discusses data generated at these trials by the Canadian mobile aerosol sampling unit, including data on viable spores measured by the unit's dichotomous sampler, the propylene tracer data in comparison with aerodynamic particle sizer (APS) measurements, APS data expressed as number and mass concentrations, number concentration APS data in comparison with viable spore data, and time series of aerosol particle characteristics.

Development of forest renewal standards for forest regeneration in Manitoba

By Jeffrey R. Delaney. Winnipeg : Forestry Branch, 1995. vi, 43 p. : *ill.*, *Bibl.*
MICROLOG 96-02066 (1 fiche)

This document presents the rationale for the development of forest renewal standards in Manitoba to replace interim stocking standards in effect since 1989. It includes sections covering information requirements for forest regeneration surveys, forest management intent, species selection, plot size selection, identification of acceptable seedlings for stocking, determination of stocking targets according to such factors as regeneration period and hardwood or softwood survival, and definition of the standards. Three categories of standards have been developed for different sites: naturally regenerating softwood and mixedwood sites, planted sites, and naturally regenerated mixedwood and hardwood sites. The document ends with sections on forest description and the development of free-to-grow standards.

Diamond exploration techniques, emphasising indicator mineral geochemistry and Canadian examples

By C.E. Fipke, J.J. Gurney and R.O. Moore. Ottawa : Natural Resources Canada, Geological Survey of Canada, 1995. 86 p. : *ill.*, *Maps*, *Bibl.* (Bulletin / Geological Survey of Canada ; 423)
ISBN 0-660-16203-2 CCG-P no. M42-423E
MICROLOG 96-01620 (1 fiche)

The Canadian Shield and adjacent areas underlain by cratonic rocks are a highly prospective geologic environment for diamonds. This volume reviews the genesis of diamonds and the petrology of kimberlites and lamproites, the major diamond-bearing rock types. It then describes diamond exploration techniques, focusing on the use of indicator minerals as a means of identifying prospective areas. Topics covered include major-element geochemistry of indicator minerals, eclogitic paragenesis, and trace element techniques. The volume also discusses the indicator mineral geochemistry results from a study of 18 localities around the world. In addition, since conventional indicator mineral techniques are not always applicable to lamproite exploration, alternative pathfinder minerals are reviewed.

Differential impact and the Alberta advantage : a discussion paper

By Donna Kerr. Edmonton : Alberta Advisory Council on Women's Issues, 1995. 57 p. : *Bibl.*
ISBN 0-7732-1885-8
MICROLOG 96-01976 (1 fiche)

The recent cuts and changes in Alberta government programs have affected women differently than men. This paper examines this differential impact in the areas of health, social assistance, education, and government restructuring, as well as the differential impact of the creation of 110,000 new jobs in the province as predicted for 1993-97. The paper measures the differential impact by a gender analysis that tests the assumption of gender neutrality in the marketplace. It includes statistics on male/female differences in educational levels, income, occupational participation, property ownership, provision of unpaid work, violent crimes, representation in decision-making bodies, and employment in various categories of industries. The paper includes recommendations to the Alberta government for addressing the differential impact problem.

Disaster financial assistance policy

Fredericton : Dept. of Municipalities, Culture & Housing, Corporate Planning Branch ; Emergency Measures Organization, 1993. i, 30, i, 32 p. *Bilingual (Politique sur l'aide financière...).*
MICROLOG 96-01623 (1 fiche)

In December of 1991, Cabinet discussed the need to have a policy that would provide equitable practices for the payment of financial assistance to victims whose livelihoods are seriously affected by severe storms or floods. As the province has provided assistance to many victims in the past on an ad hoc basis, it was decided that a formal process should be developed which would deal with all cases in an equitable manner. This policy should eliminate the lack of consistency that has existed in dealing with requests for financial assistance to help victims cover some of the cost of damages resulting from a disaster.

Disentanglement as a resolution to the federal-provincial fiscal imbalance : an analysis of different disentanglement options : a paper

By Michael Butler. Victoria : Ministry of Finance & Corporate Relations, 1993. 18 p. : *ill., Bibl. Delivered at the Conference on the Future of Fiscal Arrangements in Canada.*
MICROLOG 96-01671 (1 fiche)

This paper analyzes the different options for resolving the current imbalance between the costs of the programming that the provinces are responsible for and the revenue sources (including federal transfers) available to them. If the federal government's policy of cutting back on its transfer obligations is not altered, some form of disentanglement will be needed: program disentanglement, which would assign responsibility for funding each expenditure area to a single level of government; or revenue disentanglement, which would transfer tax room to the provinces in exchange for the elimination of transfer programs. The paper examines the fiscal implications of both options as well as their political and technical feasibility, and discusses the effect of tax transfer disentanglement on inter-regional redistribution.

Dissolution models for glassy waste forms

By K.B. Harvey. Pinawa, MB : Whiteshell Laboratories, 1995. 100 p. : *ill., Bibl.* (AECL research / Atomic Energy of Canada Ltd. ; AECL-10738
ISSN 0067-0367) ISBN 0-660-16189-3 CCG-P no. CC2-10738E
MICROLOG 96-01479 (2 fiche)

Silicate-based glasses have been adopted as the preferred medium for immobilizing nuclear wastes in many countries. As part of the Canadian Nuclear Fuel Waste Management Program, a suite of models has been developed that describe the dissolution of glass under various conditions. This report describes dissolution models developed for two types of glass composition: simple sodium borosilicate glasses containing a fission product oxide loading not exceeding 1% by weight of the glass waste form, and more complex glasses containing substantial quantities of iron, aluminum, and manganese oxides, plus about 6% by weight of fission product oxides. The report also compares these models with a number of glass dissolution models developed by other researchers, and discusses the integration of glass waste form data into models that describe the release of radionuclides from an underground waste repository.

The Duration of unemployment : a user guide

By Miles Corak and Andrew Heisz. Ottawa : Statistics Canada, Analytical Studies Branch, 1995. 21 p. : *ill., Bibl.* (Research paper series / Statistics Canada. Analytical Studies Branch ; no. 84)
ISSN 1200-5223 ISBN 0-660-15586-9
SCC 11F0019MPE
MICROLOG 96-01878 (1 fiche)

The objective of this paper is to introduce a new measure of the average duration of unemployment spells using Canadian data. The paper summarizes previous work on the average complete duration of unemployment in a non-technical manner by focusing on the distinction between it and the average incomplete duration of unemployment, which is regularly released by Statistics Canada. The paper notes that the latter is a lagging cyclical indicator, and compares the accuracy of the average complete duration of unemployment as an indicator of prevailing labor market conditions. The paper also examines some assumptions required in the derivation of that indicator, and outlines the appropriate uses and limitations of each indicator.

The Economics of Canada Pension Plan reforms

Steven James...et al. Ottawa : Dept. of Finance, Fiscal Policy & Economic Analysis Branch, Economic Studies & Policy Analysis Division, 1995. ix, 47 p. : *ill., Bibl.* (Working paper / Canada. Fiscal Policy & Economic Analysis Branch. Economic Studies & Policy Analysis Division ; 95-09)
MICROLOG 96-01622 (1 fiche)

Years of underfunding as well as impending demographic change mean that the Canada Pension Plan will have to face some large increases in contribution rates. This has prompted suggestions for a major overhaul in the Plan's financing mechanism. This paper explores the economic implications of such a reform, or more specifically, the economic benefits of moving the Plan to fuller funding. The paper reviews the changing economics of the current pay-as-you-go financing mechanism and then compares the effects of alternative funding arrangements on saving, investment, the capital stock, output, and income.

Fo29-42/9-1995E
MICROLOG 96-01557 (1 fiche)

The purpose of the research reported in this paper was to develop a site-characteristic model that could be used to generate strategies to educate ecotourists about forest management techniques and the natural life of a forest. The research required two phases of work. The first involved an identification and assessment of the natural history of potential educational sites along the Deer Trail at Elliot Lake. The second phase determined important site characteristics as defined by a survey of 750 potential tourists. Based on the survey and natural history assessment, five major categories of site characteristics were identified, and subcategories were delineated for each of these major categories. This model was then used to rate six potential sites for future ecotourism development.

Ecotoxicology of depositional sediments, Athabasca River, May and September, 1993

By Kristin E. Day and Trefor B. Reynoldson. Edmonton : Northern River Basins Study, 1995. v, 48 p. : *ill., Bibl.* (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 59 ISSN 1192-3571)
ISBN 0-662-23562-2 CCG-P no. R71-49/3-59E
MICROLOG 96-02037 (1 fiche)

This report describes and presents results from a project designed to test the toxicity of depositional sediments from the upper Athabasca River using freshwater benthic invertebrates in chronic exposure studies under laboratory conditions. The investigators performed additional analyses on the in-situ benthic invertebrate community structure to describe species distribution and abundance. The report includes description of the methods used to collect sediments and benthic invertebrates from depositional areas upstream and downstream from Hinton, the laboratory toxicity testing procedures, and the processing of samples for invertebrate analysis. The appendices include raw data, diversity indices, and summaries of total invertebrate counts.

Education indicators, 1994

Quebec : Ministère de l'éducation, Direction générale des ressources informationnelles, 1995. 108 p. : *ill. French ed. (Indicateurs de l'éducation...) : 96-01754/3.* ISBN 2-550-09678-9
MICROLOG 96-01755 (3 fiche)

This publication deals with all levels of education, from kindergarten to university. The purpose of publishing indicators is to keep Québec society abreast of major trends and developments in the education system. The indicators are presented under a series of headings classifying recent and historical data that help trace these developments over recent years. It also serves to shed light on some of the current problems in the field of education in Québec. Information on schooling and enrollments, student flows and graduation, an evaluation of learning, graduation, and the future of graduates are included.

Effect on signal to noise ratio of clipping Arctic acoustic data

By P. Zakarauskas, C.A. Hamm and J.M. Thorleifson. Victoria : Dept. of National Defence, Research & Development Branch, Defence Research Establishment Pacific, 1990. ii, 10 p. : *Bibl.* (Technical memorandum ; 90-17)
MICROLOG 96-01818 (1 fiche)

Arctic underwater ambient noise in winter and spring is characterized by the presence of transients due to ice cracking events. This report presents the results of an investigation into the effect on signal to noise ratio (SNR) of clipping ambient noise time series to which artificial sinusoid signals had been added. The intention of the investigation was to examine whether noise due to transients can be selectively removed to provide an improved SNR. The report describes the technique used to determine the clipping threshold and then examines the effects of clipping for three different noise samples, both with and without prefiltering.

The Effects of shell wall thickness and number of slots on the performance of the merchant slotted-shell flextensional projector

By Dennis F. Jones and David J. Lewis. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995. iv, 16 p. : *ill., Bibl.* (DREA technical memorandum / Defence Research Establishment Atlantic ; 95/203)
MICROLOG 96-01801 (1 fiche)

Slotted-shell flextensional projectors can be designed to resonate below 2 kilohertz and still be compact and lightweight. Such projectors are therefore of interest to researchers working in the field of low-frequency sonar transducers. This report describes investigations on eleven Merchant slotted-shell flextensional projectors that examined the effects of shell wall thickness and number of slots on the in-water performance parameters of this type of transducer. The investigators determined resonance frequency, transmitting voltage response, source level, and mechanical quality factor for numbers of slots ranging from 4 to 15 and for wall thicknesses of 2.0 to 4.5 millimeters. The paper includes empirical fits that can be used to estimate transmitting voltage response and mechanical quality factor once a design frequency has been selected.

Efficient routing of service vehicles

By Michel Gendreau, Gilbert Laporte and Sylvain Y. Yelle. Montreal : Université de Montréal, Centre de recherche sur les transports, 1995. ii, 8 p. : *ill., Bibl.* (Publication / Université de Montréal. Centre de recherche sur les transports ; no. 95-82) (Publication / Université de Montréal. Département d'informatique et de recherche opérationnelle ; no. 1010)
MICROLOG 96-01992 (1 fiche)

GeoRoute is an arc routing software package that includes a route optimization module based on the GENIUS traveling salesman problem heuristic. The territory under study is represented by a directed graph in which arcs correspond to streets. The system also introduces artificial arcs to account for street crossings, street changes, and turns. In many applications of the package, penalties should be assigned to take into account such constraints as prohibited turns and minimization of deadheading. This report describes experiments performed using GeoRoute to determine optimal routes for garbage collection and for snow plowing operations on 30 street networks. The experiments tested various values of penalties in order to arrive at convenient packages of penalties for use in various situations. The results help GeoRoute users select sets of penalties without having to ponder a large set of possible parameters.

Estimating the lifetimes of titanium containers for nuclear fuel waste : a damage function for the crevice corrosion of grade-2 titanium

By D.W. Shoesmith...et al. Pinawa, MB : AECL, Whiteshell Laboratories, 1995. 29 p. : *ill., Bibl.* (AECL research / Atomic Energy of Canada Ltd. ; AECL-11255 ISSN 0067-0367)
ISBN 0-660-16079-X CCG-P no. CC2-11255E
MICROLOG 96-01716 (1 fiche)

A key component of the Canadian concept for disposal of used nuclear fuel waste deep in plutonic rock is the use of a metal container for the waste. This report re-evaluates the model currently used in the postclosure assessment case study of this concept. The model assumes that crevice corrosion of the titanium container, initiated when the container is emplaced in the burial vault, will propagate indefinitely to failure without the occurrence of repassivation. The report develops a modified version of the container lifetime model which avoids the need to use averaged temperature profiles. In this model, these profiles are converted to propagation rate profiles and then integrated to predict container failure times. A damage function is also developed and used to estimate the maximum penetration depth and to determine the impact on container lifetimes of various repassivation criteria. The report summarizes factors likely to cause repassivation and suggests approaches for extending container lifetimes.

Étude de cas, École secondaire Népisiguit : Étude sur les écoles exemplaires, étude de cas

Par Jean-Guy Ouellette et Diane LeBreton Forbes. Toronto : Assn canadienne d'éducation, 1995. xv, 152 p. : *ill., Bibl.* ISBN 0-920315-96-8
MICROLOG 96-01866 (2 fiche) (Available on fiche only)

L'étude avait pour but de repérer dans différentes régions du pays des méthodes pédagogiques qui réussissent afin de pouvoir en tirer des orientations pédagogiques. Elle a ciblé des écoles secondaires réputées pour leur succès et visait cinq objectifs, soit de comprendre : la signification du succès et la reconnaissance qu'on lui accorde; l'interaction entre l'école et son milieu; l'influence des structures, des processus et de la culture scolaires dans l'éclosion du succès; les caractéristiques de la vie des élèves à l'école; et, les services offerts aux élèves susceptibles de décrocher. Vingt et une écoles ont été choisies parmi quelque 260 candidatures. Elles ont été jugées exemplaires non pas parce qu'elles sont à tel point supérieures qu'il faille les imiter sans réserve mais parce qu'elles reflètent assez bien la diversité qu'on retrouve parmi les écoles secondaires canadiennes, les tensions et les problèmes auxquelles elles font face, et les façons novatrices qu'elles trouvent pour venir à bout de leurs difficultés.

Étude sur les gradients de pression moyenne, les pressions moyennes des cavités et les pressions moyennes résiduelles exercées sur les écrans pare-pluie d'un bâtiment représentatif

Par P.F. Skerlj et D. Surry. Ottawa : Société canadienne d'hypothèques et de logement, 1994. 68 p. : *ill., Bibl. L'éd. anglaise (A Study of mean pressure gradients...) : 95-07841/1.*
MICROLOG 96-01807 (1 fiche)

Un mur-écran pare-pluie où la pression est équilibrée comprend en fait deux murs, l'un extérieur et l'autre intérieur, les deux étant séparés par un espace rempli d'air. Le mur intérieur remplit plusieurs rôles, l'un d'entre eux étant d'agir comme pare-air empêchant le mouvement de l'air entre l'extérieur et l'intérieur du bâtiment. L'écran pare-pluie est muni de petites ouvertures protégées donnant sur l'extérieur pour équilibrer la pression des deux côtés. Grâce à cette conception, la suppression de la différence de pression due au vent, empêche la pluie de pénétrer. Ce rapport, qui fournit d'abord une description détaillée du module de pression et des procédures expérimentales, est suivi d'une discussion des résultats.

Évaluation de l'exposition au mercure et des risques dus aux amalgames dentaires : rapport final

Par G. Mark Richardson. Ottawa : Santé Canada, Direction de l'hygiène du milieu, Bureau des matériaux médicaux, 1995. xii, 140 p. : *ill., Bibl. L'éd. anglaise (Assessment of mercury exposure...) : 96-01994/2.*
MICROLOG 96-01993 (2 fiche)

La question de l'innocuité des amalgames dentaires fait l'objet de controverses depuis qu'on a commencé à les utiliser à cause du mercure qu'ils contiennent. Elle a donné lieu à des débats importants dès la mise au point des amalgames, de nouveau au cours des années 1920 et 1930 et, plus récemment, depuis les années 1980. Les objectifs de ce document sont les suivants : quantifier l'exposition au mercure contenu dans les amalgames dentaires ainsi que les sources d'exposition hors des lieux de travail en ce qui a trait à la population canadienne; évaluer le risque posé par l'exposition aux vapeurs de mercure et déterminer le seuil d'exposition qui devrait être tolérable pour la majorité de la population; quantifier le plus exactement possible la proportion des Canadiens chez qui le seuil d'exposition "tolérable" au mercure risque d'être dépassé à cause des amalgames dentaires; et, déterminer le nombre de dents obturées en-deçà duquel la dose journalière admissible de vapeurs de Hg ne sera pas dépassée.

MICROLOG 96-01847 (1 fiche) (Available on fiche only)

Ce document passe en revue les conclusions du rapport de 1978 et se penche sur l'état actuel des évaluations du rendement scolaire au niveau secondaire. Il examine l'importance accordée de nos jours aux normes et à la transparence, et fait le survol des directives, des programmes et des initiatives des différents ministères de l'Éducation et d'un échantillon choisi de conseils et commissions scolaires. Plus précisément, il aborde les points suivants : l'évaluation scolaire au Canada; la méthodologie; le rôle des ministères dans l'évaluation des élèves; le rôle des conseils scolaires dans l'évaluation des élèves; les bourses d'études et évaluation des élèves; les meilleurs méthodes d'évaluation au niveau secondaire; et, perspectives d'avenir.

Évaluation du marché du gaz naturel : convergence des prix dans les marchés Nord-américains du gaz naturel

Calgary, AB : Office national de l'énergie, 1995. 46 p. : *ill., Bibl. L'éd. anglaise (Natural gas market assessment...) : 96-02006/1.* ISBN 0-662-80721-9
GCC-E no NE23-53/1995F
MICROLOG 96-02020 (1 fiche)

Lorsqu'il accorde des autorisations d'exporter du gaz naturel, l'Office national de l'énergie se conforme à la partie VI de la Loi sur l'Office national de l'énergie, qui prescrit qu'on tienne compte de toutes les considérations qui paraissent pertinentes. L'ONÉ veille en particulier à ce que la quantité de gaz à exporter ne dépasse pas l'excédent après déduction des besoins d'utilisation raisonnablement prévisibles au Canada, eu égard, dans le cas d'une demande d'exportation de gaz, aux tendances relevées dans la découverte de gaz au Canada. Ce rapport vise à évaluer le degré d'intégration des marchés canadiens et américains du gaz naturel depuis la déréglementation, grâce à l'analyse statistique de la fluctuation des prix sur

les marchés canadiens et américains du gaz naturel.

Évaluation du programme Éduc-Action

[par] Diane Gérin-Lajoie et José Lopes ; préparé pour la Direction de l'enseignment postsecondaire en langue française, Ministère de l'éducation et de la formation. Toronto : Institut d'études pédagogiques de l'Ontario, Centre de recherches en éducation franco-ontarienne, 1993. 76 p. (Projet IEPO / Institut d'études pédagogiques de l'Ontario ; 82-0165) ONTERIS ON07470
MICROLOG 96-01604 (1 fiche)

Le rapport présente les objectifs de l'évaluation du programme Éduc-Action par le Centre de recherches en éducation franco-ontarienne. Il vise à vérifier dans quelle mesure les projects des cinq dernières années avaient atteint les objectifs du programme Éduc-Action (promouvoir la participation des franco-ontariens à l'enseignement postsecondaire en français); mesurer les retombées des activités du programme auprès des établissements ayant réalisé ces projets; et analyser la structure d'allocation des projets. L'étude se divise en quatre volets: l'historique du programme, la méthodologie utilisée pour recueillir les données, l'analyse des données, et les recommandations découlant de l'analyse. questionnaires pour les établissements et les collaborateurs.

Evaluation of indoor air pollutant movement and control measures

By Greg J. Schoenau and Ray P. Sieber. Regina : Saskatchewan Municipal Government, Housing Division, 1992. xiv, 95 p. : *ill., Bibl. On cover: MPI housing, methods, products & ideas for better housing.*
MICROLOG 96-01759 (2 fiche)

This report presents results from a study conducted to monitor air contaminant movement and distribution within a house from a number of source locations. Included in the investigation was an assessment of the effect of forced air circulation due to furnace fan operation on the distribution of airborne contaminants in a space. The researchers also examined the influence of environmental factors such as wind and temperature on air contaminant concentrations and the effectiveness of various ventilation strategies for reducing airborne contaminant concentrations. The study method involved injecting tracer gas at known rates and locations, and monitoring the gas at multiple locations using an automated microcomputer-based data acquisition system. Flow visualization techniques provided qualitative assessment of behavior of air flow patterns. The appendix includes a description of the monitoring system operation and sample calculations.

Evaluation of the clean-up of lead paint dust in houses

Pinchin Environmental Consultants Ltd. Ottawa : Canada Mortgage & Housing Corporation, Research Division, 1995. vi, 29 p. : *ill., Bibl.*
MICROLOG 96-01812 (1 fiche)

Renovation projects in older houses may disturb and release lead from lead-based paint, which will require effective cleanup. This report evaluates the effectiveness of four cleaning methods used for the cleanup of lead paint dust from floors. The investigators conducted field trials in 20 test rooms in nine houses where the presence of lead in paint was determined on-site by x-ray fluorescence measurement and by laboratory chemical analysis. The rooms were isolated and power sanded to create airborne dust containing lead paint. The four cleanup methods were: dry sweeping plus vacuuming; vacuuming plus mopping with a commercial household cleaner; vacuuming, mopping with a commercial lead-cleaning product, and rinsing; and vacuuming with a high efficiency particulate air filtered vacuum, mopping with trisodium phosphate cleaner, rinsing, and vacuuming again. The report also discloses airborne lead measurements during sweeping and sanding.

The Evolution of member conflict in housing co-operatives

By Mike Balkwill and Janet Fishlock. Ottawa : Canada Mortgage & Housing Corporation, 1993. vi, 80 p. : *Bibl.*
MICROLOG 96-01737 (2 fiche)

This study examines identifiable patterns to the evolution of conflict in nonprofit community-based organizations, of which housing co-ops are an example, and considers the causes which might account for these patterns. The premise that there exist structural circumstances and developmental patterns of organizations which place people in inevitable situations of conflict was tested in three housing co-ops using a participatory group assessment exercise. The authors propose a new paradigm and framework for understanding the evolution of conflict in housing co-ops. This framework places the conflict cycle of co-ops within the larger developmental process of communities as they move from young, idealistic bodies to become mature, interdependent groups. The study ends with recommendations that focus on strategies which would improve the ability of the co-operative housing sector to promote an understanding of conflict and conflict resolution.

EXTRACT, a program for extracting a section of finite element model for top-down-modelling

By D.R. Smith. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1994. iii, 35 p. : *ill., Bibl.* (DREA contractor report / Defence Research Establishment Atlantic ; DREA CR/94/442)
MICROLOG 96-01817 (1 fiche)

EXTRACT is a computer program designed to extract a portion of a large finite element model to obtain more detailed displacements and stresses as part of the procedure for top-down modelling of a ship structure. The program also applies boundary conditions to the extracted region in the form of prescribed displacements obtained from a previous analysis of the large model. The extracted portion can be refined by the use of a special refining program or by hand modelling. Hydrostatic pressure on the portion, due to balance-on-a-wave loading, is applied by EXTRACT. The extracted model created, along with its associated boundary and load conditions, is in a form suitable for a finite element analysis to obtain displacements and stresses. This report describes the organization and operation of EXTRACT and includes sample outputs. The appendix includes listings of two subroutines.

Farming systems of the African savanna : a continent in crisis

By Andrew Ker. Ottawa : International Development Research Centre, 1995. vi, 167 p. : *ill., Maps, Bibl.* ISBN 0-88936-793-0
MICROLOG 96-01931 (2 fiche) (Available on fiche only)

The aim of this book is to highlight some of the problems facing African farmers and to suggest some possible approaches toward solutions. The book focuses on the savanna zone since it is widely considered to be the zone of greatest risk of declining agricultural production at present, and parts of it have been severely affected by drought and food shortages. At the same time, parts of the savanna receiving adequate rain have large potential for expansion of agricultural production. The book begins with an introduction on African farming and the breakdown of traditional farming systems. It then describes the African savanna and its bioclimatic zones. Later chapters analyze information on selected farming systems in each zone to identify common features and differences from which lessons can be derived on possible improvements to the systems. Possible solutions are discussed in chapters on physical environment, farming systems, agricultural research, and future prospects.

Field guide to the autecology of selected crop trees and competitor species in northeastern Ontario

By R.W. Arnup...et al. Timmins, ON : Ministry of Natural Resources, Northeast Science & Technology Unit, 1995. vi, 158 p. : *ill., Bibl.* (NEST field guide / Ontario. Northeast Science & Technology Unit ; FG-005 ISSN 1195-4558)
ISBN 0-7778-3744-7
MICROLOG 96-01564 (2 fiche)

This manual contains information on seven commercially important tree species and on 44 plant species that may compete with these crop tree species in northeastern Ontario. The introduction provides background information for the species comparison tables and species summaries that follow, and explains the format of the manual. The tables give information on each species' autecology in the context of the Forest Ecosystem Classification (FEC) system for northeastern Ontario. In addition, each potential competitor is evaluated with respect to their competitive effects and mechanisms, their response to disturbance and silvicultural treatments, and their potential value for wildlife. The crop tree species are evaluated with respect to their response to competition and their ability to respond to release. Line diagrams are included to aid in field recognition. The appendix contains a glossary and a key to FEC names and descriptions.

Micromedia Ltd., 240 Catherine St., Suite 305, Ottawa ONT K2P 2G8
(613) 237-4250 FAX (613) 237-4251

As the Canadian economy has recovered from the recession, the Greater Toronto Area (GTA) faces serious economic challenges: a largely jobless recovery, migration of GTA firms to other regions, and relatively slow economic growth. This document discusses the reasons behind these problems, outlines the four eras of the GTA economy, and notes the importance of the traded goods and services sector as the key to the GTA's economic health and well-being. It also reviews the importance of the GTA manufacturing sector, the critical role of the automotive sector, and the factors that improve the competitiveness of GTA traded services. Finally, the document points out what the GTA can and cannot do to improve its economic position, with reference to lessons from other jurisdictions. The document concludes with an outline of objectives for a GTA economic strategy. Relevant statistics are included throughout.

From correlation to distributed contiguities : a family of AR-C-D autocorrelation processes -- Rev.

By Ulrich C. Blum, Denis Bolduc and Marc J. Gaudry. Montreal : Université de Montréal, Centre de recherche sur les transports, 1995. iii, 28 p. : *Bibl.* (Publication / Université de Montréal. Centre de recherche sur les transports ; no. 734) (Cahier / Université de Montréal. Département de sciences économiques ; 9031) (Cahier / Université Laval. Département d'économique ; no. 9019)
MICROLOG 96-02014 (1 fiche)

This paper distinguishes between correlation and autocorrelation among values of regression variables or residual errors and defines a family of autoregressive, contiguous, and distributed processes to extract the systematic information that they contain using discrete Boolean impact matrices. The paper focuses on two cases, called the R-Koyck and R-Almon first-order specifications. After describing the properties of the first process, the paper provides a numerical illustration in which a production function is estimated based on cross-sectional data. The paper then briefly discusses the applicability of the process to other problems such as time series models and to models in other fields than economics, as well as its possible use on specific variables in regression models. Finally, the paper describes the Almon formulation and discusses extensions and other considerations.

Further investigations of space-time adaptive processing and displaced phase centre antenna space-based radar, vol. III : user manual : final contract report

By Tim J. Nohara. Ottawa : National Defence, Defence Research Establishment Ottawa, 1995. iv, 36 p. : *ill.* (Contractor report / Defence Research Establishment Ottawa ; 95-605)
MICROLOG 96-01842 (1 fiche)

This volume is the user manual for SBRSIM software, which can be used to design and carry out a variety of experiments associated with radar signal processing on a space-based radar. SBRSIM allows the user to define the orbit, the antenna, the waveform, the clutter scenario, and the target scenario for a particular experiment or experiments. The manual includes instructions for installation and program operation (parameter definition, signal generation, and signal processing and analysis). Sample screens and step-by-step instructions to carry out two examples are included. The final section of the manual describes the types of error or warning messages in SBRSIM.

(Géologie de l'orogène Appalachien-Calédonien...) : 96-01493/11. Fold. map not filmed.* ISBN 0-660-13134-X CCG-P
no. M40-49/6E
MICROLOG 96-01466 (10 fiche)

The Appalachian region of North America is a Paleozoic geological mountain belt or orogen occupying a position peripheral to the continent's stable interior craton. The Appalachian miogeocline and its extensions such as those found in Greenland form an open-ended continental margin. This volume details the geology of the Appalachian and related Greenland Caledonian Orogens, with a focus on the Canadian Appalachian Orogen. It describes the rocks of the Canadian Appalachian region under four broad temporal divisions: Lower Paleozoic and older, Middle Paleozoic, Upper Paleozoic, and Mesozoic. Separate sections cover the geophysical characteristics of the Orogen, plutonic rocks, metallogeny, paleontological contributions to Paleozoic paleogeographic and tectonic reconstructions, and East Greenland Caledonides. The volume is also intended as a report of progress in Appalachian geological research.

Georges Vanier Secondary School : Exemplary Schools Project, technical report

By Elizabeth Campbell...et al. Toronto : Canadian Education Assn, 1995. viii, 106 p. : *Bibl.*
ISBN 0-920315-89-5
MICROLOG 96-01858 (2 fiche) (Available on fiche only)

This case study was completed as part of a national research study of a sample of secondary schools across Canada that had a reputation for success. The study examines five issues: the meaning and recognition of success; the interaction between the school and its context; the influence of structures, processes, and culture of the school in fostering success; the characteristics of student life in the school; and services provided to students at risk of dropping out. This case study describes a large urban school in North York, Ontario, with nearly 1,500 students from diverse cultural backgrounds. Chapters of the study describe the school population and image, the school's views on success and its recognition, concerns relating to provincial and local accountability, parent-school relations, educational programs, administrative and teaching staff, student life in a multicultural environment, and future challenges facing the school. The appendix describes the case study methodology.

MICROLOG 96-02097 (2 fiche)

Ce rapport a pour objet premier de servir de source de renseignements à l'intention des parlementaires, des fonctionnaires et autres personnes désirant analyser le régime de l'impôt sur le revenu du Canada. Il constitue également un important apport au processus d'évaluation de son fonctionnement. La première partie du rapport traite de façon générale de la notion de dépenses fiscales afin de faciliter la compréhension des estimations fournies ensuite. Elle est suivie de tableaux donnant l'estimation à la fois des dépenses fiscales et des postes pour mémoire dans le cas de l'impôt sur le revenu des particuliers et de l'impôt sur le revenu des sociétés. L'annexe A et l'annexe B décrivent chacune des mesures, tout en fournissant des renseignements sur les sources de données et la méthode de calcul des estimations. Les annexes C et D résument les modifications apportées au régime fiscal des particuliers et des sociétés de 1983 à 1991 ainsi que les changements opérés dans le régime des sociétés entre 1983 et 1990.

Groundfish stock assessments for the west coast of Canada in 1994 and recommended yield options for 1995

M. Stocker and J. Fargo (editors). Nanaimo, BC : Dept. of Fisheries & Oceans, Science Branch, Pacific Region, Pacific Biological Station, 1995. v, 440 p. : *ill., Maps, Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2069
ISSN 0706-6457) ISSN 0706-6457 CCG-P
no. FS97-6/2069E
MICROLOG 96-01790 (5 fiche)

Stock assessments and yield options are developed for the Pacific coast of Canada for lingcod, Pacific cod, petrale sole, Dover sole, rock sole, English sole, arrowtooth flounder, sablefish, Pacific hake, spiny dogfish, walleye pollock, Pacific ocean perch, yellowmouth rockfish, rougheye rockfish, redstripe rockfish, silvergray rockfish, yellowtail rockfish, canary rockfish, quillback rockfish, copper rockfish, yelloweye rockfish, hagfish, and Pacific halibut. A number of analytical methods have been employed in these assessments, like surplus production analysis, virtual population analysis, several variants of sequential age-structured analyses, dynamic pool models and depletion estimators. Biological objectives are the only consideration for these assessments and yield options. Yield options and recommendations on catch limitations and other management measures to achieve biological objectives are made to the fishery managers of Offshore Division of Fisheries Branch (Pacific Region). Alternative options allow managers to consider high risk and low risk yields in relation to a stock's potential productivity.

GSC teacher's field-trip guide to the geology of the Vancouver area

By Jim A. Roddick and John L. Luternauer. Vancouver, BC : Natural Resources Canada, Geological Survey of Canada, 1994. i, 29 p. : *ill., Maps, Bibl.* (Open file / Geological Survey of Canada ; 3021)
MICROLOG 96-01594 (1 fiche)

This guidebook was prepared for one-day field excursions for groups of secondary school teachers in the British Columbia lower mainland. The guide begins with a general introduction to the geology of the lower mainland area and then describes and explains the features seen at four stops selected as being fairly representative of the main geologic components of the region. The first stop, Point Grey, shows features of the last 26,000 years and the second, at Little Mountain, exposes remnants of a probably extensive volcanic flow from the Oligocene. The third stop, between Third Beach and Lions Gate Bridge, reveals the underlying sandstone and conglomerate that form the bedrock of Vancouver, formed in the Cretaceous period. At Caulfeild, the fourth stop, the main components of the Coast Mountains are exposed. The rocks observed represent the oldest in the Vancouver area.

Guide to resource conservation and cost savings opportunities in the dairy processing sector

Toronto : Ministry of Environment & Energy, 1995. ix, 146 p. : *ill., Bibl.* ISBN 0-7778-4625-X
MICROLOG 96-01543 (2 fiche)

This guide identifies and promotes opportunities for conserving energy and water, as well as reducing waste, in the dairy processing sector. The guide begins with an introduction and a profile of Ontario's dairy processing sector, outlining the context for resource conservation and cost savings opportunities. It then outlines the rationale and the generic processes selected for careful examination of resource conservation and cost savings opportunities. Subsequent chapters describe the energy, water, and material resources commonly used in relation to the generic processes; the air, water, and solid waste residuals commonly derived from those processes; and new technologies with potential application in dairy processing. The generic processes covered in the guide are for fluid milk, cheese, ice cream and frozen products, cultured products such as yogurt, butter, and dried or evaporated products. The report ends with additional useful information for dairy processors.

Harmonization of venting terminology : a report

Buchan, Lawton, Parent Ltd. Ottawa : Canada Mortgage & Housing Corporation, Research Division, 1995. 323 p.
MICROLOG 96-02079 (4 fiche)

A variety of venting terms are utilized in various Canadian and US codes and standards, with no apparent desire to ensure conformity between the different organizations. The consequent inconsistency and redundancy of venting terminology has prompted a Canada Mortgage and Housing project conducted to identify all relevant terms and definitions used by various organizations and to develop a proposed list of common definitions and terms. The project identified 139 terms and searched these terms through the 52 codes and standards collected. This document presents a listing of all the required venting terms and the recommended definition for each. The appendix identifies all the codes and standards reviewed as part of the project, and tabulates the terms and the definitions found in each document.

Health and the Canadian family

Thomas Stephens & Associates. Ottawa : Health Canada, Health Promotion Directorate, 1994. 48 p. : *ill., Bibl. French ed. (La Santé et la famille...) : 96-01930/1.*
MICROLOG 96-01929 (1 fiche)

The objective of this analytical study is to compare the health practices, attitudes, and knowledge of persons who live in several distinct family types. After an introduction on the demographics of household types and the study methodology, the study presents and discusses 32 topics relevant to health in a family context, most of which provide results analyzed by household type. The topics are organized under the following broad headings: the context for family health, including the social, economic, and physical environments affecting family life; lifestyle determinants of health, focusing on tobacco use, use of alcohol and other drugs, and nutrition; and health status and coping, which examines several aspects of good and ill health and ways of coping with adversity. Cross-cutting issues and challenges are discussed following the report's major subsections. A final section summarizes results across topics according to household type.

Health care curricula and family violence

By Gordon Hawkins. Ottawa : Health Canada, Health Programs & Services Branch, Health Services Directorate, Mental Health Division, 1992. 13 p. (Discussion papers on health/family violence issues / Canada. Health Canada ; 2)
French ed. (Les Programmes d'études en soin...) on the same fiche. ISBN 0-662-21424-2 CCG-P
no. H39-292/1994E
MICROLOG 96-02072 (1 fiche)

The purpose of this paper is to provide a framework for the consideration of issues, trends, gaps and innovations which are currently apparent in the way family violence issues are treated in the curricula of Canadian faculties and schools in the health care field. The paper is designed to raise some of the central questions which need to concern those responsible for curriculum design and teaching in these disciplines as well as those professional and community groups and organizations dealing directly with family violence issues.

Health indicator workbook : a tool for healthy communities (B.C.) — 2d ed.

Victoria : BC Ministry of Health & Ministry Responsible for Seniors, Population Health Resource Branch, 1995. 65 p. : *ill., Bibl.*
MICROLOG 96-01770 (2 fiche)

The British Columbia Population Health Resource Branch is encouraging the province's communities to adopt the healthy communities process as a means of identifying and resolving their local health issues. Through this process, communities are using surveys, neighborhood discussions, public forums, and interviews with key leaders to gather information on health needs and to monitor progress toward a healthier community. This workbook is designed to support this process by describing various indicators of community health, indicating why they are important, and how to measure the indicator and find relevant data. The indicators are classified in six categories: production (income, education), consumption (food, alcohol), physical environment (waste management, water supply), management (voter turnout, emergency preparedness) growth and development (birth weight, potential

Health status indicators in British Columbia : birth-related and mortality statistics, 1990-94, vol. II : health regions

Victoria : Ministry of Health & Ministry Responsible for Seniors, Division of Vital Statistics, 1995. x, 99 p. : *ill.* ISBN 0-7726-2593-X
MICROLOG 96-01763 (3 fiche)

This document presents birth-related and mortality statistics by health region. It presents tables for the 21 health regions and additional tables for any new boundaries. The tables include standardized measures such as standardized mortality ratios, age standardized mortality rates, and potential years of life lost statistics for major causes of death which enable the user to compare different geographic areas. In addition, the tables present the leading causes of death separately for males and females, and age standardized mortality rates for specific age groups by gender. Data presented are based on Division of Vital Statistics data and population estimates provided by BC STATS. Methodology used to determine the leading causes of death is included.

Help stop child abuse : a handbook for employers and volunteer coordinators -- 2d ed.

Victoria : Ministry of Attorney General ; Ministry of Social Services, 1995. vi, 91 p. : *Bibl.*
ISBN 0-7726-2614-6
MICROLOG 96-01650 (2 fiche)

This handbook has been prepared for employers and volunteer coordinators who work with children and youth, and is intended to help prevent child abuse and build an environment that is safe for children and youth. It provides guidelines on practical strategies to prevent child abuse in the workplace by screening job applicants and volunteers, establishing good employment practices, building a safe and supervised environment, and conducting criminal record checks. Chapters of the handbook cover staff recruitment and hiring, workplace policies including personnel policies and employee codes of conduct, suggestions on ways to improve workplace safety, and reporting of child abuse. A keyword index is included. The appendix contains an outline of the roles of provincial ministries and agencies in preventing child abuse, as well as an annotated list of print resources.

Historical western hemlock looper outbreaks in British Columbia : input and analysis using a geographical information system

By Nicola Parfett, G. Allan Van Sickle and Imre S. Otvos. Victoria : Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II, 1995. vii, 36 p. : *ill., Maps, Bibl.* (FRDA report / Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II ; 235 ISSN 0835-0752)
ISBN 0-7726-2644-18
MICROLOG 96-01660 (1 fiche)

This report provides a brief history of the western hemlock looper (Lambdina fiscellaria lugubrosa) outbreaks in British Columbia and the method of data collection used by the Forest Insect and Disease Survey. It then describes the development of a geographical information system for analyzing the infestation patterns of the western hemlock looper. The goal of that project was to bring all forms of cartographic historical data into a common computerized system, and to analyze the data to provide a guide for identifying and managing areas prone to hemlock looper attack. The report includes description of the system design and goals, hardware and software used, information gathering processes, mapping procedures, and database construction. Specific application examples are included to illustrate the capabilities of the system.

Horizons one, older Canadians' alcohol and other drug use : increasing our understanding

Edited by David Hewitt, Garry Vinje, and Patricia MacNeil. Ottawa : Health Canada, 1995. 63 p. : *Bibl. French ed. (Horizons un, mieux comprendre...) : 96-01926/1.* ISBN 0-662-23116-3 CCG-P no. H39-307/1-1995E
MICROLOG 96-01925 (1 fiche)

This publication presents highlights from a report which contained a selective critical review of surveys on the use of alcohol and other drugs by older persons. It is intended as a quick reference and resource for addictions/public health staff involved in public education and community development, for policy research staff, and for other researchers needing information on older persons' use of alcohol and other drugs. It includes statistics and discussion of the use of alcohol, tobacco, medications, and illegal drugs, including the prevalence of such use, factors involved in use, the consequences of use, and attitudes toward use. The publication ends with a section on survey methodology applicable to older adults. This section provides an overview of some special considerations that should be addressed when surveying older people and includes sample questions that were used in major surveys.

Human cognitive processes in command and control planning, 4 : exploration of measures of performance for planning task

By Carol A. McCann and Peter J. Essens. North York, ON : Defence & Civil Institute of Environmental Medicine (Canada), 1994. iii, 26 p. : *ill., Bibl.* (DCIEM publication / Defence & Civil Institute of Environmental Medicine (Canada) ; 94-61)
MICROLOG 96-01803 (1 fiche)

This report addresses the continued development of an experimental task for studying cognitive processes in planning. The task is a spatial resource allocation problem in which subjects plan coordinated routes for the efficient pickup of items in a store, subject to certain constraints. The resources are two robots that move at different speeds. The report describes changes to a planning task intended to tighten the control of the task through an additional constraint. It reviews an experiment carried out to investigate the difference in planning performance across topologically equivalent and the effect of repeated exposure to these problems on the following measures of performance: time to plan, plan quality, plan faults, plan similarity, number of replans, and planning strategies.

Human rights for gay New Brunswickers : a brief to the Standing Committee on Law Amendments of the Legislative Assembly of New Brunswick in response to the report Towards a world family

Fredericton : New Brunswick Coalition for Human Rights Reform Inc., 1991. 38 p. : *Bibl.*
MICROLOG 96-01725 (1 fiche)

This brief begins with a review of the estimated numbers of gays in New Brunswick, the extent of anti-gay discrimination and hatred in the province as determined in a 1990 survey, and the legal protection of gay rights in Canada. The brief then makes recommendations for the proposed provincial Charter of Rights that would protect gay rights in New Brunswick. In support of those recommendations, the brief also reviews evidence such as opinion polls that favors support for gay rights. The appendix includes references to documents supporting gay rights, a summary of the anti-gay discrimination survey, and a 1992 update outlining recent cases under the Canadian Charter of Rights and Freedoms related to gay rights.

Human security and mutual vulnerability : an exploration into the global political economy of development and underdevelopment

By Jorge Nef. Ottawa : International Development Research Centre, 1995. 103 p. : *Bibl.*
ISBN 0-88936-795-7
MICROLOG 96-01506 (2 fiche) (Available on fiche only)

The central thesis of this book is that the seemingly secure societies of the so-called North are increasingly vulnerable to events in the lesser secure and hence underdeveloped regions of the globe, in a manner that conventional international relations and development theory have failed to account. The book begins with an introduction on the changing foundations of the world system. The world system is a conceptual framework described in the first chapter of the book and subsequently used to understand the present global crises. The rest of the book discusses five types of insecurity: environmental, economic, social, political, and cultural, in a global context. It notes the sources and manifestations of these insecurities, as well as their culture, structures, processes, and effects. The book concludes with four basic observations relating to the global crisis and the need for a new analysis from a geocentric point of view.

Immigrant investment in British Columbia : new partnerships for our economic future

Victoria : The Province, 1995. 13 p. *Prepared for the Premier's Working Session on Immigrant Investment.*
MICROLOG 96-01640 (1 fiche)

This paper begins with a historical overview of immigrant investment in British Columbia. It then reviews the current state of business immigration in the province, focusing on entrepreneurs and investors. It outlines the reasons for business immigration, the rationale for provincial encouragement of immigrant investment, and the goals of the province with respect to immigrant investment. The paper then summarizes current government and community initiatives designed to attract and settle business immigrants and to encourage their investment in the province. It also discusses proposed changes to the federal immigrant Investor Program and how this would affect business immigration to British Columbia. Finally, the paper assesses the challenges and opportunities facing the province with respect to encouraging investment by prospective, new, and long-established business immigrants.

Improved connectivity constraints for the capacitated vehicle routing problem

By Gilbert Laporte and François V. Louveaux. Montreal : Université de Montréal, Centre de recherche sur les transports, 1995. ii, 6 p. : *Bibl.* (Publication / Université de Montréal. Centre de recherche sur les transports ; no. 95-73)
MICROLOG 96-01569 (1 fiche)

The capacitated vehicle routing problem consists of designing m vehicle routes of at least total length, starting and ending at a depot, such that each customer is visited exactly once, and such that the total demand of any route does not exceed Q. One of the most successful solution methodologies for this problem is to first formulate it as a two-index integer linear program, and then solve this program by branch and cut. Such programs contain three main types of constraints (degree, connectivity, and integrality). This paper derives connectivity constraints that are used in typical formulations of the routing problem. The paper derives a new class of such constraints and compares them to the connectivity constraints used in a previous work.

Infection dynamics of sea lice, Lepeophtheirus salmonis (Copedoda:Caligidae) parasitic on Atlantic salmon (Salmo salar) cultured in marine waters of the lower Bay of Fundy

By W.E. Hogans. St Andrews, NB : Dept. of Fisheries & Oceans, Biological Station, 1995. iv, 10 p. : *ill., Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2067 ISSN 0706-6457)
CCG-P no. Fs 97-6/2067
MICROLOG 96-01779 (1 fiche)

This report presents results of monitoring sea lice infections on salmon in the lower Bay of Fundy during 1994 and 1995. A fall 1994 study consisted of examination of cultured salmon at various sites to count and categorize any sea lice observed. A winter 1995 study consisted of field monitoring of cage sites at two locations (Lime Kiln Bay and Back Bay) in the study area, laboratory examination of selected smolts for presence of small chalimus larva and copepodid stages difficult to detect with the naked eye, and comparative laboratory experiments. The experiments included determination of the effects of winter marine water temperatures on the reproductive capacity and molting success of larval sea lice. The results reported also include the effectiveness of certain treatments in controlling sea lice infection.

An Integrated approach to soil and ground water management in the lower Don lands

Ontario. Waterfront Regeneration Trust. Site Remediation Work Group. Toronto : The Trust, 1995. vi, 244 p. : *Maps, Bibl.*
MICROLOG 96-01538 (3 fiche)

The lower Don lands comprise some 1,700 acres located at the mouth of the Don River in Toronto, close to the financial district and adjacent to well-established residential neighborhoods. Many parts of the lands have been adversely impacted by past landfilling practices and by industrial and transportation uses; many parts lie in the Don River floodplain; most of the land in the area is publicly owned; and linkages to the rest of the city are poor. This report describes the tools and a collaborative process for soil and groundwater management for these lands that is based on an ecosystem approach. The report consolidates available information on the lands' site conditions, including land ownership and tenure, subsurface physical conditions, and soil and groundwater chemistry; outlines the context for an integrated ecosystem approach; and presents the approach's management tools, decision-making process, and implementation strategies.

International Joint Commission : Seventh biennial report on Great Lakes water quality

Ottawa : The Commission, 1994. v, 58 p. : *Bibl.*
ISBN 1-895085-74-8
MICROLOG 96-01983 (1 fiche)

The Great Lakes Water Quality Agreement between the governments of the United States and Canada makes commitments concerning the restoration and protection of the Great Lakes. These commitments include the virtual elimination of persistent toxic substances and the adoption of an ecosystemic approach to achieving the Agreement's objectives. The International Joint Commission has been given the responsibility of monitoring and assessing progress made. This report reviews the efforts made during the last two years and lists recommendations made in the fifth and sixth biennial reports. A list of reports prepared by the Commission is also included.

Inventory of research and monitoring in the Fraser River Estuary, 1995-96

By Anne Wilson. New Westminster, BC : Fraser River Estuary Management Program, Water Quality/Waste Management Committee, 1995. iii, 50 p. : *Bibl.* (Technical report series / Fraser River Estuary Management Program (Canada). Water Quality/Waste Management Committee ; 95-01)
ISBN 0-7726-2629-4
MICROLOG 96-02045 (1 fiche)

This document presents a compilation of environmental research and monitoring activities in progress in the Fraser River estuary. It begins with a list of projects conducted by the Fraser River Estuary Management Program, the Canadian Wildlife Service, the Fraser River Action Plan, the British Columbia government, the Greater Vancouver Regional District, regional municipalities, and non-governmental organizations. It then provides an inventory of individual projects in the categories of monitoring, research, and databases. Information for each project includes a brief description, name of supporting agency, name and telephone number of contact person, project status, media investigated, dates and locations of project, parameters measured, and means of access to project results.

Investigation of drywall discoloration in Alberta houses

Prepared by Building Envelope Engineering ; for Alberta Home Builders' Association. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1991. iii, 42 p.
ISBN 0-88654-274-X
MICROLOG 96-01724 (1 fiche)

Staining of newly-constructed drywall has been experienced in many Canadian homes. The stains appear after the drywall is taped, finished and painted, usually 3-6 months after completion. The problem is sporadic, affecting one house but not another even with both having been built at the same time with apparently the same materials. This report presents results from an investigation of Alberta houses affected by drywall staining, as a basis for further laboratory work. The investigation included surveys which focused on builders and tradesmen. Through the builders, problem houses were located and general information obtained; more detailed information on construction practices and materials was obtained from tradesmen. Lifestyle information was gathered via homeowner interviews. The data were analyzed to determine correlations between drywall staining and various construction factors. The appendix includes copies of the survey questionnaires.

Investigation of multiple hypothesis and Viterbi trackers for signal following applications

By T. Quach and M. Farooq. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1994. vii, 93 p. : *ill., Bibl.* (DREA contractor report / Defence Research Establishment Atlantic ; DREA CR/94/432)
MICROLOG 96-01740 (2 fiche)

This study investigates the performance of a multiple hypothesis tracker (MHT) and a measurement-oriented Viterbi tracker (VT) for signal following applications, with emphasis on the low signal to noise ratio source in a maneuvering scenario. The focus of the study is both on a performance comparison between different signal followers and on the implementation issues of signal following algorithms. The investigation also addresses the question of how the maneuver tracking in a cluttered environment can be accomplished for the MHT and VT algorithms. The performances of the MHT, VT, and an interactive multiple model tracker were selected for evaluation based on simulated data. The study presents and analyzes the results on the basis of frequency of successful data association cases (percentage of loss of signal lock) and on the basis of tracking accuracy.

Investigation of the potential and limitations of the ram accelerator : final report

By John Lee, David Frost and Martin Brouillette. Medicine Hat, AB : National Defence, CRAD, Defence Research Establishment Suffield, 1994. i, 99 p. : *ill., Bibl.* (DRES contractor report / Defence Research Establishment Suffield ; CR 94-33)
MICROLOG 96-01799 (2 fiche)

The ram accelerator is essentially a ramjet flying inside a confined tube in which the tube wall acts as the outer cowling of the engine. The fuel is distributed in the form of a premixed combustible gas ahead of the projectile. This paper addresses fundamental issues related to the understanding of the ram acceleration concept. The investigators performed a one-dimensional (1-D) investigation of ram accelerator modes, first examining the validity of the pseudo-steady 1-D control volume formulation and also exposing the limitations of 1-D conservation equations to predict ram accelerator performance. They also studied the feasibility of attaining a stable standing detonation wave configuration around a supersonic projectile, using a quasi-1-D numerical model. The report also examines the use of an inhibitor to prevent pre-ignition in an expansion tunnel configuration.

Investing in our future : a plan for B.C.

Victoria : Ministry of Employment & Investment, 1995. 118 p. : *ill., Bibl.* ISBN 0-7726-2558-1
MICROLOG 96-01685 (2 fiche)

This plan outlines the British Columbia government's strategy for building the provincial economy for the future. It emphasizes the importance of investing in people, natural resources, and infrastructure, and is based on four strategic priorities: investing in long-term job creation and economic growth; developing skills for the 21st century; revitalizing the forest sector; and fair taxation and fiscal management. The plan document begins with an explanation of the rationale for such a plan, then describes the key issues and plan details regarding investments in people, natural resources, and infrastructure. The document ends with a review of some of the important trends in the provincial economy over the past four years, including relevant statistics.

This case study was completed as part of a national research study of a sample of secondary schools across Canada that had a reputation for success. The study examines five issues: the meaning and recognition of success; the interaction between the school and its context; the influence of structures, processes, and culture of the school in fostering success; the characteristics of student life in the school; and services provided to students at risk of becoming dropouts. This study describes a school on a Peguis reserve near Lake Winnipeg. Sections of the study describe the history of the school and its coming under control of the Peguis band, the findings of a school community workshop, community and parent relations, native studies, school administration and curriculum, school life and activities, teaching staff, and student attitudes. The appendix presents the case study methodology.

Land evaluation and area review for agriculture (LEAR)

Ottawa-Carleton (Ont.). Planning & Property Dept. Policy Division. Ottawa : The Division, 1995. 8 p. *On cover: Ottawa-Carleton Regional Plan Review.*
MICROLOG 96-01568 (1 fiche)

The regional plan review for the Ottawa-Carleton regional municipality includes a review of Official Plan policies for agricultural resource areas. This report describes how the review of those areas is proposed to be undertaken. The lands designated as agricultural resource areas include all the region's tracts of class 1 to 3 soils as well as contiguous areas of farming on class 4 soils. Specialty crop areas are also designated. The proposed review uses an approach called land evaluation and area review (LEAR) which enables the region to identify potential areas to be designated as agricultural resource areas based not only on soil capability for agriculture but also on other factors that contribute to the suitability of an area for agriculture. Steps of the LEAR approach include a land evaluation component, an area review, calculating an overall rating, and identification of prime agricultural areas.

Long-run demand for M1

By Scott Hendry. Ottawa : Bank of Canada, 1995. iii, 70 p. : *ill., Bibl.* (Working paper / Bank of Canada ; 95-11 ISSN 1192-5434)
ISBN 0-662-23934-2
MICROLOG 96-02015 (1 fiche)

The goal of this paper is to investigate and estimate long-run relationships among M1, prices, output, and interest rates, with a view to determining whether there is a stable relationship that can be interpreted as long-run money demand. The paper uses a maximum likelihood multiple-equation cointegration technique to fit a system of equations to the data. The analysis was performed on both monthly and quarterly data using real total-economy gross domestic product at factor cost as a scale variable. The paper reports the results of the empirical estimation for the base system as well as a number of alternative specifications. It also discusses the role of the constant used as part of the vector error-correction model and presents an estimate of the cointegrating vector with the constant restricted to appear in only the long-run relationship. The paper ends with a description of the estimate of the monetary disequilibrium for a number of systems.

The Man, the magic, the majesty : a development plan for Ministers Island, N.B.

Sackville, NB : Corinthian Consulting, 1995. 39 p. : *ill. French ed. (L'Homme, la magie, la majesté...) on the same fiche. On cover: Canada/New Brunswick Cooperation Agreement on Planning.*
MICROLOG 96-01576 (2 fiche)

The development plan proposed for Ministers Island has been established in response to market trends, the desire of area residents to protect the Island's unique natural and historic environment, and a strongly stated wish to maintain full public access to the Island. The development plan takes into account the problematic issues of access, and providing services and fire protection to Ministers Island in the absence of a fixed link. As well, it responds to a desire to establish facilities and services which are complementary to, not competitive with, those found in the St. Andrews area.

Management options for old-field sites in southern Ontario : guidelines and literature review

Geomatics International Inc. ; editors: B. Davidson, S. Strobl. Brockville, ON : Ministry of Natural Resources, Southern Region Science & Technology Transfer Unit, 1995. v, 78 p. : *Maps, Bibl.* (Technical report / Ontario. Ministry of Natural Resources. Southern Region ; TR-009)
ISBN 0-7778-4590-3
MICROLOG 96-01521 (1 fiche)

Abandoned agricultural fields and pastures are generally called old fields in their early stages of succession. Old fields often provide important habitat and opportunities for ecological restoration. This report provides a decision framework to help resource managers choose ecologically sound management options for old-field sites in southern Ontario. The framework considers the importance of old fields to wildlife as well as the potential benefits of restoring old fields to woodlands. The report uses a combined site-specific and landscape approach to evaluate options, and includes a series of questions to guide the manager to an ecologically sound management option such as passive or active rehabilitation, maintenance, reforestation, or return of the old field to a native, open area. The appendix includes a literature review on old-field natural succession factors, a list of old-field rare species, and a discussion of wildlife corridors.

Market solutions for native poverty : social policy for the third solitude

Helmar Drost, Brian Lee Crowley, Richard Schwindt ; with a comment by John Richards. Toronto : C.D. Howe Institute, 1995. vii, 173 p. : *ill., Bibl.* (The Social policy challenge / C.D. Howe Institute ; 11) ISBN 0-88806-350-4
MICROLOG 96-01707 (2 fiche)

The papers contributed for this volume form an exercise in clarification of the severity of the social challenges facing native Canadians and presentation of ideas on aboriginal social policy reform. The first paper examines unemployment among urban aboriginals and uses several socio-economic variables to try to explain the difference in aboriginal and non-aboriginal unemployment rates. The second paper examines property rights in traditional aboriginal culture and proposes aboriginal-centered institutions that would respect natives' desire to create a cultural space that is both amenable to traditional ways and compatible with individual rights. The final paper studies the effect of federal regulations on the decline of the traditional native in-river Pacific salmon fishery. It proposes an increase in the aboriginal share of the salmon harvest to help resolve native grievances over their natural resource rights and to restructure the fishery.

Meeting family needs : new directions in service delivery for Alberta families

Edmonton : Premier's Council in Support of Alberta Families, 1994. 44 p. : *ill., Bibl.*
ISBN 7732-1522-0
MICROLOG 96-01977 (1 fiche)

The Premier's Council in Support of Alberta Families, in conjunction with several government departments, conducted a review of the challenges that families face in accessing and using family services. This report is the outcome of that review, which had the main goal of developing some solutions to those challenges and providing a framework for new models of service delivery. The report reviews the pressures for change in the way services are delivered in Alberta, the characteristics of Alberta families and of the current service system, the problems families face in accessing and using those services, and some new service initiatives. Those initiatives are examples of alternate service models and include the Coordination of Services for Children initiative, the Community Supports Project, and health system restructuring. Common elements of these new initiatives are identified and the report ends with a series of important directions for change in the way services are planned throughout Alberta.

Mesures alternatives de la durée moyenne du chômage

Par Miles Corak et Andrew Heisz. Ottawa : Statistique Canada, Direction des études analytiques, 1995. 28 p. : *ill., Bibl.* (Documents de recherche / Statistique Canada. Direction des études analytiques ; no 83) *L'éd. anglaise (Alternative measures...) sur la même fiche.* ISSN 1200-5231 ISBN 0-660-94635-1 SCC 11F0019MPF
MICROLOG 96-01879 (1 fiche)

Cet article porte sur la robustesse d'une mesure de la durée complète moyenne du chômage au Canada par rapport à diverses hypothèses de calcul. Contrairement à la durée incomplète moyenne du chômage, qui est un indicateur cyclique retardé, cette statistique est un indicateur contemporain du cycle économique. On examine l'impact d'une hypothèse d'état stable plutôt que de l'hypothèse alternative, de même que l'incidence des diverses méthodes de correction du biais dans les réponses. On conclut qu'un estimateur d'état non stable apporterait un complément utile aux données sur la durée du chômage qui sont actuellement publiées par bien des organismes statistiques, plus particulièrement Statistique Canada.

Methods for measuring physiological responses and protection in man exposed to high +Gz

F. Buick...et al. North York, ON : Defence & Civil Institute of Environmental Medicine, 1995. 15 p. : *ill., Bibl. Presented at the AGARD AMP Lecture Series on Current Concepts on G-Protection Research and Development.*
MICROLOG 96-01836 (1 fiche)

The often-used subjective measurements of tolerance of +Gz (the inertial force acting in the forward direction) are inadequate because they are prone to subjective bias and cannot document the time-dependent changes in the reacting physiology. This paper describes non-invasive, objective measurements used to measure the human subject's physiological status, to monitor physiological reactions in order to compare the +Gz protective value of various +Gz countermeasures, and to measure endpoints which will guide the termination of +Gz exposure. The measurement methods include electrocardiograms, blood pressure and ear opacity measurement, respiratory flow measurement, and visual field status determination. The paper is illustrated with data from centrifuge testing at the Defence and Civil Institute of Environmental Medicine.

Methods of determining elected representatives' remuneration

By Ted Glenn. Toronto : Ontario Legislative Library, Legislative Research Service, 1995. 18 p. : *Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 166 ISSN 0835-0299)
MICROLOG 96-01523 (1 fiche)

In most democratic states, representatives themselves initially determined their level of remuneration. Since World War II, this practice has come under increasing criticism, and reform efforts have been motivated by the goal to pay elected representatives fairly and adequately for the work they perform. This paper begins by examining the evolution of some of the issues surrounding the determination of representatives' remuneration. It then surveys Canadian efforts to reform their methods of determining remuneration and summarizes federal and provincial methods used to determine elected representatives' financial compensation packages. Finally, the paper examines reforms of the processes of remuneration determination in Australia, Great Britain, New Zealand, France, Germany, and the United States.

Naturescape British Columbia : native plant and animal booklet, Georgia Basin

By Susan Campbell. Victoria : The Province ; Ottawa : The Government, 1995. 60 p. : *ill.* (Stewardship series / British Columbia and Canada)
On cover: Caring for wildlife habitat at home.
ISBN 0-7726-2639-1
MICROLOG 96-01764 (1 fiche)

This publication introduces the basic concepts of ecosystems and ecosystem diversity, and reviews the characteristics of the Georgia Basin ecoprovince of British Columbia. This region is a large basin bounded on the east by the Coast Ranges and on the west by the Vancouver Island Mountains. The publication then outlines the various possibilities for carrying out a naturescape project in the Georgia Basin ecoprovince. A naturescape project is one that restores, enhances, maintains, and protects wildlife habitat in an urban or rural setting. The bulk of the publication contains tables listing the names and characteristics of the native plants and animals of the Georgia Basin, with indications given of the availability of the plant species for wildlife habitat gardens.

Naval resource planning in real-time

By Bruce A. Chalmers. Courcelette, PQ : Defence Research Establishment Valcartier, 1995. 16 p. : *ill., Bibl. At head of title: 7th RMC Symposium/workshop, Applications of Advanced Software in Engineering.*
MICROLOG 96-01845 (1 fiche)

A weapon engagement manager for above-water warfare is a specific resource management system in a situation assessment and resource management component of a naval command and control system. This paper reviews the intelligent agent architecture for the manager that integrates both deliberative and reactive planning. The paper also describes a probabilistic model for conditionally planning and scheduling surface-to-air missile engagements against anti-ship missiles. Some algorithms for the deliberative planner are described and results are presented from using a high-performance parallel architecture simulator to study improvements in computational performance from their parallel execution.

Nearshore benthos of Lake Ontario, 1981 and 1991

Toronto : Ministry of Environment & Energy, Environmental Monitoring & Reporting Branch, Surface Water Section, 1995. 2 v. : *ill., Maps, Bibl. Contents: Vol. 1 : Main findings – vol. 2 : Appendices.* ISBN 0-7778-4446-4
MICROLOG 96-01546 (4 fiche)

This report concerns research conducted on the nearshore zone (5 and 20 meter) benthos of the Canadian side of Lake Ontario. The work repeated a 1981 survey of the zone to determine if changes in benthic invertebrate communities suggest improvement in water quality over the intervening period. The report describes the methodology used in the survey and presents the results, including habitat descriptions, benthic community composition and its temporal changes 1981-91, the concordance between community structure and habitat descriptors, the differences between the 5- and 20-meter communities, variations among substrate classes and locations, effects of upwelling and of zebra mussels, and associations among bivalve taxa. The appendix includes discussion of quality control and of sampling effects, raw meio-scale benthos data, output from correspondence analyses, raw macro-scale bivalve data, and changes observed at three transects.

MICROLOG 96-01600 (2 fiche)

The New Brunswick mineral sector, which plays an important role in the provincial economy, faces a number of challenges. To address these challenges, the province has issued a new Mineral Resource Policy, one of whose objectives is to improve public awareness regarding the mineral industry. This report presents results from a study conducted to measure public awareness and opinions on mining in New Brunswick. The study also identified public attitudes and priorities on key issues such as the environmental impacts of mining and the role of government; in addition, it compared New Brunswick residents' opinions with those of residents in local mining communities and with other Canadians. The study consisted of a province-wide survey based on telephone interviews with a sample of 603 residents. The appendix includes the survey questionnaire and tabulated survey results.

New Norway School : Exemplary Schools Project, technical report

By Margaret Haughey...et al. Toronto : Canadian Education Assn, 1995. 162 p. : *Bibl.*
ISBN 0-920315-81-X
MICROLOG 96-01862 (2 fiche) (Available on fiche only)

This case study was completed as part of a national research study of a sample of secondary schools across Canada that had a reputation for success. The study examines five issues: the meaning and recognition of success; the interaction between the school and its context; the influence of structures, processes, and culture of the school in fostering success; the characteristics of student life in the school; and services provided to students at risk of becoming dropouts. This study describes a small rural school in east central Alberta with a total grade 10-12 enrolment of 106. Sections of the study cover the history of the school, the surrounding community, parent involvement, teaching staff, administration, student experiences and activities, rights and responsibilities, student support programs, staff-student relations, and reasons for school success. The study concludes with reflections of the case study team. The appendix presents the case study methodology.

Newcastle Island Provincial Marine Park master plan

BC Parks. South Vancouver Island District. Victoria : The District, 1995. iii, 73 p. : *ill., Maps Cover title: Master plan for Newcastle Island Provincial Marine Park.* ISBN 0-7726-2665-0
MICROLOG 96-01652 (1 fiche)

Newcastle Island Provincial Marine Park is a 306-hectare island in Nanaimo Harbour. This docu-

ment presents a master plan for managing the park, based on a review of the previous (1983) master plan and on consultations with focus groups, park staff, and interested parties. The plan is in six main sections: the purpose or context of the plan, highlighting planning issues and summarizing background information on the park; the role of the park and its vision statement, describing the park's importance and the critical goals and principles that establish a long-term foundation for park management; park zoning, defining how different areas of the park will be managed; objectives and associated actions for managing the park's natural and cultural resources; objectives and actions for providing outdoor recreation opportunities and park information; and priorities for implementing the plan.

Ocean Station Papa detailed zooplankton data, 1956-80

By Brenda J. Waddell and Skip McKinnell. Nanaimo, BC : Dept. of Fisheries & Oceans, Science Branch, Pacific Biological Station, 1995. iv, 21 p. : *Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2056 ISSN 0706-6457) *Diskette not included with microfiche.* CCG-P no. 97-6/0000E
MICROLOG 96-01778 (1 fiche)

Researchers collected zooplankton samples at Ocean Station P (50 degrees north, 145 degrees west) from 1956 to 1980 and analyzed the data to various levels of taxonomic resolution. These data have since been reformatted, corrected, and supplemented to produce one complete dataset for the whole sampling period. The dataset contains total zooplankton wet weights per cubic meter, as well as densities (numbers per cubic meter) for five major taxa (copepods, chaetognaths, euphausiids, amphipods, and Aglantha) from 1964 to 1967, and species identifications, counts, and lengths for many samples collected between 1968 and 1980. This document contains information on the methods used to collect and process the data, and describes the latest version of the dataset along with minor unresolved points about the data. The document also details the format of the original data files, corrections and changes made since, and how the previous errors affect what was published in Fulton (1983).

Oil Spill Containment Program : Annual report 1993-94

B.C. Hydro. Vancouver, BC : The Corporation, 1994. ii, 22 p. ISSN 1195-826X
MICROLOG 96-01695 (1 fiche)

The Oil Spill Containment Program has a mandate to determine BC Hydro's risk in terms of probability and environmental consequences of oil spills; estimate costs of corrective actions; manage the study, design and capital improvement program to achieve the greatest reduction in risk for the least cost; and continue the program until unacceptable risk to environmental damage from oil spills has been addressed. The report includes a review of the program, planned expenditures, capital investment, accomplishments for the year, and related activities. Status summaries by station are provided in tabular format. Appendices provide a detailed mandate, risk analysis model and planned improvements.

Okanagan Timber Supply Area : rationale for allowable annual cut (AAC) determination, effective January 1, 1996

By Larry Pedersen. Victoria : Ministry of Forests, 1995. 57 p.
MICROLOG 96-01645 (1 fiche)

The Okanagan Timber Supply Area (TSA) is located in southern interior British Columbia and is one of the most ecologically complex TSAs in the province. It covers about 1.4 million hectares, of which about 45% constitutes the expected future timber harvesting land base. After a brief description of the TSA, this report reviews the principles for determining the allowable annual cut for the TSA and presents an accounting of the factors and the rationale used in making that determination. These factors include the role of the base-case timber supply forecast, the existing forest inventory and expected rate of growth, regeneration delay, unsatisfactorily restocked areas, decay and waste, the land base

contributing to the timber harvest, mill requirements, and harvest flow alternatives. The appendix contains relevant sections of provincial forestry legislation and a summary of public input to the Okanagan TSA Timber Supply Review.

Toronto : Ministry of Agriculture, Food & Rural Affairs, Farm Business Management, 1994. i, 68 p. : *ill.* ISSN 0828-8542
MICROLOG 96-01556 (1 fiche)

This report presents financial and physical information, submitted by farmers, by farm type and major enterprise. Farms were selected based on the size of the enterprise and the detail of information in their records. Each type of farm includes information on income, an investment summary, various measures of performance efficiency and profitability, debt servicing capacity, a whole farm summary, details on livestock per unit, and details on crops per tillable acre. General information is also given on the year's crop and weather conditions and the methodology. The report covers dairy farms, beef feedlots, beef cow, swine farrow, farrow-to-finish, and finishing, cash crop, sheep, and meat goat operations.

Opto-electronic technology for the optical control of array antennas

By Claude Bélisle. Ottawa : Industry Canada, Communication Research Centre, 1993. vii, 69 p. : *ill., Bibl.* (CRC report / Communications Research Centre (Canada) ; no. 93-003)
MICROLOG 96-01734 (1 fiche)

This paper reviews concepts, components, performance analysis, and system designs related to opto-electronic technologies that could find an application in the implementation of a phased array and multiple beam aperture antenna. The paper first reviews conversion of the radio frequency (RF) signal to the optical signal via three main techniques: direct modulation, external modulation, and heterodyning. It then considers the conversion of the optical signal to an RF signal via photodiodes and field effect transistors. Subsequent sections of the paper provide an overview of beamforming network theory for array antennas, discrete components of beamforming networks, and signal distribution networks and their components (splitters, optical amplifiers, couplers). A link budget example is included for the transmit link of a proposed 1000-element antenna.

The PACIFIC ECHO sea trials, DREP/NRL, 1986-92

By N.R. Chapman, J.A. Fawcett and M.L. Yeremy. Victoria : Dept. of National Defence, Research & Development Branch, Defence Research Establishment Pacific, 1994. 117 p. : *ill.* (Technical memorandum ; 94-151)
MICROLOG 96-01802 (2 fiche)

The Pacific Echo sea trials consisted of a series of collaborative experiments between the Defence Research Establishment Pacific and the Naval Research Laboratory, 1986-92. The general objective of the experiments was to investigate matched field processing for source localization and geoacoustic inversion using vertical and horizontal line arrays at thin-sediment sites in the north Pacific. The central focus of this aspect of the Pacific Echo project was to determine the effect of geological age on the sound speed in the upper oceanic crust. The purpose of this technical memorandum is to describe each of the four sea trials and to summarize the results in order to provide an overall picture of the collaborative experiments. The memorandum also contains related papers on Pacific Echo data analysis, six concerning source localization and two on matched field inversion for geoacoustic properties.

A Particle-tracking code (TRACK3D) for convective solute transport modelling in the geosphere : description and user's manual

By B.W. Nakka and T. Chan. Pinawa, MB : Whiteshell Laboratories, 1994. 277 p. : *ill., Bibl.* (AECL research / Atomic Energy of Canada Ltd. ; AECL-10881 ISSN 0067-0367)
ISBN 0-660-16052-8 CCG-P no. CC2-10881E
MICROLOG 96-01471 (4 fiche)

This report describes the assumptions, limitations, organization, operation, and applications of the TRACK3D code, a deterministic particle-tracking code developed to compute convective flow paths of conservative (nonreactive) contaminants through porous geological media. TRACK3D temporarily integrates the velocity distribution, in conjunction with the model geometry, to calculate flow paths, exit locations, and travel times of as many as 1,000 water-coincident particles released in the flow domain. The code can handle both steady-state and time-varying velocity distributions. TRACK3D has been applied in the concept assessment phase of the Canadian nuclear fuel waste management program to analyze radionuclide pathways and travel times from a hypothetical underground vault containing reactor fuel waste, through the surrounding geologic formations to discharge locations in the biosphere. The appendix contains sample problems.

PE approximations for scattering from a rough surface

By David J. Thomson, Gary H. Brooke and Eleanor S. Holmes. Victoria : Dept. of National Defence, Research & Development Branch, Defence Research Establishment Pacific, 1995. 22 p. : *ill., Bibl.* (Technical memorandum ; 95-21)
MICROLOG 96-01933 (1 fiche)

This paper presents two methods for incorporating the effects of rough boundaries into propagation models based on the parabolic equation (PE) approximation. In particular, the paper considers the acoustic scattering by a deterministically rough pressure-release surface. In the first method, the vertical extent of the computational cell adjacent to the rough boundary is allowed to vary with range. This non-standard grid approach can be readily incorporated into existing finite-difference PE codes. In the second method, a low-impedance air layer backing is appended to the rough surface and the original rough-surface scattering problem is replaced by one involving scattering from an internal water/air interface. In this case, both finite-difference and split-step marching algorithms can be accommodated. The paper includes numerical results for the forward scattered component of the field in two benchmark problems.

Policy frameworks on designated populations

Victoria : Ministry of Health & Ministry Responsible for Seniors, New Directions Development Division, 1995. 55 p.
MICROLOG 96-01648 (1 fiche)

Regionalization of the British Columbia health care system requires that regional health boards will be responsible for the governance and management of health services, including services to designated populations. This document offers guidance to health boards and councils on six of the seven designated populations: children and youth, the disabled, people with mental disorders, ethnocultural minorities, seniors, and women. It provides policy frameworks, based principles of equity, accessibility, effectiveness, accountability, partnership, consumer focus, integration, a focus on prevention, and sensitive implementation. These frameworks will assist in developing regional health board/council policies. Each framework contains an introduction, a description of services, a discussion of systemic and health status issues, principles for recognizing the special needs of the particular designated population, and suggested goals and strategies.

Politique sur l'aide financière en cas de catastrophe

Frédéricton : Ministère des municipalités, de la culture et de l'habitation, Services généraux ; Organisation des mesures d'urgence du Nouveau-Brunswick, 1993. i, 32, i, 30 p. *Bilingue (Disaster financial assistance policy).*
MICROLOG 96-01623 (1 fiche)

En décembre 1991, le Cabinet a discuté de la nécessité d'adopter une politique qui établirait des modalités équitables pour l'octroi d'une aide financière aux victimes dont le gagne-pain est sérieusement compromis par suite de graves tempêtes ou inondations. Puisque la province a fourni, par le passé, une aide à de nombreuses victimes, sur une base spéciale, il a été décidé qu'un processus officiel devrait être établi pour traiter tous les cas de façon équitable. Ce document porte sur la Politique sur l'aide financière en cas de catastrophe. Elle devrait éliminer le manque d'uniformité qui a caractérisé le traitement des demandes d'indemnité visant à aider les victimes à payer une partie des dommages causés par une catastrophe.

MICROLOG 96-01853 (3 fiche) (Available on fiche only)

Cette étude a pour but de repérer dans différentes régions du pays des méthodes pédagogiques qui réussissent afin de pouvoir en tirer des orientations pédagogiques. Elle a ciblé des écoles secondaires réputées pour leur succès et visait cinq objectifs, soit de comprendre : la signification du succès et la reconnaissance qu'on lui accorde; l'interaction entre l'école et son milieu; l'influence des structures, des processus et de la culture scolaires dans l'éclosion du succès; les caractéristiques de la vie des élèves à l'école; et, les services offerts aux élèves susceptibles de décrocher. Vingt et une écoles ont été choisies parmi quelque 260 candidatures. Elles ont été jugées exemplaires non pas parce qu'elles sont à tel point supérieures qu'il faille les imiter sans réserve mais parce qu'elles reflètent assez bien la diversité qu'on retrouve parmi les écoles secondaires canadiennes, les tensions et les problèmes auxquelles elles font face, et les façons novatrices qu'elles trouvent pour venir à bout de leurs difficultés.

Pre-apprenticeship training manual for wood frame construction

Prepared by Terrance D. Martin ; for Alberta Home Builders' Association. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1988. vii, 116 p. : *ill., Bibl.*
ISBN 0-88654-235-9
MICROLOG 96-01500 (2 fiche)

Residential construction practice in Canada has led framers to become a separate and distinct trade which requires a specialized training program consisting of both theoretical and practical training for expeditious entry at a competent level to the trade. This manual provides a vehicle to help in such training and is meant to be used in classroom presentations and on-site demonstrations to provide novice craftsmen with the knowledge and skills needed to operate safely and to help experienced carpenters build simple wood structures such as houses. The manual has a unitized format with each unit designed to direct the student through a logical learning sequence from general information to specific application. The units cover construction site orientation, construction materials, tools and equipment, basic blueprint reading, personal safety, floor framing, wall framing, and roof framing. A glossary of terms is included.

A Preliminary report on the chinook productivity study conducted on the Cowichan River during 1993

By D.A. Nagtegaal, B. Riddell and J.R. Candy. Nanaimo, BC : Dept. of Fisheries & Oceans, Science Branch, Pacific Biological Station, 1995. viii, 84 p. : *ill., Bibl.* (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2315 ISSN 0706-6473)
CCG-P no. 97-4/2315E
MICROLOG 96-01787 (1 fiche)

The purpose of this report is to present the results of the productivity study conducted on the Cowichan River during the fall. Major components of the study include enumeration of spawners, estimation of native food fish catch, recording hatchery broodstock removals, and biological sampling and coded-wore tag data collection. A mark-recapture study augments the fence count. In addition a water management plan was executed to increase water flow for a short period during the early part of the chinook run.

Premier rapport d'étape en vertu de l'Accord Canada-Ontario concernant l'écosystème du bassin des Grands Lacs, 1994

Toronto : Accord Canada-Ontario concernant l'écosystème du bassin des Grands Lacs, 1995. 39 p. : *ill., Bibl. L'éd. anglaise (First progress report under the...) : 96-01741/1.*
MICROLOG 96-01742 (1 fiche)

Ce rapport résume les progrès réalisés par les organismes des gouvernements fédéral et ontarien et leurs partenaires depuis la signature de l'Accord Canada-Ontario (ACO) concernant l'écosystème du bassin des Grands Lacs, en juillet 1994. L'ACO met en place un cadre pour la coordination systématique et stratégique des compétences que partagent les gouvernements en matière de gestion de l'environnement du bassin des Grands Lacs, et pour la mise en oeuvre des mesures adoptées en vue de remplir les obligations du Canada aux termes de l'Accord relatif à la qualité de l'eau dans les Grands Lacs (ARQEGL). Le rapport documente les progrés accomplis dans le cadre des programmes canadiens, mais aussi des activités réalisées conjointement par le Canada et les États-Unis aux termes de l'ARQEGL. Le rapport traite de la restauration des zones dégradées (plans d'assainissement, travaux d'investissement, remise en état des espèces et des habitats, sites ou sédiments contaminés, eaux souterraines, santé humaines), prévention et réduction de la pollution (substances toxiques prioritaires, déchets dangereux et les déversements, pesticides, initiatives binationales, dépôts atmosphériques), préservation et la protection de la santé humaine et de l'écosystème (gestion globale des lacs, conservation des habitats et les zones protégées, conservation des ressources halieutiques et fauniques, santé humaine, changement climatique, et gestion de l'utilisation des terres et de l'eau).

Principles and recommendations for the regulation of health professionals in Alberta : final report

Alberta Health Workforce Rebalancing Committee. Edmonton : The Committee, 1995. i, 26 p.
MICROLOG 96-02088 (1 fiche)

The Alberta Legislative Assembly established a committee in 1994 to review the current system for regulating health professionals in the province, to propose changes in the system, and to review alternative approaches to the provision of health care services. This report presents five guiding principles, 13 recommendations, and three observations for a restructured health regulatory system, developed by the committee in consultation with health professionals, employers, educators, and consumers. The recommendations are in such areas as self-governance, separation of regulatory functions, registration of professionals, consumer information, public representation, conflict of interest, complaint and appeal processes, barriers to practice, and the role of a proposed advisory council. The three observations concern access to health services and resources, information networks, and funding.

SCC 11F0019MPE
MICROLOG 96-01875 (1 fiche)

Firm turnover occurs as firms gain and lose market share as part of the competitive struggle. The reallocation of market share from one group to another is associated with productivity gain as the less productive lose share and the more productive gain market share. This paper examines the extent to which productivity has been enhanced by firm turnover over the last twenty years. It focuses on the extent to which this process changed during the 1980s and thereby contributed to the slowdown in productivity growth that was experienced by the manufacturing sector.

Programme d'aide au développement des technologies de l'énergie (PADTE) : recueil des projets subventionnés par le PADTE

Charlesbourg, PQ : Gouvernement du Québec, Ministère des ressources naturelles, Direction des politiques, des études et de la recherche, 1995. 59 p.
MICROLOG 96-01822 (1 fiche)

Le ministère des Ressources naturelles a la responsabilité d'établir des politiques favorisant le développement économique québécois et l'approvisionnement énergétique au meilleur coût et avec la meilleure efficacité, ainsi que d'administrer les lois et règlements qui s'y rattachent. En relation avec cette responsabilité, le Ministère appuie et fait la promotion du développement des diverses filières d'approvisionnement énergétique et de la mise en oeuvre des techniques d'efficacité énergétique. Le Programme d'aide au développement des technologies de l'énergie constitue son principal moyen d'action pour le développement de nouvelles technologies énergétiques pouvant déboucher sur de nouveaux produits et services ou sur l'amélioration de produits et services déjà existants.

Projet de démonstration du pare-air extérieur (EASE), maison performante de l'APCHQ : rapport

Morrison Hershfield Ltd. Ottawa : Société canadienne d'hypothèques et de logement, Division de l'innovation dans l'habitation, 1995. 97 p. : *ill. L'éd. anglaise (EASE demonstration project...) : 95-07862/2.*
MICROLOG 96-01637 (2 fiche)

La Société canadienne d'hypothèques et de logement a contribué à la conception, à la construction et à l'évaluation de la performance de la maison que l'APCHQ a inscrite au Programme de la maison performante. Cette maison se distingue par plusieurs caractéristiques innovantes, notamment un pare-air extérieur. Ce pare-air extérieur se compose d'une membrane perméable à la vapeur d'eau insérée entre deux feuilles de carton-fibre. L'annexe C illustre certaines techniques d'exécution. L'évaluation à long terme de la performance de la maison consistait en partie à contrôler les pressions, les températures et les teneurs en humidité à l'intérieur et sur l'ensemble de l'enveloppe du bâtiment. La SCHL a demandé à la firme Morrison Hershfield d'analyser les données qu'elle lui a fournies et d'en tirer des conclusions axées sur la performance du pare-air extérieur.

PROP3, revised compressibility corrections for wind tunnel tests of marine propellers

By George D. Watt. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995. v, 36 p. : *ill., Bibl.* (DREA technical memorandum / Defence Research Establishment Atlantic ; 95/207)
MICROLOG 96-01844 (1 fiche)

This report describes a computer program which predicts the effects of compressibility on marine propeller thrust and torque measurements made in wind tunnels. The flow model is simple, combining classical lifting line and momentum theory to estimate thrust and torque. Compressible flow effects are predicted by applying the Prandtl-Glauert compressibility correction to two-dimensional blade section lift predictions. Simple empirical stall models extend the predictions to extreme advance ratios. Supersonic conditions are not modelled. The program supplies the ratios of compressible to incompressible thrust and torque predictions as the compressibility correction. These corrections are determined primarily by propeller tip Mach number. The report also discusses the significant shortcomings of the program.

Proposed Bamberton town development : project report specifications

Bamberton Project Committee (B.C.). Victoria : Environmental Assessment Office, 1995. xxxi, 173 p. *At head of title: Environmental Assessment Act (Bill 29).*
MICROLOG 96-01658 (3 fiche)

The South Island Development Corporation proposes to redevelop the former Bamberton cement plant site and surrounding lands (632 hectares total area) located on Saanich Inlet, Vancouver Island. The Corporation has applied for a project approval certificate under the provincial Environmental Assessment Act. This document first describes the background to the current review of the Bamberton development proposal, including the status of the review and the requirement for a project report (the primary detailed impact assessment submission required under the environmental assessment process). The document then presents the specifications for the project report, including general reporting requirements and specific background and reporting requirements regarding environmental/technical issues, transportation, community services, specific community design issues, socio-economic issues, community governance and administration, and First Nations issues. The appendix contains the Bamberton Project Committee responses to views expressed and issues identified by the public.

Prospects for the utilization of paper mill sludges in manufactured products : final report

By Kevin Bellamy. Toronto : Ministry of Environment & Energy, 1995. 138 p. : *ill., Bibl. On cover: Environmental research.* ISBN 0-7778-4678-0
MICROLOG 96-01562 (2 fiche)

This report summarizes the results of a literature review on the utilization of paper industry sludges in commercial applications. The report begins with a discussion of the significance of paper industry sludge management as a regulatory and environmental issue. It also reviews paper production and effluent treatment processes, focusing on Ontario operations, as well as pulp and paper manufacturing processes and the types of sludges they generate. The paper includes comparative data on sludge composition at Ontario mills. It then reviews alternatives to the conventional disposal of paper industry sludges, including recycling, fiber and filler reclamation, and utilization in manufactured products. Finally, the report matches sludge properties and types to prospective uses, and defines market issues or constraints based on economics, manufacturing requirements, plant capacity, and plant location.

Pyrolysis gas chromatography/mass spectrometry identification of elastomeric materials

By John A. Hiltz and John J. Power. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995. iv, 22 p. : *ill., Bibl.* (DREA technical memorandum / Defence Research Establishment Atlantic ; 95/216)
MICROLOG 96-01673 (1 fiche)

Elastomeric materials can be difficult to identify and ensure that the materials have the correct properties for a given application. Pyrolysis coupled with gas chromatographic separation and mass spectrometric identification (py-GC/MS) of the degradation products provides a rapid, reproducible method of degrading cross-linked materials such as elastomers and identifying their degradation products. Since these products are directly related to the structure of the polymer, they can be used to identify the polymer. This report presents results of py-GC/MS analyses of four common elastomers: natural rubber, butyl rubber, polychloroprene rubber, and polyacrylonitrile-butadiene rubber. The report demonstrates the identification of degradation products that characterize each elastomer, showing how the py-GC/MS technique can identify the materials and also the additives that they contain.

Qualitative sampling for walleye embryos in five tributaries of the Great Lakes

By J.K. Leslie and C.A. Timmins. Burlington, ON : Dept. of Fisheries & Oceans, Great Lakes Laboratory for Fisheries & Aquatic Sciences, 1995. iv, 12 p. : *Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2081 ISSN 0706-6457)
CCG-P no. Fs 97-6/2081E
MICROLOG 96-01981 (1 fiche)

This paper reports on attempts to collect walleye free embryos during early spring ichthyoplankton sampling in five tributaries of the Great Lakes. The investigators collected the embryos to determine the time of emergence from spawning beds and subsequent drift as an indication of the reproductive success of this commercially important species. They used conical plankton nets for drift and active sampling in rivers and beach seines for collections at the shore. Results presented in the report include mean densities of walleye embryos, their time of occurrence, ranges of total embryo length, and hydrobiological conditions observed.

MICROLOG 96-01465 (1 fiche)

La structure du Ministère s'appuie sur 5 mandats de base soit: énergie, forêts, mines, services régionaux et terres. Ce rapport donne un profil du Ministère en décrivant sa structure et ses ressources. Ensuite, il donne des priorités d'action et un bilan des réalisations pour chaque domaine d'action. Ainsi que des activités de gestion ou administration, ces domaines incluent les suivants: énergie (efficacité énergétique, droits hydrauliques et tarifs, électricité, gaz et pétrole, produits pétroliers), forêts (protection du milieu forestier, amélioration de la forêt, aménagement des forêts publiques ou privées, production de plants et de semences), mines (recherche gélogique, assistance à l'exploration minière, accès à l'information géoscientifique, statistique et économie minérale, redevances et titres miniers, assistance à la Société nationale de l'amiante), et terres (gestion du territoire public, réforme du cadastre, géodésie, cartographie, technologies à référence spatiale, information géographique et foncière). On traite aussi des politiques environnementales et des affaires autochtones.

Quesnel Timber Supply Area : rationale for allowable annual cut (AAC) determination, effective January 1, 1996

By Larry Pedersen. Victoria : Ministry of Forests, 1996. 49 p.
MICROLOG 96-01644 (1 fiche)

The Quesnel Timber Supply Area (TSA) is located in the Fraser Basin and the interior plateau of British Columbia. It covers 1.65 million hectares, about 80% of which is productive Crown forest. After a brief description of the TSA, this report reviews the principles for determining the allowable annual cut for the TSA and presents an accounting of the factors and the rationale used in making that determination. These factors include the role of the base-case timber supply forecast, the existing forest inventory, the expected rate of forest growth, the land base contributing to the timber harvest, regeneration delay, areas not satisfactorily restocked, decay and wastage, silvicultural systems, integrated resource management objectives, and the community dependence on the forest industry. The appendix contains relevant sections of the provincial forestry legislation and a summary of public input to the Quesnel Timber Supply Review.

Radiological assessment of 36Cl in the disposal of used CANDU fuel

By L.H. Johnson...et al. Pinawa, MB : AECL, Whiteshell Laboratories, 1995. 64 p. : *ill., Bibl.*
(AECL research / Atomic Energy of Canada Ltd. ; AECL-11213 ISSN 0067-0367)
ISBN 0-660-16081-1 CCG-P no. CC2-11213E
MICROLOG 96-01715 (1 fiche)

The Canadian concept for disposal of nuclear fuel waste is to emplace the waste in containers in vaults excavated deep in the Canadian Shield. Results of postclosure safety assessments of this concept indicated that iodine-129 and carbon-14 would be the main contributors to long-term radiological risk. Recent information shows that another radionuclide, chlorine-36 (36Cl), could also be a contributor to risk at about the same magnitude as iodine-129 and carbon-14. This report presents data on the amount of 36Cl present in used nuclear fuel bundles, the quantities that could be released from the used fuel into groundwater after container failure, the rate of transport of 36Cl in an undisturbed vault, geosphere, and biosphere, and the potential radiological risks to humans. The report also discusses the contribution of 36Cl to potential risk in four intrusion scenarios.

MICROLOG 96-01635 (1 fiche)

Le programme de remboursement des prêts en fonction du revenu représente-t-il une amélioration par rapport au programme actuel de prêts aux étudiants? Cette question fondamentale a fait l'objet d'un débat entre les délégues lors d'un colloque qui a eu lieu à Toronto les 22 et 23 septembre 1994. Les répercussions éventuelles du PRPFR sur l'admissibilité à un prêt, sur l'accès à l'enseignement supérieur et sur les droits de scolarité ont figuré parmi les principaux sujets abordés. Ce document présente un résumé du rapport du colloque sur les PRPFR et exprime les divergences d'opinion.

Real-time knowledge-based systems for the naval situation assessment process

By R.L. Carling. Courcelette, PQ : Defence Research Establishment Valcartier, 1995. 16 p. : *Bibl. At head of title: 7th RMC Symposium/workshop, Applications of Advanced Software in Engineering.*
MICROLOG 96-01819 (1 fiche)

This paper describes a real-time model for naval situation assessment in terms of knowledge-based systems and case-based reasoning systems. The paper also describes the subfunctions of naval situation assessment which will be simulated using these technologies, as well as the real-time inputs and outputs of the situation assessment process. A uniprocessor architecture has been chosen for the system implementation since the scheduling and mapping problems will be less complicated than in the multiprocessor case. The paper analyzes the bounded response times that a uniprocessor system executing these implementations will have to satisfy in order to produce response times within the rapid constraints of anti-air warfare.

Reboisement tardif de plants en récipient sur sol argileux, projet no 4020

Sylviculture Lavérendrye inc., Région : Ouest du Québec ; par Gilles Bastien. Ottawa : Ressources naturelles Canada, Service canadien des forêts, 1994. vi, 16 p. *Sur la couv.: Essais, expérimentations et transfert technologique en foresterie. Financé en vertu de l'Entente auxiliaire Canada-Québec sur le développement économique des régions du Québec.* ISBN 0-662-99909-6 GCC-E no FO29-39/20-1994F
MICROLOG 96-02030 (1 fiche)

Le projet consistait à établir un dispositif expérimental permettant de comparer les résultats obtenus lors d'une plantation effectuée tardivement à ceux d'un reboisement conventionnel. Environ 6 000 plants d'épinettes noires ont été mis en terre sur des sols argileux présentant trois classes de drainage. Les collets de la moitié des plants ont été mis en terre au niveau du sol et l'autre moitié à 3 cm de profondeur. Le dispositif a été établi à quatre périodes différentes de la mi-août jusqu'au début d'octobre. Après une année de croissance, des données sur le taux de survie et le soulèvement, entre autres, ont été recueillies. Le but ultime du projet était de démontrer la pertinence de prolonger la période du reboisement et ainsi offrir de meilleures conditions d'emploi aux travailleurs sylvicoles tout en permettant une utilisation plus rationnelle des équipements.

Red sandstone resources in parts of southeastern New Brunswick : potential source of dimension stone

Geosleuths Exploration Services. Fredericton : Natural Resources & Energy, Minerals & Energy, 1995. iv, 49 p. : *ill., Maps, Bibl.* (Open file report / New Brunswick. Minerals & Energy Division ; 95-2 ISSN 1198-0648) *Fold. maps not filmed. On cover: Canada/New Brunswick Cooperation Agreement on Mineral Development.*
ISBN 1-55137-137-5
MICROLOG 96-01596 (1 fiche)

Red sandstone used to be produced in considerable quantities from quarries in southeastern New Brunswick for use in building construction. Many of these quarries are no longer available as sources of dimension stone material. With the increasing interest in red sandstone for new construction and restoration of buildings, there is a need to evaluate and quantify the dimension stone potential of this material. This report attempts to establish broad exploration guidelines to assist in locating red sandstone deposits of dimension stone potential in southeastern New Brunswick. It reviews the history of red sandstone quarrying in the area, the regional geologic setting, and the geologic setting and sandstone quarries of Westmoreland and Albert Counties. Known, undocumented red sandstone quarries and prospects are evaluated according to such criteria as sandstone color, structural and petrological characteristics, and physical properties.

Reducing urban hunger in Ontario : policy responses to support the transition from food charity to local food security

Toronto : Toronto Food Policy Council, 1994. 38 p. : *Bibl.* (Discussion paper / Toronto Food Policy Council ; 1)
MICROLOG 96-01937 (1 fiche)

Food banks were first seen as an emergency, short-term response to the problem of urban hunger. They are now viewed, at least implicitly, as a cornerstone of society's anti-hunger and anti-poverty strategy. This discussion paper presents an evolutionary series of policy initiatives designed to eliminate the need for food banks. These initiatives recognize both the government's fiscal dilemmas and the responsibility of many sectors of society for both the current problem and the potential solutions. They are rooted in the principles of commun-

ity health promotion, equitable wealth generation, and environmental sustainability. The strategies are in three stages, from the reform of food bank operations, to supports for community food development projects, and to fundamental transformations which require that the policy system integrate different policy fields, including food, agriculture, health, social, and economic policy.

Remote detection of hydrocarbon fuel contaminants in the subsurface

By J.D. Redman, A.P. Annan and S.M. DeRyck. Toronto : Ministry of Environment & Energy, 1995. ii, 154 p. : *ill., Bibl. On cover: Environmental research.* ISBN 0-7778-4679-9
MICROLOG 96-01563 (2 fiche)

To remediate sites contaminated by underground leakage and spills of hydrocarbon fuels, it is necessary to locate the contamination within the subsurface. This has traditionally been done by soil core analyses and groundwater sampling. This report explores alternative techniques based on remote geophysical methods. It describes efforts to model the electrical properties of soil/light non-aqueous phase liquid (LNAPL) mixtures and the electromagnetic response of a LNAPL pool. The report also summarizes experiments in which a fuel spill was modelled and monitored in the laboratory. The investigators conducted a controlled spill of 343 liters of kerosene into a soil-filled test cell and used the following techniques to survey the spill: ground penetrating radar, surface direct-current resistivity, a surface electromagnetic method, in-situ monitoring of resistivity and dielectric permittivity, radon gas sampling, neutron logging, and borehole television monitoring.

Report of the Gove Inquiry into Child Protection in British Columbia

Gove Inquiry into Child Protection (B.C.). Victoria : The Inquiry, 1995. 3 v. *Contents: Vol. 1 : Matthew's story -- Vol. 2 : Matthew's legacy -- vol. 3 : Executive summary.* ISBN 0-7726-2734-7
MICROLOG 96-02095 (10 fiche)

In July 1992, Matthew Vaudreuil died at the age of five and a half years in Vancouver. He was a client of the Ministry of Social Services throughout his life, yet had a life of constant abuse. His death called into question the public's confidence in the province's child protection system and the province accordingly ordered an inquiry into the circumstances of Matthew's death and the practices of the Ministry in the area of child protection. This report is the result of that inquiry. The first volume details Matthew's story, examines what the Ministry did after Matthew died and what senior Ministry management did, reviews the deaths of other children in British Columbia who died in circumstances similar to Matthew's, and summarizes a public consultation on issues relevant to child protection in the province. Volume two examines the context for change in the child protection system, the delivery of child welfare services, and the principles and goals which should dictate policy. The volume concludes with a design of and recommendations for a new child-centered child welfare system.

Report of the Metro Task Force on Cost Savings through Cooperative Activities

Metro Task Force on Cost Savings through Cooperative Activities. Toronto : The Task Force, 1995. 114 p. ONTERIS ON07742
MICROLOG 96-01603 (2 fiche)

In April 1994, the Ontario Minister of Education and Training announced the formation of a task force with the mandate to study cooperative concept and design models for the cooperative delivery of education services in order to increase efficiency and quality of education while reducing costs. The task force also made recommendations for the application of an equitable educational model in Metropolitan Toronto. This report describes the consultations held with stakeholder groups and discusses cooperative initiatives for cost savings under the following headings: consolidated banking; natural gas; information technology; library technical services; purchasing and warehousing; and student transportation. Other sections of the report cover secondary areas of study such as audiovisual services; legislation; and the structure, administration, and policy of a cooperative board.

The Report of the Partnership on Sustainable Coastal Communities and Marine Ecosystems in Newfoundland and Labrador

Partnership on Sustainable Coastal Communities and Marine Ecosystems in Newfoundland & Labrador. St. John's : Newfoundland & Labrador Round Table on the Environment & the Economy ; Ottawa : National Round Table on the Environment & the Economy, 1995. 36 p. : *ill.*
MICROLOG 96-01508 (1 fiche)

This report reviews the findings of a project that examined the fisheries crisis in Newfoundland and Labrador from the perspective of the sustainability of coastal communities and marine ecosystems in the province. The project included meetings with key stakeholders in 13 communities that explored what had made the community sustainable in the past, what made it unsustainable, and what could make it sustainable again in the future. The report summarizes those three issues, with a focus on the cod fishery, as well as community views. and concerns regarding the decline of the cod stocks, lessons learned from past mistakes, the fate of rural coastal communities, the Atlantic Groundfish Strategy, community economic development, youth alienation, and community hardships. The report ends with community views and recommendations on restoring the fishery, economic diversification, cultural and social sustainability, and readjustment of income support programs.

A Report on forest resource issues : an update of the 1990 forest inventory

Charlottetown : Dept. of Agriculture, Fisheries & Forestry, Forestry Division, 1995. 22 p. : *ill.*
MICROLOG 96-02027 (1 fiche)

This report presents updated forest resource information for Prince Edward Island in light of increased forest product exploitation since the province's 1990 Forest Inventory. The update is based on permanent sample plot data, high-altitude infrared photography taken in 1994, an on-site survey of areas harvested over 1990-94, and a combination of these information sources with existing forest inventory data bases. Issues examined using the information collected include the levels of forest product harvests, the sustainability of current harvest levels, the degree of reforestation and monoculture, the types of stands being harvested, forest management practices, and changes in the forest industry over the past 15 years.

Report on OECD's international conference, Women in the City : housing, services and the urban environment

Ottawa : Canada Mortgage & Housing Corporation, International Relations Division, 1994. 18, 19 p. : *Bibl. Bilingual (Compte rendu de la conférence internationale de l'OCDE...).*
MICROLOG 96-01681 (1 fiche)

This paper reports on an important conference entitled "Women in the city: housing, services and the urban environment" which was held at the Organisation for economic Co-operation and Development in Paris, October 4-6, 1994. The conference was organised by the Group on Urban Affairs, the OECD's permanent committee which focuses on urban policy and urban concerns. It was classified a High Level Conference, meaning that some of the national delegations attending the conference were led by Ministers. The conclusions of this conference should be instrumental in precipitating change within OECD and urban governments in their sensitivity towards, and involvement in, gender issues in urban affairs.

Report on the interdepartmental evaluation of the 1991-95 family violence initiative

Ottawa : Health Canada, Policy & Consultation Branch, Program Evaluation Division, 1994. xxvi, 192 p. : *ill., Bibl. French ed. (Rapport de l'évaluation...) : 96-01916/3.*
MICROLOG 96-01915 (3 fiche)

The 1991-95 federal Family Violence Initiative is an interdepartmental effort to address such objectives as enhance national coordination and information exchange on family violence issues, strengthen family violence intervention and treatment services, increase availability of shelters for victims, increase public awareness and prevention actions, and strengthen the legal framework addressing family violence. This report provides a final evaluation of the Initiative as a whole and its individual activities. Information for the evaluation came from a global issues study, evaluation reports from each of the seven funded departments, and quantitative data from surveys. Issues addressed in the evaluation included program relevance, degree of success in achieving program objectives, degree of interdepartmental coordination, and alternatives to the existing Initiative and how it is delivered. The appendix contains evaluation of individual department activities under the Initiative.

Reselling unused cemetery plots

Winnipeg : Manitoba Law Reform Commission, 1995. 13 p. (Report / Manitoba. Law Reform Commission ; no. 88) ISBN 0-7711-1435-4
MICROLOG 96-02068 (1 fiche)

From time to time, a cemetery plot which has been purchased by an individual is never actually used by that person. In cases where the purchaser has forgotten about the plot, or where the purchaser cannot be located, the law in six provinces (Alberta, British Columbia, New Brunswick, Ontario, Prince Edward Island, and Saskatchewan) allows cemetery owners to resell the unused plot. The Manitoba Law Reform Commission that cemetery owners in Manitoba should also be allowed to resell unused plots. This document presents the rationale for such an argument and recommends changes to the current laws to allow cemetery plot reselling under certain safeguards which ensure that the original plot purchaser and his or her family are not prejudiced.

Résolution de problèmes de tournées de véhicules municipaux

Par Sylvain Y. Yelle. Montréal : Université de Montréal, Centre de recherche sur les transports, 1995. 89 p. : *ill., Bibl.* (Publication / Université de Montréal. Centre de recherche sur les transports ; no 95-78)
MICROLOG 96-01728 (2 fiche)

Ce travail dirigé étudie les problèmes de tournées de véhicules municipaux. Il revoit brièvement les deux principales classes de problèmes de tournées sur des graphes : les problèmes de tournées sur les noeuds et les problèmes de tournées sur les arcs. Étant donné que les problèmes de tournées de véhicules municipaux se modélisent en problèmes de tournées sur les arcs, il examine de plus près la théorie, les applications et les méthodes de résolution de ces problèmes. On favorise une méthode de transformation des problèmes et une optimisation avec l'algorithme GENIARC pour leur résolution. Pour la collecte des ordures ménagères et pour le déneigement, on calibre les paramètres de pénalités associés aux déplacements en hors-service, aux virages à gauche, aux virages en U, aux traverses de rues et aux changements de rues. Il s'agit d'une fonction multicritère que l'algorithme tente de minimiser durant l'optimisation d'un parcours. Pour chaque application étudiée, on recommande trois calibrages et on en illustre un avec un parcours. On propose aussi de nouvelles pénalités à considérer lors de l'optimisation de trajets de véhicules municipaux.

Right-to-work study : final report

Alberta Economic Development Authority. Joint Review Committee. Edmonton : The Committee, 1995. v, 80 p. : *ill., Bibl.*
MICROLOG 96-01973 (1 fiche)

This document presents the findings of a committee formed to review the concept of right-to-work (RTW) to assess its economic feasibility for application in Alberta. In the review, RTW legislation is taken to mean legislation that would prohibit employers and employees from agreeing to any form of union shop, closed shop, or dues check-off arrangement. In conducting the review, the committee considered what effect RTW legislation may have in the province, with an emphasis on economic effects. The committee examined the impact of such legislation on a number of employment, job-creation, prosperity, and workplace indicators. Review methodology included a literature review and examination of submissions from employer and employee organizations and interested individuals. The document includes an overview of the Alberta economy and labor relations, evaluation of the implementation and results of RTW in other jurisdictions, and discussion of other considerations such as labor relations stability.

A Safety study of the operational relationship between ship masters/watchkeeping officers and marine pilots

Transportation Safety Board of Canada. Ottawa : The Board, 1995. iii, 48 p. (Report / Transportation Safety Board of Canada ; SM9501) *French ed. (Étude de sécurité portant...) : 96-02026/1.*
ISBN 0-662-23850-8 CCG-P no. TU3-4/9501E
MICROLOG 96-02025 (1 fiche)

Of the 273 occurrences involving vessels in Canadian pilotage waters between 1981 and 1992, 200 involved human factors. A high percentage of those 200 occurrences were identified as being associated with pilots. This study examines the operational relationship between pilots and masters/officers of the watch on Canadian and foreign vessels over 5,000 gross registered tons that are under the conduct of pilots in Canadian pilotage waters. The objective of the study is to identify safety deficiencies associated with teamwork on the bridge, including communications between marine pilots and masters. The study methodology included interviews with representatives of pilotage authorities, the shipping industry, and the Coast Guard; a survey of masters, officers of the watch, and pilots; and a literature review. The study ends with recommendations for improvements in hand-over briefings, communication language, vessel movement monitoring, and teamwork.

MICROLOG 96-01800 (1 fiche)

This paper seeks to determine the factors leading to the satisfaction of the Department of National Defence Research and Development customers, where the customers are seen to be the internal requirement staff and the internal engineering staff charged with implementing any equipment purchase. The study is intended to provide a scientifically based framework and a baseline against which to judge future performance. The study methodology involved a survey of almost 100 respondents, with the choice of questions based on an extensive review of the literature on customer satisfaction. Issues covered by the survey included levels of satisfaction with projects performed, the quality of products and reports delivered, effort put into the project, customer/service provider relations, responsiveness of service provider, and reliability.

This manual is intended to assist school councils in Alberta as they develop partnerships to enhance educational opportunities for the children within their communities. It includes information on the nature of school councils, their roles and responsibilities, procedures for effecting the transition from a parental advisory council to a school council, selecting a decision-making model and a mission for the council, strategic planning, conducting council meetings, communications and conflict resolution, finances, council bylaws, provincial regulations affecting school councils, and resource materials and organizations that can assist school councils. The manual contains such practical implementation tools as a sample constitution, sample bylaws, sample meeting agendas, and various constitution and governance models. A glossary is also provided.

Scientific criteria document for the development of an interim provincial water quality objective for thallium

Prepared by G.L. Stephenson...et al. Toronto : Ministry of Environment & Energy, 1995. viii, 29 p. : *Bibl.* ISBN 0-7778-3127-9
MICROLOG.96-01552 (1 fiche)

The purpose of this document is to derive a provincial water quality objective for thallium, wherever possible using at least a minimum required amount of toxicological information. The document reviews the sources and uses of thallium in Ontario, its properties and fate in the environment, and its detection limits and ambient concentrations. The document also reviews the literature on the toxicity of thallium to aquatic organisms, the bioaccumulation of thallium in aquatic organisms, and the mutagenicity of thallium. The report ends with a description of the derivation of the interim provincial water quality objective for thallium to protect freshwater aquatic life and identifies research required for water quality criteria development.

Screening for health-area benchmarks in British Columbia : the use of vital statistics data

By Leslie T. Foster, Kevin F. Burr and Jemal Mohamed. Victoria : Ministry of Health & Ministry Responsible for Seniors, Division of Vital Statistics, 1994. x, 81 p. : *Maps*, *Bibl.*
ISBN 0-7726-2205-1
MICROLOG 96-01762 (2 fiche)

Health goals for British Columbia have been recommended to be based on areas that have the best rating for a specific health status indicator. This approach results in the development of health benchmarks. This report develops a screening framework for identifying benchmark healthy areas in the province. The framework uses readily available health data based on birth and death registrations collected by the Division of Vital Statistics to develop health status indicators. A series of indicators is combined into separate groupings of health status related to death, lifestyle, and birth. These indicators, in turn, are combined to provide a screening mosaic to identify the healthiest Local Health Areas in the province. Combining indicators in this manner provides a broader approach to measuring health based on broad population health outcomes.

A Search for equilibrium, Centennial Regional High School : Exemplary Schools Project, technical report

By Alexander MacDonald...et al. Toronto : Canadian Education Assn, 1995. 127 p. : *Bibl.*
ISBN 0-920315-93-3
MICROLOG 96-01854 (2 fiche) (Available on fiche only)

This case study was completed as part of a national research study of a sample of secondary schools across Canada that had a reputation for success. The study examines five issues: the meaning and recognition of success; the interaction between the school and its context; the influence of structures, processes, and culture of the school in fostering success; the characteristics of student life in the school; and services provided to students at risk of becoming dropouts. This case study describes the largest English-language high school in Quebec, with over 1,800 students from over 50 cultural backgrounds, located on the south shore of the St Lawrence near Montreal. Chapters of the study describe the economic and political climate in which the school operates, the school's history, the social and academic norms imposed at the school, academic and extracurricular programs, staff and administration, student support for success, and challenges facing the school. The appendix presents the case study methodology.

Securing our food future, an agri-food policy for British Columbia : draft discussion document

Victoria : Ministry of Agriculture, Fisheries & Food, 1995. 22 p. : *ill.*
MICROLOG 96-01653 (1 fiche)

This draft builds on the framework of a background paper on British Columbia agri-food policy by incorporating input from consultation workshops and other sources that reflect additional public views and priorities. It outlines the challenges facing the province's agri-food sector, suggests an appropriate vision for facing those challenges, and presents a set of six strategic objectives for a new agri-food policy. The draft then presents 36 agri-food policy statements, aligned under the headings of the strategic objectives. These policy statements reflect many current policies that exist in legislation, other documentation, and in the culture of the industry and government. The final section discusses the formation of supporting program policies and the implementation of the policies.

Short line railways

By Jerry Richmond. Toronto : Ontario Legislative Library, Legislative Research Service, 1995. 27 p. : *Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 164 ISSN 0835-0299)
MICROLOG 96-01561 (1 fiche)

The major Canadian railways have been abandoning lines in many parts of the country to improve efficiency and profitability. An alternative to line abandonment, which can have adverse affects on communities, is the establishment of short-line railway companies. This paper begins with a review of line abandonment in Canada and the major railways' attitudes to short-line railways. It also outlines the advantage of preserving railway lines by means of short-line railways, both from the point of view of railway users and the railways themselves. The paper then discusses various problems associated with conversion to short-line railways, including economic viability, labor relations (notably union succession rights), and the regulatory process. The paper ends with case studies of short-line conversions and a review of federal and Ontario initiatives with respect to short-line railways.

Size distribution and transport of suspended particles, Athabasca River, February and September, 1993

By B.G. Krishnappan...et al. Edmonton : Northern River Basins Study, 1995. iii, 40 p. : *ill., Bibl.* (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 51 ISSN 1192-3571) ISBN 0-662-23554-1 CCG-P no. R71-49/3-51E
MICROLOG 96-02040 (1 fiche)

This study characterizes the size distribution and transport processes of suspended particles in the Athabasca River below the pulp mill outfall at Hinton, Alberta. The project consisted of two field surveys in winter and fall 1993, measuring the flow field, size distribution of in-situ and dispersed particles, and concentration of particles in the water column over a reach extending from a point 8 kilometers upstream from Hinton to a point 175 kilometers downstream. The data from the two surveys show the effects of the pulp mill effluent on the physical transport characteristics of the ambient sediment. The results indicate the need for an improved sediment transport model.

Skeena River hydroacoustic feasibility study, 1994

By G. Cronkite. Nanaimo, BC : Dept. of Fisheries & Oceans, Science Branch, 1995. v, 53 p. : *ill., Bibl.* (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2311 ISSN 0706-6473) CCG-P no. Fs 97-4/2311E
MICROLOG 96-01784 (1 fiche)

The Tyee test fishery is the major enumeration technique used to manage the Skeena River salmon stocks. Data on salmon migration speed and direction are crucial for understanding the Tyee test fishery. These data can be provided by split-beam sonar systems. This report examines the feasibility of operating a split-beam hydroacoustic salmon enumeration facility on the Skeena River at three sites: the Tyee area, Sankey Point, and upstream of the Copper River. The report reviews the characteristics of each site relevant to hydroacoustic measurements, the test materials and methods, and the relative performance of the measurements, using various sounding techniques, at the three sites.

Social transfers, changing family structure, and low income among children

By Garnett Picot and John Myles. Ottawa : Statistics Canada, Analytical Studies Branch, 1995. 48 p. : *ill., Bibl.* (Research paper series / Statistics Canada. Analytical Studies Branch ; no. 82) *French ed. (Transferts sociaux...) on the same fiche.* ISSN 1200-5223 ISBN 0-662-21741-1 SCC 11F0019MPE
MICROLOG 96-01880 (2 fiche)

The goal of this paper is to investigate a paradox: long term stability in the incidence of low income among children in the face of dramatically declining relative and real earnings and rising earnings inequality among young workers. It begins by describing changes in family income by age and family type since the 1970s. It then assesses the contribution of three factors to the changing economic circumstances of children: declining market earnings; transfer payments; and, the changing characteristics of families in which children live.

Soil bioengineering technical report, Black Ash Creek rehabilitation project, 1992-94

By Richard Grillmayer. Toronto : Ministry of Environment & Energy, 1995. 46 p. : *ill., Bibl. On cover: Collingwood Harbour remedial action plan.*
ISBN 0-7778-4080-4
MICROLOG 96-01539 (1 fiche)

Black Ash Creek is the largest tributary draining into Collingwood Harbour. The creek is a major source of sediment loading to the Harbour due to stream channel alterations coupled with poor land use practices. A rehabilitation project was implemented in 1992 to enhance fish and wildlife habitat in the creek and reduce sediment loading to the Harbour. Project emphasis was on the development and use of innovative techniques that could be used in other areas of concern. This report describes techniques used and evaluated by the project during the 1992 and 1993 field seasons, focusing on soil bioengineering to enhance habitats and stabilize stream banks. Soil bioengineering involves the use of living vegetation as barriers to erosion and as soil reinforcement. The report includes details on such techniques as construction of live-material fascines and the use of live stakes, and also presents project costs.

Source level calibration of the DREA moving coil projector

By John C. Osler and David M. Chapman. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995. v, 30 p. : *ill., Bibl.* (DREA technical memorandum / Defence Research Establishment Atlantic ; 95/215)
MICROLOG 96-01676 (1 fiche)

The Defence Research Establishment Atlantic moving coil projector (MCP) is the principal acoustic source used in low-frequency environmental acoustic and detection experiments. The MCP generates acoustic power at sub-250 Hertz frequencies by displacing water with two pistons which oscillate in phase. The source level of the MCP must be continually monitored since it varies in accordance with the operating state of the projector. Source level as a function of time may be determined by combining measurements of the acceleration of the forward and aft pistons in a suitable manner. This document establishes the methodology to use in this process by comparing at-sea measured transmission loss of carrier-wave signals to theoretical calculations. This comparison reveals the corrections required for the source level derived from the MCP accelerometers at the higher end of its frequency range. the source level derived

State of sustainability : urban sustainability and containment

British Columbia Round Table on the Environment & the Economy. Victoria : The Round Table, 1994. 144 p. : *ill., Bibl.* ISBN 0-7726-2188-8
MICROLOG 96-02084 (2 fiche)

This report is intended to provide British Columbians with a better understanding of their cities, highlight important issues related to sustainability, and recommend actions to contain urban sprawl and make cities into more livable and sustainable places. The first two chapters review highlights of the report, the British Columbia strategy for sustainability, and the framework for sustainability monitoring and reporting. The report then examines the state of urban sustainability and containment in British Columbia and approaches used for monitoring the state of sustainability in urban areas. The subsequent chapter summarizes the state of sustainability of British Columbia cities under five headings: human settlements and population growth, urban environment, urban economy, social well-being, and governance and responsible citizenship. Implications of those findings for urban sustainability are discussed and the report ends with recommendations for ensuring sustainable cities in the province.

Statistical assessment of multivariate techniques for zoobenthic communities and water chemistry for lakes from central Ontario

By Donald A. Jackson and Harold Harvey. Toronto : Ministry of Environment & Energy, 1995. 191 p. : *ill., Bibl. On cover: Environmental research.* ISBN 0-7778-4594-6
MICROLOG 96-01540 (3 fiche)

Ecologists have used a variety of statistical methods to summarize the patterns in their data concerning the distributions and associations of spe-

cies. Multivariate analysis techniques have become increasingly popular in ecological studies but have certain shortcomings. To address this problem, this report examines the relative importance of various aspects of multivariate analysis. It develops a new method of testing for the concordance between data matrices; compares different combinations of data standardization, distance measures, and ordination methods; examines methods of evaluating the underlying dimensionality of multivariate data, including heuristic and statistical methods; and addresses aspects of community-environment concordance and the inter-lake associations based on the different communities. The work focuses on the distributions and associations of fish species and benthic invertebrates in a set of lakes from south central Ontario.

A Status assessment of non-timber resource modelling

Prepared for Canadian Forest Service, Pacific Forestry Centre ; by Werner A. Kurz...et al. Victoria : Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II, 1994. iv, 83 p. : *Bibl.* (Working paper / Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II ; WP-1.5-001)
MICROLOG 96-01485 (1 fiche)

The purpose of this document is to provide an overview of the ongoing activities in the modelling of non-timber resources, with a primary emphasis on those non-timber resources that can be inferred from stand-level information. This review also identifies where non-timber resource models have built on and made use of existing growth and yield information. Examples are included to demonstrate the range of modelling activities that relate to non-timber resource projection for different resources at various spatial and temporal scales. The appendix contains information on 20 models that appeared to be most relevant to the objectives of this review. The information provided includes model name and source, purpose of model, state of development, input data, outputs, spatial and temporal scales, model actions, model type, and critical assumptions of the model.

Status of the fringed myotis in British Columbia

By S.A. Rasheed, S.L. Holroyd and P.F. Garcia. Victoria : Ministry of Environment, Lands & Parks, Wildlife Branch, 1995. viii, 17 p. : *Bibl.* (Wildlife working report / British Columbia. Ministry of Environment, Lands & Parks ; WR-73
ISSN 0831-4330) *On cover: BC Environment.*
ISBN 0-7726-2689-8
MICROLOG 96-01611 (1 fiche)

The fringed myotis (Myotis thysanodes) is a small insectivorous bat. In British Columbia, it occurs at the northernmost extent of its North American distribution and is designated as a vulnerable species. This report describes the general biology of the fringed myotis, including its migration, behavior, and adaptability; its habitat and spatial distribution; observed population size and population trend; legal protection status in British Columbia and the United States; and potential factors, such as habitat loss and climatic extremes, that may affect fringed myotis populations in the province. The report summarizes the special significance of the species and recommends a number of management options to protect the fringed myotis and its habitat.

ISBN 0-7726-2690-1
MICROLOG 96-01612 (1 fiche)

The western small-footed myotis (Myotis ciliolabrum) is the smallest bat in British Columbia. Its range within the province is restricted to arid, low-elevation valleys in the dry interior, and the species is considered to be sensitive or vulnerable. This report describes the general biology of M. ciliolabrum, its habitat, geographic distribution, population size and trend, legal protection status in British Columbia and the United States, and possible factors such as human disturbance and climatic extremes which may affect the bat's abundance. The report reviews the special significance of the species and recommends management options for protecting M. ciliolabrum and its habitat.

MICROLOG 96-01547 (1 fiche)

The western spotted bat (Euderma maculatum) is the only bat in Canada with a readily audible echolocation call. In Canada, it is restricted to arid, low-elevation valleys in the dry interior of southern and south central British Columbia. This bat is designated as a vulnerable species based on its rarity, limited discontinuous distribution throughout its range, and its specialized diet and roosting requirements. This report describes the bat's general biology, habitat, geographic distribution in North America and British Columbia, population size and trend, legal protection status, and factors limiting the size of the bat population. The report ends with a note on the special significance of the species and an outline of management options aimed at protecting the species and its habitat.

The Status of women and employment equity in Ontario school boards : report, 1989

Ontario. Ministry of Education. Toronto : The Ministry, 1990. 83 p. : *ill.* ISSN 1183-0735 ONTERIS ON07746
MICROLOG 96-01602 (1 fiche)

Describes the initiatives undertaken to encourage school boards to reach the established goals for women in positions where they are underrepresented throughout the school system, especially in the positions of supervisory office, principal, and vice-principal. Presents the results for the year of surveying the school boards about their employment equity activities. Boards respond to questions about barriers to the promotion of women that they have identified, strategies on which they are working to remove these obstacles, and suggestions for initiatives to be undertaken jointly with the Ministry. Includes an analysis of female/male employment and a comparative analysis of full-time educational staff.

Stories of micro food enterprises and implications for economic development

Toronto : Toronto Board of Health, Toronto Food Policy Council, 1995. 42 p. : *Bibl.* (Discussion paper / Toronto Food Policy Council ; 5) *Recommendations to Board of Health (4 p.) laid in.*
MICROLOG 96-01935 (1 fiche)

Opportunities for farmers to diversify operations and produce value-added products arise from changes in the food market, including demand for higher-quality food, specially processed foods, ethnic foods, and locally produced food. As mass production systems can fail to meet local and specialized needs, new approaches to take advantage of those opportunities are emerging. Notable among these approaches are micro-scale food enterprises. This report presents 14 case studies of such enterprises, selected to provide a range of experiences, products, and jurisdictions. Each study includes a description of the enterprise, its equipment, marketing initiatives, technical and financial support, social organization, regulatory environment, and opportunities and constraints facing the business. The products of these businesses include specialty fruit and vegetable products, cheese, organic grains, and fish. The report ends with recommendations for encouraging development of the micro-scale food sector.

Strait of Georgia sport fishery creel survey statistics for salmon and groundfish, 1991

By L.D. Collicutt and T.F. Shardlow. Nanaimo, BC : Dept. of Fisheries & Oceans, 1991. vii, 75 p. : *ill., Maps, Bibl.* (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2137 ISSN 0706-6473) CCG-P no. Fs97-4/2137E
MICROLOG 96-01911 (1 fiche)

This report documents the year's catch and effort statistics for the Strait of Georgia tidal sport fishery and presents methodology for collecting these data. Data were derived by combining the results from about 30,000 interviews and over 50 aerial surveys. Estimates are provided for the number of sport fishing boat trips and the catches of chinook, coho, pink, sockeye and chum salmon along with rockfish, lingcod, dogfish and other finfish. Also given are the number of marked (adipose finclipped) and unmarked chinook and coho examined during the creel survey, the age composition of chinook and the length frequency distribution of chinook, coho and lingcod catches. An appendix includes all catch and effort data for each combination of month and statistical area.

Strategic plan, 1995-2000

Prince Edward Island. Dept. of Agriculture, Fisheries & Forestry. Charlottetown : The Dept., 1995. 25 p. : *ill.*
MICROLOG 96-02100 (1 fiche)

The Prince Edward Island Department of Agriculture, Fisheries and Forestry has completed a comprehensive planning exercise to provide a corporate and strategic plan that will guide the Department over the next few years. This plan document begins with an overview of the Department and the province's agriculture, fisheries, and forestry sectors. It then sets out the corporate plan (or the foundation for the strategic plan) by outlining the Department's mission, vision, values, and key elements of the plan. This is followed by the strategic plan, first for the Department as a whole and then for each division with direct responsibility for serving the three primary resource sectors. These strategic plans define each division's goals and outline strategies to achieve those goals. The overall critical issues addressed by the plan include financial resource constraints, global market competition, technological change, and environmental concerns.

Stress corrosion cracking of an aluminum-lithium alloy

By Derek R. Lenard and Darlene S. Starratt. Victoria : Dept. of National Defence, Research & Development Branch, Defence Research Establishment Pacific, 1995. 30 p. : *ill., Bibl.* (Technical memorandum ; 95-11)
MICROLOG 96-01674 (1 fiche)

This paper presents results of tests using the breaking load method to evaluate the susceptibility of 8090-T8771 aluminum-lithium alloy to stress corrosion cracking when exposed to alternate immersion in sea water. The performance of this alloy was compared to that of a conventional aluminum alloy, 7075-T651. The paper describes the breaking load method, the use of Box-Cox transformations in addressing problems with analyzing the test data, and the experimental procedures. Results presented include residual breaking strengths over time. The appendix includes a sample calculation of 99% survival stress and steps for determination of the threshold stress.

A Study of the feasibility of options for adaptive reuse of the old Bathurst post office

Submitted to Steering Committee, Old Post Office Project ; submitted by ADI Limited. Saint John, NB : The Company, 1995. 120 p. : *ill. French ed. (Étude de faisabilité des options...) : 96-01579/2. On cover: Canada/New Brunswick Cooperation Agreement on Planning.*
MICROLOG 96-01578 (2 fiche)

The old Bathurst post office is a historic landmark in downtown Bathurst, New Brunswick. The original building dates from 1884 and was used as a post office, customs house, and armory. This report presents results of an evaluation of the condition of the building and an examination of options for its reuse as a self-supporting property. The assessment of the building's condition focuses on architectural and structural issues. The report also explores community expectations regarding future use of the building as determined from consultations, interviews, and focus group discussions. The reuse options considered include conversion to a completely nonprofit arts and culture center, a completely commercial building, or some combination of commercial and nonprofit use. The options are evaluated in terms of their financial sustainability, heritage impact, socio-cultural impact, economic impact, marketability, and ongoing management requirements. The report ends with an implementation plan for the chosen option.

Suicide in Canada : update of the report of the Task Force on Suicide in Canada -- Rev.

Ottawa : Health Canada, Health Programs & Services Branch, Health Services Directorate, Mental Health Division, 1994. xiii, 205 p. : *ill., Bibl. French ed. (Le Suicide au Canada : mise...) : 96-01928/3.* ISBN 0-662-22993-2 CCG-P no. H39-107/1995E
MICROLOG 96-01927 (3 fiche)

This report presents the results of an updating of a 1987 review of suicide in Canada. After an introduction on the nature of suicide, the report discusses recent data on the extent of suicide in Canada and identifies several factors related to suicide such as biological and psychological factors, sociocultural influences, and environmental factors. The report then discusses strategies and approaches for the reduction and prevention of suicide, including public education, professional intervention, hospital-based services, and suicide bereavement. The final sections review issues related to legislation related to suicide and highlight four areas where further research into suicide is needed. The appendix includes a discussion on First Nations suicides, suicide data collection and certification procedures, and tables of suicide mortality statistics by province or territory, age, and gender.

Summary of public response : Pine Mushroom Task Force recommendations

Victoria : Ministry of Forests, Integrated Resources Policy Branch, 1995. ii, 19 p. : *ill.*
MICROLOG 96-01761 (1 fiche)

This report summarizes the input received from the public on the options and recommendations proposed by the British Columbia Pine Mushroom Task Force for managing the pine mushroom resource in British Columbia. The need for the Task Force was prompted after identification of growing conflicts and potential for environmental damage related to the commercial harvesting of unregulated non-timber resources, pine mushrooms in particular. The respondents to the resulting Task Force review included recreational and commercial wild mushroom harvesters, mushroom buyers and exporters, and an industry association. Issues considered in the review included management and licensing, ecological concerns, resource use conflicts, government revenue, harvesting administration, social and economic issues, resource ownership, health/safety and First Nations concerns, and government agency cooperation.

Summary of reported Atlantic salmon (Salmo salar) catches and sightings in British Columbia and adjacent waters in 1994

By A.J. Thomson and S. McKinnell. Nanaimo, BC : Dept. of Fisheries & Oceans, Biological Sciences Branch, Pacific Biological Station, 1995. iv, 33 p. : *ill., Maps, Bibl.* (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2304
ISSN 0706-6473) CCG-P no. Fs 97-4/2304E
MICROLOG 96-01788 (1 fiche)

In 1991, a joint federal/provincial program was initiated to monitor the presence of Atlantic salmon in British Columbia coastal streams. Based on recommendations following the first season of monitoring, the program was expanded to include monitoring in all B.C. waters (freshwater and marine) and a biological database was established. The monitoring program was established to increase the awareness of the presence of Atlantic salmon in B.C. waters; to expand the reporting of Atlantic salmon; to develop and maintain a database of the number of Atlantic salmon reported and/or observed in B.C., and to prepare an annual report of catches or sightings. The biological sampling of available Atlantic salmon was expanded to include a variety of ageing and growth structures and tissues, and a biological database was also developed. The program was conducted by contacting individuals, mainly fisheries officers, conservation officers, community advisors, hatchery managers, and major commercial fish buyers, advising them to return or report all encountered Atlantic salmon. Catches of Atlantic salmon in the sales slip and mark recovery databases were reviewed also.

A Summary of some studies on Kalmia angustifolia L. : a problem species in Newfoundland forestry

By B.D. Titus, S.S. Sidhu and Azim U. Mallik. St. John's : Natural Resources Canada, Canadian Forest Service, Newfoundland & Labrador Region, 1995. xi, 68 p. : *ill., Bibl.* (Information report / Canada. Forestry Canada. Newfoundland & Labrador Region ; N-X-296 ISSN 0704-7657)
ISBN 0-662-22920-7 CCG-P no. Fo46-15/296E
MICROLOG 96-01584 (1 fiche)

The shrub known as sheep laurel or lambkill (Kalmia angustifolia L.) is commonly found as an understory component of black spruce forests, and can proliferate rapidly after stand disturbances. Subsequent regeneration and growth of spruce on Kalmia-dominated sites is often poor, and a greater understanding of the ecology of Kalmia and its interactions with black spruce is required for the management of such sites. This report reviews a series of field, greenhouse, and laboratory studies on the biology of Kalmia. It describes the phytological associations of the shrub in Newfoundland, its method of reproduction and propagation, seed germination requirements, soil requirements for adequate regeneration, and histology. Study results reported include the factors inhibiting black spruce growth by Kalmia and the response of Kalmia to control treatments. The report concludes with silvicultural recommendations to address the Kalmia problem.

Survey of piscivorous birds of the Nechako and Stuart Rivers, British Columbia

By Thomas G. Brown, E. White and L. Rzen. Nanaimo, BC : Dept. of Fisheries & Oceans, Biological Sciences Branch, Pacific Biological Station, 1995. vi, 26 p. : *ill., Bibl.* (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2285
ISSN 0706-6473) CCG-P no. Fs 97-4/2285E
MICROLOG 96-01786 (1 fiche)

The Department of Fisheries and Oceans has made counts and observations of birds within the Nechako and Stuart rivers within a commitment to examine the potential impacts of reduced flows and altered temperatures on predation of juvenile chinook salmon prior to water diversion due to the Kemano Completion Project. This report reviews the availability to feeding birds of juvenile chinook within those rivers and presents results of bird count surveys completed between May and October 1991, prior to completion of the water diversion project. The investigators used a simple feeding model to rank the potential impact of each bird species on juvenile chinook salmon. Impact results are presented for such species as the merganser, belted kingfisher, black tern, osprey, loon, gulls, great blue heron, and bald eagle. The appendix contains a literature review concerning piscivorous birds.

Survey of retail food outlets in three neighbourhoods, Regent Park/Moss Park, South Parkdale and Davisville, in the City Toronto, August 1995

To: Board of Health. Toronto : Toronto Public Health Dept., 1995. 9 p.
MICROLOG 96-01938 (1 fiche)

In order to evaluate the access to food in low-income neighborhoods, city investigators conducted a survey of food stores in three Toronto neighborhoods (Davisville, Regent Park/Moss Park, and South Parkdale). The average cost of ten basic food items in three convenience stores within each neighborhood was compared against large supermarket prices in those same neighborhoods. This report presents statistics on the demographics of those neighborhoods, including indicators chosen to highlight some of the differences among those neighborhoods that relate to an individual's or family's ability to access appropriate and affordable food. It also includes data on the distribution of different classes of retail food stores in each neighborhood, as well as the results of the food cost survey.

Sustainable development and academic institutions : issues in interdisciplinary learning

Ottawa : National Round Table on the Environment & the Economy, Education Task Force, 1995. 31 p. : *Bibl.* (Working paper / National Round Table on the Environment & the Economy (Canada) ; no. 26)
MICROLOG 96-01735 (1 fiche)

Education has been recognized as an important tool for achieving a sustainable future. This report presents an overview of post-secondary environmental education in Canada and highlights the issues and recommendation identified by teaching faculty in workshop discussions and telephone interviews. It begins with background on environmental education in Canada and the development of international recognition of the importance of environmental education for sustainable development. The report then reviews the state of Canadian university environmental education programs by degree type, primary orientation, organizational structure, and demand. Key issues in university environmental and sustainable development education are discussed: the distinction between environmental studies and environmental education, interdisciplinarity, institutional support, university structure, program organization, curriculum and teaching, community involvement, and educational resources.

Sustainable residential developments, planning, design and construction principles : greening the Grow Home

Avi Friedman...et al. Ottawa : Canada Mortgage & Housing Corporation, 1993. 163 p. : *ill.*, *Maps*, *Bibl.*
MICROLOG 96-01736 (2 fiche)

This study investigates a broad range of issues related to planning, design, and construction of sustainable residential developments, using the Grow Home (a type of narrow-front rowhouse) as a case study. The first part of the study addresses several aspects of the housing unit, ranging from general planning approaches through design and detailing of the building envelope. Topics covered in this part include water-efficient landscapes and plumbing, responsible domestic waste disposal, and good indoor air quality. The effect of specific building systems, components and materials on the environment through their life cycle is also examined. The second part focuses on creation of sustainable communities which are resource-efficient, ecologically sound, pleasant, and functional. Topics include site planning, outdoor spaces, parking, environmental comfort, and housing identity. The third part illustrates three examples of urban developments with varying densities, housing types, and planning approaches.

Le Système canadien d'aides à la navigation

Ottawa : Garde côtière canadienne, Direction des services à la navigation maritime, 1995. 59 p. : *ill.*, *Cartes géogr. L'éd. anglaise: (The Canadian aids to navigation system) : 96-01824/1.*
MICROLOG 96-01826 (1 fiche)

Les aides à la navigation sont des dispositifs ou des ensembles, extérieurs aux navires, établis pour aider le navigateur à déterminer sa position et son cap, pour l'avertir de la présence de dangers ou d'obstacles, ou pour le conseiller sur le choix du meilleur trajet ou du trajet préférable. Ce document porte précisément sur le système canadien d'aides à la navigation. Les points qui y sont abordés sont les suivants : réglementation connexe; aides à la navigation de la Garde côtière; autres aides à la navigation de la Garde côtière; autres aides à la navigation de l'État; aides privées à la navigation; caractéristiques des feux de balisage canadiens; aides flottantes à la navigation (Bouées); aides fixes à la navigation; aides radio à la navigation; et, publications connexes et sources.

Systems integration study of a hierarchical minefield image analysis algorithm : report to end phase 2

By Richard C. Vu and Mabo R. Ito. Ralston, AB : National Defence, Defence Research Establishment Suffield, 1994. 23 p. : *ill.*, *Bibl.* (DRES contractor report / Defence Research Establishment Suffield ; CR 94-35)
MICROLOG 96-01815 (1 fiche)

As part of a research program on the feasibility of the remote sensing of minefields, the use of an image processing system in minefield detection has been investigated. In that investigation, various algorithms are tested and their effectiveness is measured. This report focuses on the investigation of the high level of the Remote Minefield Detection hierarchical algorithm, target spatial analysis. The study involves identifying suitable pattern recognition techniques and selecting appropriate system architecture, expert system, and transputer network for the task. The report introduces the scope of the knowledge base used for construction of the expert system and proposes a testing methodology for evaluating the performance of both the expert system and the knowledge base.

Table de calcul des facteurs d'équivalence (FE)

Québec : Gouvernement du Québec, Commission administrative des régimes de retraite et d'assurances, 1993. 63 p. ISBN 2-550-28338-4
MICROLOG 96-01507 (1 fiche)

En août 1990, la Commission administrative des régimes de retraite et d'assurances vous transmettait un document intitulé "La réforme de l'aide fiscale à l'épargne-retraite - Calcul et déclaration des FE et FESP pour les régimes suivants : RREGOP, RRE, RRF, RRCE", lequel visait à apporter certaines précisions concernant le calcul et la déclaration des FE et des FESP. Ce document se penche sur la question et examine les points suivants : calcul du facteur d'équivalence (FE) applicable au RRE, au RRF, au RREGOP et au RRCE pour l'année 1993; exemples de calcul du FE selon la table au moyen des données de la déclaration annuelle; et, cas particuliers.

A Tabu search algorithm for the capacitated shortest spanning tree problem

By Yazid M. Sharaiha...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1995. ii, 20 p. : *ill.*, *Bibl.* (Publication / Université de Montréal. Centre de recherche sur les transports ; no. 95-79)
MICROLOG 96-02003 (1 fiche)

The capacitated shortest spanning tree problem consists in determining a shortest spanning tree in a vertex weighted graph such that the weight of every subtree linked to the root by an edge does not exceed a prescribed capacity. The problem arises naturally in the design of telecommunication and energy networks in which the total flow passing through edges incident to the center is limited. In addition, the problem can be used to provide a lower bound to the solution of capacitated vehicle routing problems. This paper proposes a tabu search heuristic for this problem, as well as dynamic data structures that speed up the algorithm. The paper includes information on the computer implementation of the algorithm as well as computational results on new randomly-generated instances and on instances taken from the literature.

A Tabu search heuristic for periodic and multi-depot vehicle routing problems

By Jean-François Cordeau, Michel Gendreau and Gilbert Laporte. Montreal : Université de Montréal, Centre de recherche sur les transports, 1995. 124 p. : *Bibl.* (Publication / Université de Montréal. Centre de recherche sur les transports ; no. 95-76)
MICROLOG 96-01738 (2 fiche)

This paper presents a tabu search heuristic capable of solving three important variants of the classical vehicle routing problem (VRP): the periodic VRP, the periodic traveling salesman problem, and the multi-depot VRP. The authors first formulate the periodic VRP and then show how the same formulation can be used to describe the other two VRPs. The tabu search algorithm proposed features the use of the GENI heuristic (Gendreau, Hertz, and Laporte, 1992) to perform insertions of unrouted customers or removals of customers from their current routes and their reinsertions in different routes. The paper includes a step by step description of the search algorithm, sensitivity analyses performed on the five user-controlled parameters of the algorithm, and computational results on instances of the three VRPs taken from the literature. The performance of the proposed method is compared to that of existing heuristics.

Teachers' work : changing patterns and perceptions in the emerging school systems of 19th and early 20th century central Canada

By Marta Danylewycz and Alison Prentice. Toronto : Ontario Institute for Studies in Education, 1985. 37 p. : *Bibl. At head of title: Canadian Women's History Project, appendix 2.* ONTERIS ON07208
MICROLOG 96-01605 (1 fiche)

This paper discusses the crucial years in the 19th and early 20th centuries when state school systems were in the process of being established and teacher work forces were becoming disproportionately female across Quebec and Ontario. The paper focuses on the actual work of teachers in the schoolroom, as it appears to have been understood and as this understanding changed during the crucial years of school system development. Aspects of teachers' work considered in the paper include the introduction of new subjects, the increase in school paperwork, the work of supervision and being supervised, working conditions in the schools, school maintenance and housekeeping, and perceptions of the woman teacher's ambiguous position. The paper includes excerpts of teachers' contracts from the 19th century.

Technical and cost assessments of potential control options for TRS emissions from Ontario sources : final report

SENES Consultants Ltd. Toronto : Ministry of Environment & Energy, 1995. 314 p. : *ill., Maps, Bibl.* ISBN 0-7778-4675-6
MICROLOG 96-01548 (4 fiche)

The Ontario environmental ministry has identified Kraft pulp mills, steel mills,and silicon carbide abrasive manufacturing as the three industry sectors in which it would be desirable to control total reduced sulfur (TRS) emissions. This report presents results of a TRS control study of three Ontario pulp mills, two steel mills, and one abrasives manufacturer. It documents existing control equipment for each of the TRS emission sources at each facility, identifies the available control options for each process emission source, notes the TRS removal efficiency of each option, and calculates the costs for generic control equipment using standard cost evaluation techniques. The appendix contains a list of control equipment suppliers, details of pulp mill dispersion modelling, detailed control costs for pulp mills, and data on emissions and control costs at coke oven batteries in the United States.

Technology use, training and plant-specific knowledge in manufacturing establishments

By John R. Baldwin, Joanne Johnson and Tara Gray. Ottawa : Statistics Canada, Analytical Studies Branch, 1995. 46 p. : *Bibl.* (Research paper series / Statistics Canada. Analytical Studies Branch ; no. 86) *French ed. (L'Utilisation de la technologie...) on the same fiche.*
ISSN 1200-5223 ISBN 0-660-15592-3
SCC 11F0019MPE
MICROLOG 96-01876 (1 fiche)

This study examines the factors influencing a firm's decision to train, using data taken from several recent Statistics Canada surveys that explore advanced technology use by Canadian manufacturing plants. Advanced technology adoption has been both rapid and pervasive, leading to concerns about whether technology use is associated with an increase or a decrease in workers' skills. Based on the data collected through two surveys, this paper examines the relationship between technology use and the skill level of workers. It does so by first reporting on the opinions of managers of Canadian manufacturing establishments, who indicate that technology use leads to skill increases. Second, this paper examines the relationship between a plant's decision to train and certain other characteristics of the plant, including its technology use. Third, it investigates the factors related to the location of training in order to determine whether the training done by plants imparts primarily generic skills or plant-specific skills. Finally, it reports on survey results that show plants that introduced new technologies had to increase their expenditures for training.

Till lithology and geochemistry in the Waterford area, New Brunswick

By Matthew D. Munn. Fredericton : Natural Resources & Energy, Minerals & Energy, 1995. viii, 171 p. : *Maps, Bibl.* (Open file report / New Brunswick. Minerals & Energy Division ; 95-4 ISSN 1198-0648) ISBN 1-55137-654-7
MICROLOG 96-01577 (2 fiche)

This report presents results of an examination of the lithologic and chemical constituents of glacial tills in an area of southeastern New Brunswick. The author sampled tills and examined soil characteristics on a two-kilometer grid interval and also examined archival till samples form the study area. Using these samples, the areal distribution of matrix chemical elements and indicator clast lithologies were analyzed and compared by spatial plots of component concentration; components were also compared using Pearson correlations. Subsidiary goals of the investigation included the examination of till component dispersion patterns for indicators of single or multiple paleo-ice flow directions, and to describe the surficial cover in the area and its relationship to the underlying bedrock. Results reported include statistical correlations among till chemical elements.

Tolerance times for continuous work tasks while wearing NBC protective clothing in warm and hot environments and the strategy of implementing rest schedules

By T.M. McLellan. North York, ON : National Defence, Defence & Civil Institute of Environmental Medicine, 1994. 16 p. : *Bibl.* (DCIEM publication / Defence & Civil Institute of Environmental Medicine (Canada) ; 94-62)
MICROLOG 96-01816 (1 fiche)

Canadian Forces personnel must be able to sustain operations in an environment contaminated with nuclear, biological, and/or chemical (NBC) agents. However, because of the thickness and low vapor permeability of the required protective clothing, there is considerable heat strain associated with wearing full NBC protection in warm and hot environments. This report provides an updated analysis of the relationship between tolerance time while wearing the NBC clothing and the work intensity at ambient temperatures of 30 and 40 degrees C. The report presents the mathematical function which is used to describe that relationship and which defines an infinite tolerance time at a specific work intensity. It also proposes a strategy for implementing work and rest schedules for achieving tolerance times of one to five hours in full NBC protective clothing.

Toward a Yukon forest management policy : discussion paper

Whitehorse : Yukon Renewable Resources, Policy & Planning Branch, 1995. 21 p.
MICROLOG 96-02059 (1 fiche)

The Yukon government intends to develop a forest management system for the territory in consultation with the general public, First Nations, renewable resource councils, and stakeholders. This discussion paper is intended to identify policy goals and principles that Yukoners wish to achieve through a Yukon government forest management policy, and to assist in defining the framework for the development of a draft policy. The paper begins with background information on key forestry issues. It then outlines the strategic directions for a forest management policy and the components necessary for such a policy. Those components include stewardship of forest ecosystems, sustainable use of forest resources, economic development, and environmental protection.

Traffic collision statistics report, 1994

Winnipeg : Manitoba Highways & Transportation, 1995. viii, 172 p. : *ill.*
MICROLOG 96-02101 (4 fiche)

The Dept. of Highways and Transportation through the Division of Driver and Vehicle Licencing and Traffic Engineering Branch has the responsibility for the collection of all traffic collision data in Manitoba. This traffic collisions statistical report consists of two distinct parts. Part 1, Driver, Vehicle and Traffic Collision Statistics Report, is comprised of eleven sections; historical trends, licenced drivers, vehicle registrations, and alcohol-related criminal code convictions, utilizing information from the Driver and Vehicle Licencing's master file. Accident data obtained from the traffic accident reports form the basis for the following section; traffic collisions, collision victims, pedestrian victims, vehicle involvement, driver involvement, contributing factors and off-road vehicle collisions. The second part, Traffic Engineering Branch, is comprised of three sections; provincial highway collisions, construction-related collisions, and intersection collision data.

Training for what?

British Columbia Labour Force Development Board. Victoria : The Board, 1995. 54 p. : *ill. Executive summary (12 p.) laid in.*
ISBN 0-7718-9450-3
MICROLOG 96-01662 (1 fiche)

This report addresses three main questions: where work will be in the future, what skills will be required for this work, and how can British Columbia best organize its learning system to meet those skills needs. The report begins with an examination of current economic, labor market, and fiscal realities in British Columbia, including the growth in small business and self-employment, global competition, rising unemployment, workforce diversity, and government spending cuts. It also discusses future challenges brought about by those new realities, with reference to projections of future employment, occupational requirements, and characteristics of the learning system. The report then identifies five gaps (in skills, diversity, relevance, capacity and funding, and accountability) and makes recommendations to bridge those gaps. The report ends with six policy directions for realizing the vision of a successful workforce and learning system.

Transferts sociaux, variations dans la structure familiale et faible revenu chez les enfants

Par Garnett Picot et John Myles. Ottawa : Statistique Canada, Direction des études analytiques, 1995. 49 p. : *ill., Bibl.* (Documents de recherche / Statistique Canada. Direction des études analytiques ; no 82) *L'éd. anglaise (Social transfers...) sur la même fiche.*
ISBN 0-662-99192-3 SCC 11F0019MPF
MICROLOG 96-01880 (2 fiche)

Cette communication vise à élucider un paradoxe : une stabilité à long terme dans la fréquence du faible revenu chez les enfants en face d'un recul draconien des gains relatifs et réels et de l'accroissement de l'inégalité des gains parmi les jeunes travailleurs. Nous commençons par décrire les changements subis par le revenu familial, selon l'âge et le type de famille, depuis les années 70. Par la suite, nous évaluons la contribution de trois facteurs à la transformation des circonstances économiques des enfants : recul des gains du travail; paiements de transfert; et, mutation dans les caractéristiques des familles au sein desquelles vivent les enfants.

The Trust provisions in the Perpetuities and Accumulations Act

Winnipeg : Manitoba Law Reform Commission, 1995. I, 17 p. (Report / Manitoba. Law Reform Commission ; no. 89) ISBN 0-7711-1437-0
MICROLOG 96-02069 (1 fiche)

Real property can be held in successive interests, with one interest taking effect after the other has ended. The most common example is the life estate, in which the life tenant enjoys the property only for the duration of his or her life; on the death of the life tenant, the holder of the remainder interest (the remainderman) becomes entitled to the property. In Manitoba, the 1983 enactment of the Perpetuities and Accumulations Act brought about important changes in the nature of the life tenant-remainderman relationship, notably that the property is considered to be held in a trust for the benefit of the successive interest holders. This report considers the effect of that change on the operation of certain other statutes and considers whether they should now be repealed. The report also discusses certain other effects on the powers of trustees and on land titles practice.

The United Nations Conventional Arms Register : an annotated bibliography

Ottawa : Foreign Affairs & International Trade Canada, 1995. i, 80 p.
MICROLOG 96-01709 (1 fiche)

The Register of Conventional Arms, established by the United Nations in 1991, involves voluntary submission by member states of data on international transfers of seven defined categories of armaments. It also encourages the provision of data on national holdings, procurement of weapons from national production, and other relevant policies. This bibliography has been prepared to assist government officials and researchers in their efforts to enhance the transparency of global and regional arms trade and to promote greater use of the Register by member states. The first part of the bibliography annotates United Nations documents and resolutions relevant to the creation and maintenance of the Register, arranged in chronological order. The second part annotates publications which offer substantive comment on the scope and performance of the Register. The appendix contains the text of the resolution that founded the Register. Includes author and keyword indexes.

L'Utilisation de la technologie, la formation et les connaissances spécifiques dans les établissements de fabrication

Par John R. Baldwin, Joanne Johnson et Tara Gray. Ottawa : Statistique Canada, Direction des études analytiques, 1995. 43 p. : *Bibl.* (Documents de recherche / Statistique Canada. Direction des études analytiques ; no 86) *L'éd. anglaise (Technology use...) sur la même fiche.*
ISSN 1200-5231 ISBN 0-660-94642-4
SCC 11F0019MPF
MICROLOG 96-01876 (1 fiche)

Cette étude traite des facteurs qui influent sur la décision de l'entreprise de former le personnel à la lumière des données de plusieurs enquêtes récentes de Statistique Canada, qui portaient sur l'utilisation des technologies de pointe dans les entreprises de fabrication canadiennes. Devant la rapidité avec laquelle ces technologies se sont répandues, certains se sont demandé si elles ont rehaussé ou abaissé le niveau de qualifications des travailleurs. À partir des données recueillies dans le cadre de deux enquêtes, nous étudions le rapport entre l'utilisation des technologies et le niveau d'aptitude des travailleurs. Nous faisons d'abord rapport sur l'opinion de directeurs d'établissements de fabrication canadiens, qui indiquent que l'utilisation des technologies entraîne une amélioration des qualifications. Ensuite, nous analysons le rapport entre la décision d'une usine de former son personnel et certaines autres caractéristiques de l'usine, notamment l'utilisation des technologies. Puis, nous examinons les facteurs relatifs au lieu de la formation pour déterminer si la formation offerte dans les usines inculque principalement des qualifications génériques ou des qualifications spécifiques à l'usine. Enfin, nous faisons rapport sur les résultats des enquêtes, selon lesquels les usines qui ont implanté de nouvelles technologies ont dû accroître leurs budgets de formation.

Utilisation des technologies de pointe dans les établissements de fabrication

Par John R. Baldwin et Brent Diverty. Ottawa : Statistique Canada, Direction des études analytiques, 1995. 34 p. : *Bibl.* (Documents de recherche / Statistique Canada. Direction des études analytiques ; no 85) *L'éd. anglaise (Advanced technology use...) sur la même fiche.*
ISSN 1200-5231 ISBN 0-660-94639-4
SCC 11F0019MPF
MICROLOG 96-01877 (1 fiche)

Ce document analyse les caractéristiques des usines canadiennes de fabrication qui sont associées à l'utilisation des technologies de pointe. Les données employées sont tirées de l'Enquête sur les technologies de la fabrication de 1989 et sont liées aux données administratives du Recensement des manufactures. Par définition, l'utilisation de la technologie renvoie d'une part, à la fréquence (le fait d'utiliser la technologie) et d'autre part, à l'intensité (le nombre de technologies employées). Ces variables sont ensuite analysées à la lumière d'un certain nombre de caractéristiques qui représentent les compétences de l'usine, soit sa taille, la taille de l'entreprise mère, la croissance récente de l'usine, le nombre de branches d'activité où l'entreprise mère est présente, son âge et sa nationalité. Enfin, les résultats sont comparés avec ceux de plusieurs études américaines récentes.

Vérification de la gestion de l'information et de la technologie : version provisoire pour mise à l'essai

Ottawa : Bureau du vérificateur général du Canada, 1994. vi, 44, vi, 38 p. : *Bibl. Bilingue (Auditing of information management...). En tête du titre: Guide de vérification 22.*
MICROLOG 96-01459 (2 fiche)

Ce document se veut un guide pour les vérificateurs qui effectuent des vérifications de la gestion de l'information et de la technologie de l'information (TI) dans leurs propres entités. Nous y présentons des objectifs de vérification des contrôles et d'optimisation des ressources afin d'aider les vérificateurs à déterminer l'importance des constatations en matière de TI et l'étendue de la vérification. Il faudrait consulter ce guide lorsqu'on examine des systèmes d'information par rapport à des vérifications de programme, lorsqu'on évalue le risque associé à des systèmes d'information et lorsqu'on planifie la vérification d'un service de gestion de l'information.

Vision 2000 : quality and opportunity, a summary : the final report of Vision 2000, a review of the mandate

Toronto : Ministry of Colleges & Universities, 1990. iii, 43 p. : *Bibl. On cover: A review of the mandate of Ontario's colleges.*
ISBN 0-7729-7208-7 ONTERIS ON07745
MICROLOG 96-01601 (1 fiche)

This document summarizes Vision 2000: quality and opportunity, a report on the quality of career education in Ontario's college system and the enhancement of student opportunities for participation. The document reviews the evolution of the Ontario college system, outlines new realities and challenges facing the system, and proposes a renewed mandate for future development of the system. Further sections of the document discuss key proposals and issues featured in the report. The proposals and issues relate to such matters as quality assurance, the enhancement of educational and employment opportunities, the forging of links between partners in the Ontario educational system, strategic planning, funding, and development of human resources. The appendices include lists of Vision 2000 Steering Committee and study team members, lists of background papers, and a summary of recommendations.

Water quality monitoring strategy for the Forest Practices Code of British Columbia

By Edward T. White and Colin J. McKean. Victoria : Ministry of Environment, Lands & Parks, Environmental Protection Dept., Water Quality Branch, 1995. 19 p. : *Bibl. On cover: BC Environment.* ISBN 0-7726-2578-6
MICROLOG 96-01684 (1 fiche)

To facilitate compliance with the Forest Practices Code of British Columbia and its accompanying regulations, the Ministry of Environment, Lands and Parks is proposing a water quality monitoring strategy that would apply only to streams which feed community water supplies and which could be affected by forestry. The strategy includes continuous automated monitoring and basic parameters by which to measure forestry impacts. This document is a discussion paper intended to initiate a dialogue with stakeholders to ensure that the strategy achieves its goals and objectives. The strategy proposes a tiered approach: reconnaissance (Level 1); preliminary assessment (Level 2), and detailed assessment (Level 3). The document reviews the basic monitoring parameters suggested, proposed data collection and analysis procedures, data quality control and assurance, and a proposed partnership arrangement to implement the strategy.

Water resources use and management issues for the Peace, Athabasca and Slave River basins : design of questionnaire and survey methods

Golder Associates. Edmonton : Northern River Basins Study, 1995. iv, 67 p. (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 58 ISSN 1192-3571)
ISBN 0-662-23561-4 CCG-P no. R71-49/3-58E
MICROLOG 96-02036 (1 fiche)

The Northern River Basins Study Board will be formulating recommendations covering many areas likely of consequence or interest to basin residents. To assist the Board in this task, a series of projects was initiated to survey the residents on their use of northern river basins waters. Existing information was either not available or as extensive as required. This report details the background work undertaken to devise a survey instrument and strategy to capture for households a representative cross-section of information on water use and resident attitudes toward the water resource. The report also assesses the most effective means for approaching and obtaining information from stakeholder groups. The appendix includes the project terms of reference, a description of how the population stratification method could be applied for the survey, and a draft questionnaire.

Water resources use and management issues for the Peace, Athabasca and Slave River basins : stakeholder screening survey

By Tony Hoare. Edmonton : Northern River Basins Study, 1995. v, 62 p. : *ill.* (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 57 ISSN 1192-3571)
ISBN 0-662-23560-6 CCG-P no. R71-49/3-57E
MICROLOG 96-02035 (1 fiche)

The Northern River Basins Study Board will be formulating recommendations covering many areas likely to be of consequence or interest to basin residents. To assist the Board in this task, a series of projects was initiated to survey the residents on their use of northern river basins waters. This report details the efforts undertaken to develop a list of stakeholders that should be approached for input in a workshop setting. These efforts included designing a stakeholder questionnaire, conducting a telephone survey, and analyzing the data. It also reviews the survey results, including the types and membership of stakeholder groups, use of river basins, water management and water use concerns, and preferred location and time of the proposed workshops. The appendix includes a copy of the questionnaire and a directory of stakeholder groups in the survey sample (by category).

Waterloo Centre for Groundwater Research : Annual report 1994-95

Waterloo, ON : The Centre, 1995. 38 p. : *ill.*
MICROLOG 96-01918 (1 fiche)

This Ontario Centre of Excellence promotes the development of the groundwater industry, fosters international awareness of groundwater technology & expertise, trains qualified professionals, pursues a fundamental understanding of the processes that govern the occurrence & quality of groundwater resources, & applies this understanding to the development & protection of groundwater resources, particularly to the implications of subsurface waste management on groundwater quality. Following messages from the chair & the director this report discusses issues & impacts of research, & reviews operations, including resource allocation & funding. Next, activities of the business liaison & communication program are described. Research themes are listed as are individual expenditures. Financial statements conclude the document. Themes covered include the following: contamination by organic chemicals (petroleum hydrocarbons, pesticides/fertilizers, chlorinated solvents, bioremediation), environmental geochemistry, groundwater resources/protection, mathematical modelling, geophysics/engineering geology, & deep basin/fractured-rock hydrology.

Well-being, results of the Bradburn Affect Balance Scale in the 1991 survey on ageing and independence

By Jennifer L. Smith. Ottawa : Health Canada, Health Programs & Services Branch, Health Services Directorate, Mental Health Division, 1995. xii, 157 p. : *ill., Bibl. French ed. (Bien-être, résultats de l'intégration...) : 96-01924/2.*
ISBN 0-662-22616-X CCG-P no. H39-310/1995E
MICROLOG 96-01923 (2 fiche)

The Bradburn Affect Balance Scale is a space- and time-efficient measure of positive affect (or well-being) a measure of negative affect, and an indication of emotional balance. This report presents results of an analysis conducted to examine the factors affecting the emotional well-being of Canadians, 45 years or older, using the Bradburn scale. In particular, the analysis uses multiple regression to determine whether significant age and gender effects exist throughout the aging process, and how these and other variables may impact on the emotional well-being of today's and tomorrow's seniors. The analysis is based on data derived from the 1991 Statistics Canada Survey on Aging and Independence. Facets of well-being examined include demographic factors, health indicators, life experiences, labor force participation, living arrangements, economic status, degree of social support, and personal transportation and travel arrangements.

Westside Marsh : interim report

Toronto : Waterfront Regeneration Trust, 1995. 33 p. : *Maps*
MICROLOG 96-01519 (1 fiche)

St Marys Cement has a license to quarry in a Lake Ontario waterfront area in the Municipality of Clarington. The area of interest has important limestone resources but also contains a highly valued wetland. In view of the importance of the limestone resource to the cement company, the economic importance of the company to the Municipality, and the environmental and other concerns relating to the potential loss of wetland, the company and the Municipality requested assistance from the Waterfront Regeneration Trust to help find a resolution for several issues related to the company's planned developments in the area. This report summarizes the steps leading to a public meeting to discuss those issues, the Trust's concept for resolving the issues, the responses received, and a process to address the outstanding issues.

What is happening to earnings inequality in Canada?

By René Morissette, John Myles and Garnett Picot. Ottawa : Statistics Canada, Analytical Studies Branch, 1993. 49 p. : *ill., Bibl.* (Research paper series / Statistics Canada. Analytical Studies Branch ; no. 60)
MICROLOG 96-02019 (1 fiche)

Data from the Survey of Consumer Finances show that inequality in annual earnings has increased in Canada during the 1980s. The first section of this paper studies this inequality and examines to what extent it was due to the 1980-83 recession. Section two documents the rise in earnings inequality, highlighting four points: shifts in the composition of employment; earnings differentials among age groups; earnings differentials among education levels; and the extent of earnings inequality within groups of compatible workers. The third section studies changes in the distribution of annual earnings as a factor influencing the changes in earnings inequality. The paper ends with various explanations for the changes observed in the distribution of working time and a discussion of alternative strategies to guide future analyses.

Where are Ontario's jobs? Labour market trends, 1989-94

By Anne Anderson. Toronto : Ontario Legislative Library, Legislative Research Service, 1995. 22 p. : *ill., Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 163 ISSN 0835-0299)
MICROLOG 96-01551 (1 fiche)

This paper presents a statistical examination of the Ontario labor market over 1989-94 and identifies industrial or occupational trends in employment since 1989. The paper first describes the data underlying the statistics and the methodology used. Subsequent sections describe the industrial structure of the labor market as it was in 1989, how it has changed to 1994, and the characteristics of the jobs that are being created. The changes observed include broad sectoral changes and changes within manufacturing and service sectors. Findings are included regarding earnings in selected industries, the relation of employment to educational attainment, and the extent of part-time employment and self-employment. The paper concludes with a discussion of the implications of the findings for wealth creation, tax revenues, and education and training.

Wind effects on ship capsize risk

By Kevin A. McTaggart. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995. viii, 82 p. : *ill., Bibl.* (DREA technical memorandum / Defence Research Establishment Atlantic ; 95/204)
MICROLOG 96-01808 (1 fiche)

In support of a project to evaluate the dynamics of ship capsize, Defence Research Establishment Atlantic has developed a method for predicting ship capsize risk. The method has been implemented using the FREDYN program. This memorandum examines the wind model used in FREDYN and presents a method for predicting capsize risk in waves and wind. A case study on a frigate illustrates the influence of wind collinear with waves on capsize risk. The appendices describe the subroutine version of FREDYN, the program FITHLIM used for computing capsize wave heights, and the program PCAPSIZE for computing capsize risk from capsize wave height. Sample computations are included.

Workshop on water quality modelling for the Northern River Basins Study : proceedings

By Joseph M. Culp and Patricia A. Chambers. Edmonton : Northern River Basins Study, 1994. x, 133 p. : *ill., Bibl.* (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 37 ISSN 1192-3571)
ISBN 0-662-22366-7 CCG-P no. R71-49/3-37E
MICROLOG 96-02038 (2 fiche)

This report summarizes discussions and conclusions from a workshop on water quality modelling approaches for the Peace and Athabasca Rivers. Workshop objectives included identification of research needs in terms of water quality models, discussion and assessment of existing water quality models in terms of short- and long-term needs for basin management, review and assessment of model structure, examination of rate coefficients and the limitations of available data bases, and identification of issues and areas requiring further research. Sections of the report cover the hydrology of the Peace-Athabasca rivers, water quality monitoring programs in those rivers, water quality modelling approaches (including stochastic models, the WASP4 program, the Dynamic Stream Simulation and Assessment Model, pattern recognition techniques, and alternative approaches), and water

quality modelling recommendations for the Northern River Basins Study. Includes glossary.

XPS, XRD and SEM study of oxidation of UO2 by air in gamma radiation at 150 degrees C

By S. Sunder and N.H. Miller. Pinawa, MB : AECL, Whiteshell Laboratories, 1995. 48 p. : *ill., Bibl.* (AECL research / Atomic Energy of Canada Ltd. ; AECL-11351 ISSN 0067-0367)
ISBN 0-660-16193-1 CCG-P no. CC2-11351E
MICROLOG 96-01476 (1 fiche)

The performance of CANDU reactor fuel in a dry storage facility will be affected by the extent of air oxidation of any defected fuel bundles. This report presents results of an investigation in which uranium dioxide (UO2) disks were heated in air, in oxygen with 60% saturated steam, and in argon with 60% saturated steam for about two years in gamma fields equivalent to those associated with 10- to 20-year-old used CANDU fuel. The results include surface analyses of the oxidized disks using X-ray photoelectron spectroscopy (XPS), X-ray diffraction (XRD), and scanning electron microscopy (SEM); the influence of water vapor on the oxidation of UO2 in gamma fields; and the rate of UO2 oxidation product formation in dry air.

Young offenders alternative measures review : final report summary

Choice Resources Enterprise. Charlottetown : Health & Community Services Agency, Community & Correctional Services Division ; Ottawa : Justice Canada, 1995. 26 p. : *ill., Bibl.*
MICROLOG 96-02033 (1 fiche)

The Alternative Measures Program for young offenders has operated in Prince Edward Island since 1984. This program provides an alternative to the court system and was designed in accordance with the 1984 Young Offenders Act. The objectives of the review of the Program included determining of its impacts on young people, families, and victims; reviewing the Program's utilization patterns and costs relative to the youth court program; implementing recommendations for positive changes to the program; and assisting in developing a similar program for adults. This report summarizes the main findings of the review, presents statistics on young offenders and on Program performance, and includes recommendations regarding Program revisions and future refinements.

Yukon 2000 Women in the Economy Workshop

Yukon 2000 Women in the Economy Workshop (1987 : Haines Junction, Yukon). Whitehorse : Yukon Government, 1987. 54 p. *Cover title: Yukon development strategy : Women in the Economy Workshop. On cover: Yukon 2000 : building the future.*
MICROLOG 96-01515 (1 fiche)

This document summarizes discussions at a workshop on three topics relevant to women in the Yukon economy: defining the economy in women's terms; what is and is not working well for women in the economy; and the actions that can be taken to address women's concerns in the economy. The document is organized into three sections, one for each topic, and each section begins with a descriptions of the results for the whole section. This is followed by lists of detailed comments on the issues raised. The issues included women as workers in traditional activities, as income earners, as volunteers, as home workers, and as consumers; quality of life; work opportunities; employment in the Indian community; child care; starting a small business; education and training; workforce activities; the non-wage economy; attitudes toward women; and business development. The document concludes with a speech on planning for the future.

Yukon development strategy, non-wage economy : sectoral report

Whitehorse : Yukon Government, 1987. 21 p. : *Bibl. On cover: Yukon 2000 : building the future.*
MICROLOG 96-01514 (1 fiche)

This paper discusses three important components of the non-wage economy of the Yukon: the country food harvest, volunteer work, and housework. It is a redrafting of discussions at a workshop held to define the Yukon non-wage economy, examine its value, and identify constraints and opportunities in each non-wage economic sector. The paper begins with a discussion of the definition of the non-wage economy and then reviews its three components. Relevant statistics are included where available. The paper concludes with recommendations for the promotion and support of the non-wage economy as a vital component of healthy social and economic development in the Yukon.

Yukon's forest sector : a discussion paper

Northern Affairs Program (Canada). Economic Development Directorate. Whitehorse : Yukon Government, 1986. 28 p. *On cover: Yukon 2000 : building the future. Cover title: Yukon development strategy, forestry : sectoral report.*
MICROLOG 96-01516 (1 fiche)

The Yukon forest industry has been identified as a developing economic activity that can provide a substantially increased contribution to the territorial economy, leading to greater diversification of the economic base. This report provides an overview of the Yukon forest industry and puts forward a number of the basic issues and options available for developing the potential of the forest sector. The report begins with a review of the history of forestry in the Yukon, then describes the structure of the forest industry, including the physical output and estimated value of production, size of firms, employment and income, and markets. Constraints to growth in the industry are discussed, such as production inefficiencies, high transportation and energy costs, and market fluctuations. The paper concludes with discussion of opportunities to reduce constraints and increase sectoral development.

94-7 New Brunswick mineral policy public opinion survey, 1994. MICROLOG 96-01600 (2 fiche)
95-2 Red sandstone resources in parts of southeastern New Brunswick : potential source of dimension stone. MICROLOG 96-01596 (1 fiche)
95-4 Till lithology and geochemistry in the Waterford area, New Brunswick. MICROLOG 96-01577 (2 fiche)

Policy direction series. Assn of Municipalities of Ontario
FIN93D02 Disentanglement phase one : consultation paper on draft provincial-municipal agreement. MICROLOG 96-02007 (2 fiche)

Projet IEPO. Institut d'études pédagogiques de l'Ontario
82-0165 Évaluation du programme Éduc-Action. MICROLOG 96-01604 (1 fiche)
82-1010 L'Enrichissement de l'expression de la langue par le biais d'activités de résolution de problèmes : rapport final. MICROLOG 96-01606 (1 fiche)

Publication. Université de Montréal. Centre de recherche sur les transports
no. 734 From correlation to distributed contiguities : a family of AR-C-D autocorrelation processes -- Rev. MICROLOG 96-02014 (1 fiche)
no. 95-73 Improved connectivity constraints for the capacitated vehicle routing problem. MICROLOG 96-01569 (1 fiche)
no. 95-76 A Tabu search heuristic for periodic and multi-depot vehicle routing problems. MICROLOG 96-01738 (2 fiche)
no 95-77 Une Méthode de recherche avec tabous pour le problème de tournées de véhicules périodique. MICROLOG 96-01729 (2 fiche)
no 95-78 Résolution de problèmes de tournées de véhicules municipaux. MICROLOG 96-01728 (2 fiche)
no. 95-79 A Tabu search algorithm for the capacitated shortest spanning tree problem. MICROLOG 96-02003 (1 fiche)
no. 95-80 A Branch-and-cut algorithm for the undirected selective traveling salesman problem. MICROLOG 96-02002 (1 fiche)
no. 95-81 Modeling and solving several classes of arc routing problems as traveling salesman problems. MICROLOG 96-02001 (1 fiche)
no. 95-82 Efficient routing of service vehicles. MICROLOG 96-01992 (1 fiche)

Publication. Université de Montréal. Département d'informatique et de recherche opérationnelle
no. 1007 A Branch-and-cut algorithm for the undirected selective traveling salesman problem. MICROLOG 96-02002 (1 fiche)
no. 1010 Efficient routing of service vehicles. MICROLOG 96-01992 (1 fiche)

Rapport. Bureau de la sécurité des transports du Canada
SM9501 Étude de sécurité portant sur les rapports de travail entre les capitaines et officiers de quart, et les pilotes de navire. MICROLOG 96-02026 (1 fiche)

Rapport canadien à l'industrie sur les sciences halieutiques et aquatiques. Canada. Ministère des pêches et des océans
no 233 Sélectivité des filets maillants dans la pêche au maquereau bleu (Scomber scombrus L.), I, Baie de Chaleurs. MICROLOG 96-01776 (1 fiche)
no 234 Sélectivité des filets maillants dans la pêche au maquereau bleu (Scomber scombrus L.), II, Îles-de-la-Madeleine. MICROLOG 96-01777 (1 fiche)
no 235 Performance de la drague hydraulique de type Nouvelle-Angleterre pour la récolte de la mactre de Stimpson (Mactromeris polynyma). MICROLOG 96-01774 (1 fiche)

Rapport. Conseil canadien des ministres de l'environnement
CCME-NV-86F Plan de gestion NOx/VOC du CCME : rapport d'étape, 1994. MICROLOG 96-01871 (1 fiche)
CCME-EPC-NCSRP-48F Manuel d'évaluation de la subsurface des lieux contaminés. MICROLOG 96-01631 (5 fiche)

Rapport d'information. Institut forestier national de Petawawa
PI-X-117F DNARPA, Réseau national de surveillance de l'état de santé des forêts au Canada : guide d'établissement et de surveillance des parcelles -- Version revue. MICROLOG 96-01706 (2 fiche)

Rapport statistique. Canada. Ressources naturelles Canada
94-R-2-A Enquête 1993 sur l'utilisation de l'énergie par les ménages : résultats nationaux. MICROLOG 96-01698 (3 fiche)

Report. Energy Research Laboratories (Canada)
ERL 91-20(OP) Combustion of pipelineable coal-water slurries. MICROLOG 96-01797 (1 fiche)
ERL 91-46(OPJ) The Combustion and heat transfer characteristics of pipelineable water-bitumen emulsions. MICROLOG 96-01798 (1 fiche)
ERL 91-49(J) Advanced energy systems and fuel processing : introduction and overview. MICROLOG 96-01659 (1 fiche)
ERL 91-86(R) Combustion characteristics of Canadian coals, vol. 3. MICROLOG 96-01711 (2 fiche)
ERL 92-38 (OP&J) Fingerprinting sulfur forms in coal and coal macerals using sulfur L-edge XANES : validation of classical methodology. MICROLOG 96-01651 (1 fiche)

Report. Manitoba. Law Reform Commission
no. 88 Reselling unused cemetery plots. MICROLOG 96-02068 (1 fiche)
no. 89 The Trust provisions in the Perpetuities and Accumulations Act. MICROLOG 96-02069 (1 fiche)

Report. Ontario. Highway Engineering Division. Engineering Materials Office
EM-99 Aggregate test pit sampling : alternative methods and safety issues. MICROLOG 96-01559 (1 fiche)

Report. Transportation Safety Board of Canada
SM9501 A Safety study of the operational relationship between ship masters/watchkeeping officers and marine pilots. MICROLOG 96-02025 (1 fiche)

Research paper series. Statistics Canada. Analytical Studies Branch
no. 58 Linking survey and administrative data to study determinants of health. MICROLOG 96-02018 (1 fiche)
no. 60 What is happening to earnings inequality in Canada? MICROLOG 96-02019 (1 fiche)
no. 82 Social transfers, changing family structure, and low income among children. MICROLOG 96-01880 (2 fiche)
no. 83 Alternative measures of the average duration of unemployment. MICROLOG 96-01879 (1 fiche)
no. 84 The Duration of unemployment : a user guide. MICROLOG 96-01878 (1 fiche)
no. 85 Advanced technology use in Canadian manufacturing establishments. MICROLOG 96-01877 (1 fiche)
no. 86 Technology use, training and plant-specific knowledge in manufacturing establishments. MICROLOG 96-01876 (1 fiche)
no. 87 Productivity growth, plant turnover and restructuring in the Canadian manufacturing sector. MICROLOG 96-01875 (1 fiche)

Research report. Toronto Board of Education. Research Services
no. 216 Local school teams at the Toronto Board : a five-year follow-up study. MICROLOG 96-01607 (1 fiche)
no. 217 Mentoring at risk students : challenges and potential. MICROLOG 96-01609 (1 fiche)

School council handbook series. Nova Scotia. Dept. of Education & Culture
Establishing school advisory councils : new roles and responsibilities to support student success. MICROLOG 96-01592 (1 fiche)

Série sur l'accessibilité. Service canadien des parcs
Guide d'accessibilité physique et sensorielle : publication, exposition et audiovisuel. MICROLOG 96-01996 (1 fiche)

The Social policy challenge. C.D. Howe Institute
11 Market solutions for native poverty : social policy for the third solitude. MICROLOG 96-01707 (2 fiche)

Statistical report. Canada. Efficiency & Alternative Energy Branch
94-R-2-A 1993 survey of household energy use : national results. MICROLOG 96-01795 (3 fiche)

Stewardship series. British Columbia and Canada
Naturescape British Columbia : native plant and animal booklet, Georgia Basin. MICROLOG 96-01764 (1 fiche)

Studies in archaeology, architecture and history. Canadian Parks Service. National Historic Sites
A Campaign of amateurs : the siege of Louisbourg, 1745. MICROLOG 96-01621 (1 fiche)

Suffield memorandum. Defence Research Establishment Suffield
no. 1465 Identification of Ile-Ser-Bradykinin in aqueous samples by liquid chromatography with ultraviolet and electrospray mass spectrometric detection. MICROLOG 96-01678 (1 fiche)

Suffield report. Defence Research Establishment Suffield
no. 619 Detection of BW agents : Dugway trinational BW field trial, 20-30 October 1993, Dugway, Utah : mobile aerosol sampling unit data analysis. MICROLOG 96-01677 (1 fiche)

Technical bulletin. Canada. Agriculture & Agri-Food Canada. Research Branch
1995-8E Canada's animal genetic resources : swine breeds in Canada. MICROLOG 96-01891 (1 fiche)

Technical memorandum. Defence Research Establishment Pacific

90-17 Effect on signal to noise ratio of clipping Arctic acoustic data. MICROLOG 96-01818 (1 fiche)

94-151 The PACIFIC ECHO sea trials, DREP/NRL, 1986-92. MICROLOG 96-01802 (2 fiche)

95-11 Stress corrosion cracking of an aluminum-lithium alloy. MICROLOG 96-01674 (1 fiche)

95-21 PE approximations for scattering from a rough surface. MICROLOG 96-01933 (1 fiche)

Technical report. Ontario. Ministry of Natural Resources. Southern Region

TR-009 Management options for old-field sites in southern Ontario : guidelines and literature review. MICROLOG 96-01521 (1 fiche)

Technical report series. Fraser River Estuary Management Program (Canada). Water Quality/Waste Management Committee

93-03 Compilation and interpretation of data on contaminant concentrations in Fraser River estuary sediments. MICROLOG 96-02041 (1 fiche)

93-07 Ultrasonic and radio biotelemetry assessment of the distribution and movement of starry flounder, Platichthys stellatus, in the Fraser River estuary during late January to early April, 1993. MICROLOG 96-02043 (1 fiche)

93-08 Recommendations for a compliance monitoring and surveillance strategy. MICROLOG 96-02042 (1 fiche)

93-09 Environmental emergencies planning and response project. MICROLOG 96-02048 (1 fiche)

93-11 Proceedings of the 1994 Seminar on Environmental Quality and Research : current water quality issues in the Fraser River estuary. MICROLOG 96-02046 (1 fiche)

93-12 1993 survey of sediments and tissues from Boundary Bay and Roberts Bank. MICROLOG 96-02044 (2 fiche)

93-13 Creosote evaluation project. MICROLOG 96-02047 (1 fiche)

95-01 Inventory of research and monitoring in the Fraser River Estuary, 1995-96. MICROLOG 96-02045 (1 fiche)

Technical report. Simon Fraser University. Centre for Systems Science and Laboratory for Computer & Communications Research (B.C.)

CSS/LCCR TR92-03 A Declarative specification of path-based reasoning. MICROLOG 96-02056 (1 fiche)

CSS/LCCR TR92-17 Automatic configuration through constraint based reasoning. MICROLOG 96-02057 (1 fiche)

Wildlife working report. British Columbia. Ministry of Environment, Lands & Parks

WR-73 Status of the fringed myotis in British Columbia. MICROLOG 96-01611 (1 fiche)

WR-74 Status of the western small-footed myotis in British Columbia. MICROLOG 96-01612 (1 fiche)

WR-75 Status of the western spotted bat in British Columbia. MICROLOG 96-01547 (1 fiche)

Working paper. Bank of Canada

95-10 The Canadian experience with weighted monetary aggregates. MICROLOG 96-02022 (1 fiche)

95-11 Long-run demand for M1. MICROLOG 96-02015 (1 fiche)

Working paper. Canada. Agriculture Canada. Policy Branch

7/95 Multinational firms, investment and trade in Canada's food and beverage industry : policy implications. MICROLOG 96-01487 (1 fiche)

Working paper. Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II

WP-1.5-001 A Status assessment of non-timber resource modelling. MICROLOG 96-01485 (1 fiche)

WP-1.5-003 Above ground tree biomass of interior uneven-aged Douglas-fir stands. MICROLOG 96-01490 (1 fiche)

Working paper. Canada. Fiscal Policy & Economic Analysis Branch. Economic Studies & Policy Analysis Division

95-09 The Economics of Canada Pension Plan reforms. MICROLOG 96-01622 (1 fiche)

Working paper. National Round Table on the Environment & the Economy (Canada)

no. 26 Sustainable development and academic institutions : issues in interdisciplinary learning. MICROLOG 96-01735 (1 fiche)

Agriculture

Agricultural real estate values in Alberta, 1994. **96-01979/1**

Agriculture and agri-food trends in France. **96-01814/1**

Annual report 1994-95. **96-01953/1**

Alberta. Agriculture Financial Services Corporation : Annual report 1994-95. **96-01629/1**

Aménagement de cours d'eau municipaux en milieu agricole : normes de conception. **96-01469/1**

Assessing the Impacts of Agricultural Biotechnologies : Canadian-Latin American perspectives : proceedings of a workshop. **96-01505/2**

Belgium, test market at the heart of the European Union for specialty food items. **96-01882/1**

Biological control of leafy spurge in Alberta : progress and prospects. **96-01914/1**

Biotechnology : farming food for the future : workshop proceedings. **96-01599/2**

British Columbia seaweed market study. **96-01702/1**

Canada's animal genetic resources : swine breeds in Canada. **96-01891/1**

Canadian Dairy Commission : Annual report 1994-95. **96-02087/1**

Colloque génétique : l'amélioration génétique au service de la production laitière. **96-01727/1**

Commission canadienne du lait : Rapport annuel 1994-95. **96-02087/1**

Développement de pneus porteurs en agriculture : étude. **96-01486/1**

Economics of milk production in Alberta, 1993 : volume 53. **96-01954/1**

Les Entreprises multinationales, l'investissement et les échanges dans le secteur canadien des aliments et des boissons : conséquences du point de vue de la politique à mettre en oeuvre. **96-01487/1**

Estimation of the size and value of the B.C. exotic bird farm industry. **96-01589/1**

Évaluation génétique des béliers en station : rapport des épreuves, automne 1991, printemps 1992. **96-01572/1**

Farming systems of the African savanna : a continent in crisis. **96-01931/2**

Grain elevators in Canada : crop year 1995-96. **96-01473/2**

Guide to resource conservation and cost savings opportunities in the dairy processing sector. **96-01543/2**

Journée d'information pour les parcs d'engraissement. **96-01474/1**

Journée d'information sur le lapin. **96-01468/1**

Land evaluation and area review for agriculture (LEAR). **96-01568/1**

Liste des producteurs de pommes de terre de semence certifiées au Nouveau-Brunswick 1995. **96-01898/1**

La Lutte intégrée au Canada : un répertoire des ressources. **96-01751/3**

Manitoba. Conseil de promotion de la coopération : Rapport annuel 1994-95. **96-02070/1**

Manitoba. Cooperative Promotion Board : Annual report 1994-95. **96-02070/1**

Mesure de la capacité portante des sols agricoles : étude. **96-01478/1**

Multinational firms, investment and trade in Canada's food and beverage industry : policy implications. **96-01487/1**

New Brunswick Milk Marketing Board : Annual report 1994-95. **96-02011/1**

New Brunswick seed potato growers' certification list, 1995. **96-01897/1**

Ontario farm management analysis project, 1994. **96-01556/1**

Programme d'évaluation des agneaux commerciaux : rapport des épreuves no 1 et no 2, automne 1992 et printemps 1993. **96-02005/1**

Recueil de données historiques : fruits et légumes, Québec, Canada. **96-01480/2**

Régie de mise en marché du lait du Nouveau-Brunswick : Rapport annuel 1994-95. **96-02011/1**

Report on a food pricing study in the City of Toronto, June 1995. **96-01934/1**

Research & development project list. **96-01458/1**

Ressources zoogénétiques du Canada : les races caprines au Canada. **96-01893/2**

Ressources zoogénétiques du Canada : les races ovines au Canada. **96-01894/2**

Ressources zoogénétiques du Canada : les races porcines au Canada. **96-01892/1**

Securing our food future, an agri-food policy for British Columbia : draft discussion document. **96-01653/1**

Sheep grazing guidelines for managing vegetation on forest plantations in British Columbia. **96-01688/1**

Silos à grains du Canada : campagne agricole 1995-96. **96-01473/2**

Société québécoise d'initiatives agro-alimentaires : Rapport annuel 1994-95. **96-01868/1**

Stories of micro food enterprises and implications for economic development. **96-01935/1**

Strategic plan, 1995-2000. **96-02100/1**

Survey of retail food outlets in three neighbourhoods, Regent Park/Moss Park, South Parkdale and Davisville, in the City Toronto, August 1995. **96-01938/1**

Alberta

Action on waste : a full cost analysis guide for municipal waste managers. **96-01950/1**

Agricultural real estate values in Alberta, 1994. **96-01979/1**

Alberta Advisory Council on Women's Issues : Annual report 1994-95. **96-01963/1**

Annual report 1994-95. **96-01953/1**

Alberta. Alberta Education : Annual report 1994-95. **96-01750/2**

Alberta apartment vacancy and rental cost survey, 1995. **96-01970/2**

Alberta Apprenticeship & Industry Training Board : Annual report 1994-95. **96-01952/1**

Alberta business outlook, 1995-96. **96-01948/1**

Alberta Council on Admissions & Transfer : Annual report 1994-95. **96-01964/1**

Alberta Environmental Research Trust : Annual report 1994-95. **96-01744/1**

Alberta Historical Resources Foundation : Annual report 1994-95. **96-01966/1**

Alberta. Human Rights Commission : Annual report 1994-95. **96-01962/1**

Alberta Hydrogen Research Program : Annual review 1993-94. **96-01956/1**

Alberta Labour regulatory reform action plan. **96-01974/1**

Alberta Liquor Control Board : Annual report Jan. 1994-Mar. 1995. **96-01748/1**

Alberta Motion Picture Development Corporation : Annual report 1994-95. **96-01957/1**

Alberta Multicultural Commission : Annual report 1994-95. **96-01961/1**

Alberta. Natural Resources Conservation Board : Report 1994-95. **96-01745/1**

Alberta. Office of the Auditor General : Annual report 1994-95. **96-01827/3**

Alberta Opportunity Company : Annual report 1994-95. **96-01965/1**

Alberta Personnel Administration : Annual report 1994-95. **96-01743/1**

Alberta Sport, Recreation, Parks & Wildlife Foundation : Annual report July 1994-March 1995. **96-01960/1**

Alberta Students' Finance Board : Annual report 1994-95. **96-01947/1**

Alberta Tourism Education Council : Annual report 1994-95. **96-01958/1**

Alberta. Victims' Programs Assistance Committee : Annual report 1994-95. **96-01951/1**

Alberta's aboriginal population, 1991 : cities, towns, and villages. **96-01971/1**

An Analysis of Alberta health records for the occurrence of waterborne disease for the Northern River Basins Study. **96-02034/1**

Annual summary of fish harvesting activities : western Canadian freshwater fisheries, vol. 12, 1993-94. **96-01775/1**

Aquatic macroinvertebrate identifications on under-ice samples, Athabasca River, February and March, 1993. **96-02039/1**

Biological control of leafy spurge in Alberta : progress and prospects. **96-01914/1**

Calgary transportation plan. **96-01835/1**

Compendium of Alberta business waste minimization projects. **96-01978/1**

Differential impact and the Alberta advantage : a discussion paper. **96-01976/1**

Economics of milk production in Alberta, 1993 : volume 53. **96-01954/1**

Ecotoxicology of depositional sediments, Athabasca River, May and September, 1993. **96-02037/1**

Environment Council of Alberta : Annual report 1994-95. **96-01955/1**

Facts on Alberta, 1994. **96-01912/2**

Forest Lawn - Forest Heights/Hubalta area redevelopment plan. **96-01598/2**

Formation and member top database for the Peace River Formation in the Peace River Arch area. **96-01697/1**

Freedom of Information and Protection of Privacy : policy manual. **96-01967/3**

General information bulletin, Diploma Examinations Program, 1994-95 school year. **96-01462/1**

General information bulletin, Diploma Examinations Program, 1995-96 school year. **96-01461/1**

General information bulletin, Provincial Student Assessment Program, grades 3, 6, and 9, 1994-95 school year. **96-01464/1**

General information bulletin, Provincial Student Assessment Program, grades 3, 6, and 9, 1995-96 school year. **96-01460/1**

Guide to the approval process for forest industry projects in Alberta. **96-01972/1**

Investigation of drywall discoloration in Alberta houses. **96-01724/1**

Meeting family needs : new directions in service delivery for Alberta families. **96-01977/1**

New Norway School : Exemplary Schools Project, technical report. **96-01862/2**

Our commitment to human rights : the Government's response to the recommendations of the Alberta Human Rights Review Panel. **96-01968/1**

Pre-apprenticeship training manual for wood frame construction. **96-01500/2**

Principles and recommendations for the regulation of health professionals in Alberta : final report. **96-02088/1**

Regulatory reform report. **96-02080/1**

Report of investigation into allegations relating to the Hon. Ralph Klein, Premier. **96-01975/1**

Results report on the three-year business plan for education, ECS to grade 12, 1995. **96-01746/2**

Right-to-work study : final report. **96-01973/1**

Accomplishments of the Workplace Health and Safety Agency, January 1991 - June 1995. **96-01520/1**

Aggregate test pit sampling : alternative methods and safety issues. **96-01559/1**

An Alternative dispute resolution primer and survey of current government initiatives in Ontario. **96-01550/1**

Annual summary of fish harvesting activities : western Canadian freshwater fisheries, vol. 12, 1993-94. **96-01775/1**

Artificial nest structures for ospreys : a construction manual. **96-02092/1**

Background paper on the Central Area. **96-01567/1**

Background report : land use, strategic evaluation of scenarios. **96-01570/1**

Biology and impact of zebra mussels in Lake St. Clair and Lake Erie : final report. **96-01542/2**

Centre des sciences de l'Ontario : Rapport annuel 1994-95. **96-01511/1**

The Charter of Rights and the redistribution of electoral districts -- Rev.. **96-01549/1**

Commission de transport Ontario Northland : Rapport annuel 1994. **96-01494/1**

Comptes publics de l'Ontario, 1993-94, vol. 1 : annexes, états financiers des ministères. **96-01535/6**

Comptes publics de l'Ontario, 1993-94, vol. 2 : états financiers des sociétés de la Couronne, conseils, commissions. **96-01537/4**

Comptes publics de l'Ontario, 1993-94, vol. 3 : détail des dépenses. **96-01532/3**

Comptes publics de l'Ontario, 1994-95 : états financiers. **96-01531/1**

Comptes publics de l'Ontario, 1994-95, vol. 1 : annexes, états financiers des ministères. **96-01525/6**

Comptes publics de l'Ontario, 1994-95, vol. 2 : états financiers des sociétés de la Couronne, conseils, commissions. **96-01526/4**

Comptes publics de l'Ontario, 1994-95, vol. 3 : détail des dépenses. **96-01530/3**

Corktown Community High School, Toronto, Ontario : Exemplary Schools Project, technical report. **96-01852/2**

A Description of the social assistance system in Hamilton-Wentworth, 1995. **96-01680/2**

Designated substances in the workplace : a general guide to the regulations -- Rev.. **96-01560/1**

Disentanglement phase one : consultation paper on draft provincial-municipal agreement. **96-02007/2**

L'École secondaire de Pain Court, une étude de cas : Étude sur les écoles exemplaires, étude de cas. **96-01863**/2

Ecotourism at the boreal edge. **96-01557**/1

L'Enrichissement de l'expression de la langue par le biais d'activités de résolution de problèmes : rapport final. **96-01606**/1

Évaluation du programme Éduc-Action. **96-01604**/1

Field guide to forest ecosystems of northeastern Ontario. **96-01565**/3

Field guide to the autecology of selected crop trees and competitor species in northeastern Ontario. **96-01564**/2

A Field guide to the Durham Regional Demonstration Forest. **96-01555**/1

Final report of the Income-Contingent Repayment Plan Symposium. **96-01634**/1

First progress report under the 1994 Canada-Ontario Agreement Respecting the Great Lakes Basin Ecosystem. **96-01741**/1

Fiscal and economic statement, 1995. **96-01489**/2

Fish and wildlife habitat rehabilitation program : project highlights. **96-01679**/1

Forest plants of northeastern Ontario. **96-01545**/4

The Fourth era : the economic challenges facing the GTA : summary of a study. **96-01470**/1

Georges Vanier Secondary School : Exemplary Schools Project, technical report. **96-01858**/2

Guide des services du Ministère. **96-01558**/1

Guide for design of rapid transit stations. **96-01522**/1

Guide to resource conservation and cost savings opportunities in the dairy processing sector. **96-01543**/2

Guideline for preparing environmental assessments : mandated technical and information requirements. **96-01554**/1

Horizons, 1996-97 : guide to postsecondary education in Ontario. **96-01633**/1

Institute for Space & Terrestrial Science : Annual report 1994-95. **96-02051**/1

An Integrated approach to soil and ground water management in the lower Don lands. **96-01538**/3

International Joint Commission : Seventh biennial report on Great Lakes water quality. **96-01983**/1

Land evaluation and area review for agriculture (LEAR). **96-01568**/1

Local school teams at the Toronto Board : a five-year follow-up study. **96-01607**/1

Local summit for violence-free schools. **96-01608**/1

Management options for old-field sites in southern Ontario : guidelines and literature review. **96-01521**/1

Manufacturing Research Corporation of Ontario : Annual report 1994-95. **96-01919**/1

Mentoring at risk students : challenges and potential. **96-01609**/1

Methods of determining elected representatives' remuneration. **96-01523**/1

Nearshore benthos of Lake Ontario, 1981 and 1991. **96-01546**/4

Ontario Cancer Treatment and Research Foundation : Annual report 1994-95. **96-01987**/1

Ontario Centre for Materials Research : Annual report 1994-95. **96-01917**/1

Ontario farm management analysis project, 1994. **96-01556**/1

Ontario inventory of PCB storage sites, April, 1995. **96-01544**/3

Ontario Labour Relations Board : Annual report 1990-91, 1991-92. **96-01472**/2

Ontario Laser & Lightwave Research Centre : Annual report 1994-95. **96-02050**/1

Ontario. Ministère des richesses naturelles : Rapport annuel 1991-92. **96-01504**/1

Ontario. Ministry of Natural Resources : Annual report 1991-92. **96-01504**/1

Ontario Northland Transportation Commission : Annual report 1994. **96-01494**/1

Ontario Science Centre : Annual report 1994-95. **96-01511**/1

Ontario. Tribunal d'appel des accidents du travail : Rapport annuel 1994. **96-01747**/2

Ontario. Workers' Compensation Appeals Tribunal : Annual report 1994. **96-01747**/2

Options 1996 : guide des études postsecondaires en français de l'Ontario. **96-01610**/1

Premier rapport d'étape en vertu de l'Accord Canada-Ontario concernant l'écosystème du bassin des Grands Lacs, 1994. **96-01742**/1

Programme de restauration de l'habitat des poissons et des autres animaux : faits saillants. **96-01679**/1

Prospects for the utilization of paper mill sludges in manufactured products : final report. **96-01562**/2

Public accounts of Ontario, 1993-94, vol. 1 : schedules, ministry statements. **96-01534**/5

Public accounts of Ontario, 1993-94, vol. 2 : financial statements of crown corporations, boards, commissions. **96-01536**/4

Public accounts of Ontario, 1993-94, vol. 3 : details of expenditure. **96-01533**/3

Public accounts of Ontario, 1994-95, vol. 1 : schedules, ministry statements. **96-01528**/6

Public accounts of Ontario, 1994-95, vol. 2 : financial statements of Crown corporations, boards, commissions. **96-01529**/4

Public accounts of Ontario, 1994-95, vol. 3 : details of expenditure. **96-01527**/3

Qualitative sampling for walleye embryos in five tributaries of the Great Lakes. **96-01981**/1

Rapport du Colloque sur le programme de remboursement des prêts en fonction du revenu. **96-01635**/1

Reducing urban hunger in Ontario : policy responses to support the transition from food charity to local food security. **96-01937**/1

Remote detection of hydrocarbon fuel contaminants in the subsurface. **96-01563**/2

Report of the Metro Task Force on Cost Savings through Cooperative Activities. **96-01603**/2

Report on a food pricing study in the City of Toronto, June 1995. **96-01934**/1

Report : report of the Wetlands Working Group. **96-01571**/1

Rouge Park management structure and funding report. **96-01553**/1

Scientific criteria document for the development of an interim provincial water quality objective for thallium. **96-01552**/1

Short line railways. **96-01561**/1

Soil bioengineering technical report, Black Ash Creek rehabilitation project, 1992-94. **96-01539**/1

St. Benedict Catholic Secondary School, a case study : Exemplary Schools Project, technical report. **96-01856**/3

Statistical assessment of multivariate techniques for zoobenthic communities and water chemistry for lakes from central Ontario. **96-01540**/3

The Status of women and employment equity in Ontario school boards : report, 1989. **96-01602**/1

Stories of micro food enterprises and implications for economic development. **96-01935**/1

Survey of retail food outlets in three neighbourhoods, Regent Park/Moss Park, South Parkdale and Davisville, in the City Toronto, August 1995. **96-01938**/1

Teachers' work : changing patterns and perceptions in the emerging school systems of 19th and early 20th century central Canada. **96-01605**/1

Technical and cost assessments of potential control options for TRS emissions from Ontario sources : final report. **96-01548**/4

Le Tri à la source des matières recyclables : guide à l'intention des secteurs industriel, commercial et institutionnel, et des propriétaires d'immeubles résidentiels : dispositions du Réglement 103/94 de l'Ontario. **96-01518**/1

TRIO : Annual report 1994-95. **96-01920**/1

Truck and bus National Safety Code transportation regulation in Ontario -- Rev. and updated. **96-01524**/1

Vision 2000 : quality and opportunity, a summary : the final report of Vision 2000, a review of the mandate. **96-01601**/1

Waterloo Centre for Groundwater Research : Annual report 1994-95. **96-01918**/1

Westside Marsh : interim report. **96-01519**/1

Where are Ontario's jobs? Labour market trends, 1989-94. **96-01551**/1

ONTERIS (ON collection)

L'Enrichissement de l'expression de la langue par le biais d'activités de résolution de problèmes : rapport final. **96-01606**/1

Évaluation du programme Éduc-Action. **96-01604**/1

Horizons, 1996-97 : guide to postsecondary education in Ontario. **96-01633**/1

Local school teams at the Toronto Board : a five-year follow-up study. **96-01607**/1

Local summit for violence-free schools. **96-01608**/1

Mentoring at risk students : challenges and potential. **96-01609**/1

Options 1996 : guide des études postsecondaires en français de l'Ontario. **96-01610**/1

Rapport du Colloque sur le programme de remboursement des prêts en fonction du revenu. **96-01635**/1

Report of the Metro Task Force on Cost Savings through Cooperative Activities. **96-01603**/2

The Status of women and employment equity in Ontario school boards : report, 1989. **96-01602**/1

Teachers' work : changing patterns and perceptions in the emerging school systems of 19th and early 20th century central Canada. **96-01605**/1

Vision 2000 : quality and opportunity, a summary : the final report of Vision 2000, a review of the mandate. **96-01601**/1

Physical sciences

Abiotic factors involved in predicting trace metal levels in freshwater bivalves. **96-01541**/1

Advanced energy systems and fuel processing : introduction and overview. **96-01659**/1

Advanced technology use in Canadian manufacturing establishments. **96-01877**/1

Alternative measures of the average duration of unemployment. **96-01879**/1

Antenna amplitude and phase pattern measurements using an aircraft-towed transmitter. **96-01672**/1

Application of the integral method to modelling the oxidation of defected fuel elements. **96-01477**/1

Applications of Remote Sensing in Hydrology : proceedings. **96-01513**/4

Assessment of mercury exposure and risks of dental amalgam : final report. **96-01994**/2

Assessment of the long-term risk of a meteorite impact on a hypothetical Canadian nuclear fuel waste disposal vault deep in plutonic rock. **96-01714**/1

Automatic configuration through constraint based reasoning. **96-02057**/1

Background document for advanced personal load carriage system for the Canadian Forces : final report. **96-01806**/2

Bien-être, résultats de l'intégration de l'échelle d'équilibre affectif de Bradburn à l'enquête sur le vieillissement et l'autonomie de 1991. **96-01924**/2

A Branch-and-cut algorithm for the undirected selective traveling salesman problem. **96-02002**/1

The Canadian experience with weighted monetary aggregates. **96-02022**/1

La Carbonatation du béton dans les bâtiments canadiens. **96-01639**/2

The Combustion and heat transfer characteristics of pipelineable water-bitumen emulsions. **96-01798/1**

Combustion characteristics of Canadian coals, vol. 3. **96-01711/2**

Combustion of pipelineable coal-water slurries. **96-01797/1**

Concrete carbonation in Canadian buildings. **96-01809/2**

Conseil national de recherches Canada : Rapport au Parlement 1994-95. **96-01872/2**

Conservation of Historic and Artistic Works on Paper : proceedings of a conference. **96-01821/4**

Current research, 1994. **96-01895/4**

A Declarative specification of path-based reasoning. **96-02056/1**

A Description of the Canadian irradiation-research facility proposed to replace the NRU reactor. **96-01713/1**

Detection of BW agents : Dugway trinational BW field trial, 20-30 October 1993, Dugway, Utah : mobile aerosol sampling unit data analysis. **96-01677/1**

Dissolution models for glassy waste forms. **96-01479/2**

The Duration of unemployment : a user guide. **96-01878/1**

The Economics of Canada Pension Plan reforms. **96-01622/1**

Effect on signal to noise ratio of clipping Arctic acoustic data. **96-01818/1**

The Effects of shell wall thickness and number of slots on the performance of the merchant slotted-shell flextensional projector. **96-01801/1**

Efficient routing of service vehicles. **96-01992/1**

Estimating the lifetimes of titanium containers for nuclear fuel waste : a damage function for the crevice corrosion of grade-2 titanium. **96-01716/1**

Étude sur les gradients de pression moyenne, les pressions moyennes des cavités et les pressions moyennes résiduelles exercées sur les écrans pare-pluie d'un bâtiment représentatif. **96-01807/1**

Évaluation de l'exposition au mercure et des risques dus aux amalgames dentaires : rapport final. **96-01993/2**

EWC3I-EWOC work station user manual. **96-01820/1**

EWC3I software development : final report. **96-01825/1**

EXTRACT, a program for extracting a section of finite element model for top-down-modelling. **96-01817/1**

Feasibility study for DREO automated ILL support : final report. **96-01804/1**

Final report on electron curing of advanced composites. **96-01874/1**

Fingerprinting sulfur forms in coal and coal macerals using sulfur L-edge XANES : validation of classical methodology. **96-01651/1**

From correlation to distributed contiguities : a family of AR-C-D autocorrelation processes -- Rev.. **96-02014/1**

Further investigations of space-time adaptive processing and displaced phase centre antenna space-based radar, vol. III : user manual : final contract report. **96-01842/1**

The Heavens above and the earth beneath, a history of the Dominion Observatories : part 1, to 1946. **96-01922/3**

Hommage à l'excellence en recherche, 1992-93. **96-01497/1**

Hommage à l'excellence en recherche, 1994-95. **96-01496/1**

Hommage à l'excellence en recherche, 1995-96. **96-01495/1**

Identification of Ile-Ser-Bradykinin in aqueous samples by liquid chromatography with ultraviolet and electrospray mass spectrometric detection. **96-01678/1**

Improved connectivity constraints for the capacitated vehicle routing problem. **96-01569/1**

Institute for Space & Terrestrial Science : Annual report 1994-95. **96-02051/1**

Investigation of multiple hypothesis and Viterbi trackers for signal following applications. **96-01740/2**

Investigation of the potential and limitations of the ram accelerator : final report. **96-01799/2**

Linking survey and administrative data to study determinants of health. **96-02018/1**

Long-run demand for M1. **96-02015/1**

Manufacturing Research Corporation of Ontario : Annual report 1994-95. **96-01919/1**

Mesures alternatives de la durée moyenne du chômage. **96-01879/1**

Une Méthode de recherche avec tabous pour le problème de tournées de véhicules périodique. **96-01729/2**

Modeling and solving several classes of arc routing problems as traveling salesman problems. **96-02001/1**

National Research Council Canada : Report to Parliament, 1994-95. **96-01872/2**

Naval resource planning in real-time. **96-01845/1**

Ocean Station Papa detailed zooplankton data, 1956-80. **96-01778/1**

Ontario Centre for Materials Research : Annual report 1994-95. **96-01917/1**

Ontario Laser & Lightwave Research Centre : Annual report 1994-95. **96-02050/1**

Opto-electronic technology for the optical control of array antennas. **96-01734/1**

The PACIFIC ECHO sea trials, DREP/NRL, 1986-92. **96-01802/2**

A Particle-tracking code (TRACK3D) for convective solute transport modelling in the geosphere : description and user's manual. **96-01471/4**

PE approximations for scattering from a rough surface. **96-01933/1**

Photovoltaic systems : a buyer's guide. **96-01712/1**

PROP3, revised compressibility corrections for wind tunnel tests of marine propellers. **96-01844/1**

Pyrolysis gas chromatography/mass spectrometry identification of elastomeric materials. **96-01673/1**

Radiological assessment of 36Cl in the disposal of used CANDU fuel. **96-01715/1**

Real-time knowledge-based systems for the naval situation assessment process. **96-01819/1**

Résolution de problèmes de tournées de véhicules municipaux. **96-01728/2**

Secteur du revêtement de surface : technologies propres, galvanoplastie. **96-01769/1**

Smoke propagation modelling : final report. **96-01843/2**

Source level calibration of the DREA moving coil projector. **96-01676/1**

State of the art in local area sensor data fusion for naval command and control afloat. **96-01932/1**

Statistical assessment of multivariate techniques for zoobenthic communities and water chemistry for lakes from central Ontario. **96-01540/3**

Stress corrosion cracking of an aluminum-lithium alloy. **96-01674/1**

Systems integration study of a hierarchical minefield image analysis algorithm : report to end phase 2. **96-01815/1**

A Tabu search algorithm for the capacitated shortest spanning tree problem. **96-02003/1**

A Tabu search heuristic for periodic and multi-depot vehicle routing problems. **96-01738/2**

Technology use, training and plant-specific knowledge in manufacturing establishments. **96-01876/1**

Tolerance times for continuous work tasks while wearing NBC protective clothing in warm and hot environments and the strategy of implementing rest schedules. **96-01816/1**

A Tribute to research excellence : the Canada Gold Medal for Science and Engineering, the E.W.R. Steacie Memorial Fellowships, 1994-95. **96-01496/1**

A Tribute to research excellence, 1992-93. **96-01497/1**

A Tribute to research excellence, 1995-96. **96-01495/1**

User's manual for the CC3 computer models of the concept for disposal of Canada's nuclear fuel waste. **96-01823/6**

L'Utilisation de la technologie, la formation et les connaissances spécifiques dans les établissements de fabrication. **96-01876/1**

Utilisation des technologies de pointe dans les établissements de fabrication. **96-01877/1**

Well-being, results of the Bradburn Affect Balance Scale in the 1991 survey on ageing and independence. **96-01923/2**

Wind effects on ship capsize risk. **96-01808/1**

Workshop on water quality modelling for the Northern River Basins Study : proceedings. **96-02038/2**

XPS, XRD and SEM study of oxidation of UO2 by air in gamma radiation at 150 degrees C. **96-01476/1**

Planning, Housing and Construction Industry

1993 survey of household energy use : national results. **96-01795/3**

Background paper on the Central Area. **96-01567/1**

Background report : land use, strategic evaluation of scenarios. **96-01570/1**

Build Green and conventional materials off-gassing tests : a final report. **96-01691/1**

Cadre stratégique national à l'intention des exportateurs canadiens du secteur de l'habitation : rapport. **96-01986/1**

Calgary transportation plan. **96-01835/1**

Other Canadian Reference Sources

- Available from Micromedia -

Canadian Index

A comprehensive index providing access to nearly 100,000 citations each year from: nine major daily newspapers, over 200 Canadian trade and business periodicals, over 50 specialized Canadian trade magazines for which indexing is unavailable elsewhere, and more than 350 general periodicals.

KIOSK: CBCA

KIOSK: CBCA is a reference tool which combines a high quality indexing and abstracting database (CBCA) with direct access to the fulltext content of the articles indexed.

CBCA Fulltext

CBCA Fulltext provides fulltext access to Canadian periodicals and current affairs information, and incorporates the largest and most-comprehensive subject guide to periodical literature. CBCA Fulltext allows searching on Windows, Macintosh, DOS and UNIX platforms.

CBCA OnDisc

CBCA OnDisc is the Knight Ridder CD-ROM version of the Canadian Index, giving you access to ten years of indexing. It includes every citation in the Canadian Index, plus thousands of informative abstracts which do not appear in the print edition.

KIOSK: Maclean's

Published in cooperation with Maclean's magazine, KIOSK: Maclean's contains every article and news report published by Canada's Weekly Newsmagazine over an eight year period.

CNI Clips: Press Clippings on Microfiche

CNI Clips is a unique service which provides the full text of more than 40,000 Canadian Press news stories and feature articles each year, and is delivered in a practical and economical microfiche format.

Canadian Education Index

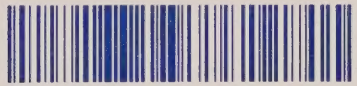

Canadian Education Index covers more than 200 Canadian education periodicals, as well as reports and monographs from the educational research community across Canada. In addition, the Index covers report literature from government agencies, educational faculties and teachers' associations, and large school boards.

Canadian Education Index Thesaurus

Canadian Education Index Thesaurus is a bilingual controlled vocabulary of over 5,000 terms, developed for the indexing and retrieval of French or English-language material in Canadian education, and is an invaluable research aid for users of the Canadian Education Index.
